

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

The Bureau of Statistics

Commonwealth of Massachusetts.

BUREAU OF STATISTICS OF LABOR,
ROOMS 250-258, STATE HOUSE,
BOSTON, JULY 15, 1902.

TO THE HONORABLE SENATE AND HOUSE OF REPRESENTATIVES :

I have the honor to transmit, herewith, the Annual Statistics of Manufactures for the year 1901, which have been collected and are presented in compliance with Chapter 107 of the Revised Laws.

I wish to acknowledge in this connection the faithful services of Mr. Frank H. Drown, Second Clerk of the Bureau, in charge of the Division of Manufactures, and to recognize also the continued assistance, in the general work of the Department, of Mr. Charles F. Pidgin, First Clerk.

Very respectfully,

HORACE G. WADLIN,

Chief.

PART I.

INDUSTRIAL CHRONOLOGY

FOR THE

NINE MONTHS ENDING SEPTEMBER 30, 1901.

[1]

PART I.

INDUSTRIAL CHRONOLOGY—1901.

Abington. In February, A. C. Woodward, elastic goring, added strapping for shoes to product.

Acton. In February, Hall Bros., palls and tubs, shut down for repairs.

Adams. In January, Greylock Shirt Co. shut down for 10 days. *February.* L. L. Brown Paper Co. began erection of boiler house.—Graham, Clark, & Co. installed new boiler and added new machinery.—W. C. Plunkett & Sons added new machinery. *March.* Berkshire Cotton Manufacturing Co. shut down on account of high water. *April.* L. L. Brown Paper Co. shut down two weeks to install new engine and make repairs.—Greylock Shirt Co. shut down stitching department indefinitely.—Berkshire Cotton Manufacturing Co. shut down temporarily owing to accident to machinery. *May.* Briggs & Harrington sold their wagon plant to Louis Ruel and retired from business.—Fire damaged boiler house of H. J. Arnold & Sons' sawmill. *June.* L. L. Brown Paper Co. began on foundation for new mill. *July.* Adams Marble Co. started on season's work. *August.* Most of the manufacturing establishments damaged by flood.—Levi L. Brown, paper manufacturer, died, aged 75 years; in 1848, he organized L. L. Brown Paper Co.; was the founder of Rensfrew Manufacturing Co. and Windsor Manufacturing Co., North Adams, and originator of the Whiting Paper Co., Holyoke, and of the American and United Zylonite Co.

Agawam. In February, Agawam Co. shut down on account of accident to main shaft.

Amesbury. In January, work begun at factory of Briggs Carriage Co., after shutdown of several months.—Fire damaged carriage factory of Curran, Burke, & Co. *February.* C. Warren Brown, of Lockwood & Brown, wheels, died, aged 59 years.—Hume Carriage Co. erected 3-story addition to factory. *June.* David J. Folger, retired carriage manufacturer, died, aged 61 years; he began business in 1869. *July.* Cameron & Hines Co. began the manufacture of carriages.

Andover. In July, Tyer Rubber Co. shut down for stock taking; the usual summer shutdown ended July 15.

Ashburnham. In March, the Ashburnham Sheeting Mill commenced work after shutdown of several months.

Ashland. In July, shoe factory of Josiah A. Balcom started up after shutdown of several months. *August.* Ashland Boot & Shoe Co. closed business; factory taken by Woodland Manufacturing Co.—F. E. Tuttle, of Olmsted & Tuttle, started up carpet lining factory which shut down in fall of 1900.—Woodward Manufacturing Co. began manufacture of shoe nails formerly carried on by Standard Shoe Machinery Co.

Athol. In March, fire damaged mill owned by L. S. Van Valkenburgh and occupied by L. S. Starrett Co.; mill was wooden structure, 4 stories, 100 x 40 feet, erected in 1811. *April.* Millers River Manufacturing Co. started after shutdown of two weeks for repairs.—Hill & Green began work on full time.—Diamond Match Co. shut down owing to difficulty in getting certain grade of wood.—The Porter-Brewer Toy shop began work with about 80 employes. *May.* Fire destroyed picker mill owned by S. J. Handy. *August.* L. S. Starrett Co., tools, closed for 2 weeks' vacation.—Millers River Manufacturing Co. started up after 2 weeks' vacation.

Attleborough. In January, Bates & Bacon sold to Philadelphia Watch Case Co., and plant removed to Riverside, N. J. *February.* Steam pipe burst in the mills of the Hebron Manufacturing Co., causing shutdown for repairs. *April.* Gold Medal Braid Co. shut down for the first time in many years.

Auburn. In January, James Hilton began erection of new shoddy mill, 30 x 30 feet. *July.* W. J. Hogg began manufacture of carpet yarn in the Stoneville worsted mill, which had been closed for a year or more. *August.* Auburn worsted mill, owned by Wilkinson Crossley, of Brookline, purchased by Leopold B. Rosenberg, of New York; to manufacture ladies' dress goods. *September.* Stoneville worsted mill shut down to install new machinery.

Avon. In January, shoe factory of L. G. Littlefield shut down for few days; in April, new machinery installed.

Barre. In April, in consequence of the milk strike, farmers opened the Central Cheese Factory in order to use the milk instead of sending it to Boston; factory dates back to 1865; in May, the milk producers organized a company and purchased the factory from C. F. Atwood as a safeguard against future milk troubles.

Becket. In August, M. E. Ballou & Son, basket makers, started No. 2 mill.

Bellingham. In May, Taft, Murdock, & Co. built addition to woolen mill.

Berlin. In April, mill property of Edmund W. Wheeler destroyed by fire.

BEVERLY. In January, The Beverly Engine and Machine Co. incorporated; authorized capital \$200,000; succeeds Beverly Machine Works. — Woodbury Bros., shoes, consolidated with Murray, Cone, & Co. *February.* Shoe factory of Woodbury Bros. damaged by fire. — Myron Woodbury, shoe manufacturer, died, aged 47 years. *March.* Mader & Dow, boots and shoes, succeeded by Mader & Hanscom. *April.* H. O. Woodbury, W. Varian, and W. O. Cree formed company to manufacture shoes. *June.* Murray-Cone Shoe Co. incorporated; authorized capital \$50,000; succeeds Murray, Cone, & Co.

Billerica. In August, Faulkner Manufacturing Co., woolen goods, resumed work after a week's vacation.

Blackstone. In February, Knight & LeSpade began business as leather manufacturers.

Blandford. In January, Peebles Bros. added grist-mill to sawmill plant.

BOSTON. In January, Harvard Rubber Co. burned out. — William T. Van Nostrand died, aged 79 years; he began brewing in Massachusetts in 1860 and owned the Bunker Hill brewery from 1871 to 1891, when he retired. — Henry Guild, of Henry Guild & Son, manufacturing jewelers, died. — J. G. McCarter Co. incorporated to succeed J. G. McCarter, shoes. — Hersey, Damon, & Sprague, slippers, succeeded by Damon & Sprague. — Holmes Co., woolen and worsted goods, incorporated with capital of \$20,000.

February. Acme Rand Co. removed to Brockton. — Syndicate headed by Alexander S. Porter purchased controlling interest in Flagg Manufacturing Co., Globe Buffer Co., and Union Edge-Setter Co., covering 20 shoe machines; total capital, \$350,000.

March. McGreenery Bros. & Manung succeeded Boston Cigar & Tobacco Co., and moved to larger quarters. — Property of Boston Lead Works, consisting of land with brick and wooden buildings thereon, transferred to Boston Lead Manufacturing Co. — James Breslin, of Quincy Cigar Co., died, aged 58 years.

April. Hallett & Davis Co., pianos, reduced force preparatory to closing business; manufacturing hereafter to be done in the West. — Walworth Manufacturing Co. began erection of addition to foundry, 4 stories, 200 x 80 feet. — George C. Davis Co., shoes, sold business to George M. Coburn, Somersworth, N. H. — Charles H. Sprague, of Damon & Sprague, slippers, died. — Fires for the month: B. F. Sturtevant Co.'s works totally destroyed; workshop of Lang & Jacobs, coopers' supplies, damaged. — Putnam Nail Co. shut down indefinitely. — Chase & Co., shoes, incorporated; authorized capital \$250,000.

May. Boston Last Co. began manufacturing lasts.

June. The Atlantic Works increased capital stock and obtained control of East Boston Dry Dock Co.'s plant. — Vose & Sons, pianos, purchased land for erection of new factory, 360 x 60 feet, and power house of 60 x 60 feet. — The Tongue-Lock Sewing Machine Company incorporated under the laws of the State of Maine, authorized capital \$1,000,000, to manufacture sewing machines under the patent of Roswell Carleton. This invention

relates to machines for securing the upper to the sole of the boot or shoe by loops from a single thread inserted through the upper and through a portion of the sole usually known as the "between substance," the bights of the loops being thrown over and locked by tongues cut in one side of the sole. This displaces the old-time method of channelling and the necessity of "filling," and is not only a saving of time but a saving of thread and labor. The invention consists in numerous improvements on the present method of sewing turned shoes; among them being an awl which is adapted to wabble laterally when entering the recess under a tongue, so that its point will be guided by the sides of the recess to the centre.

July. Property of Boston Cordage Co. sold at auction to Cannabis Manufacturing Co., of New Jersey. — Commonwealth Hygienic Ice Co. started with second largest plant of the kind in the country, designed to turn out 250 tons of ice a day. — Standard Sugar Refining Co., Whittier Machine Co., and Carter Ink Co. damaged by fire.

September. Temple Glove Manufacturing Co. shut down indefinitely. — Fires for the month: Building occupied by George E. Messer, furniture; J. F. Jones & Co., lubricating oils; Porter & Stainforth, motors; A. & J. E. Tuttle, patterns; Old Colony Furniture Co.; Massachusetts Mattress & Bedspring Co., and New Departure Trunk Co.; also old Etna rubber mill in Jamaica Plain; and building occupied by M. Blackstone, cap manufacturer.

Braintree. In April, W. S. Lees & Co., of New York city, took five-year lease of all the buildings, except the large wooden building, formerly owned and occupied by A. S. Morrison & Bros., and began manufacture of ball wicking, miners' wick, and mattress tips.

Bridgewater. In January, Jenkins Bros. shut down during installation of new electric light plant. — L. W. Taylor, formerly foreman for W. B. May, began manufacture of slippers. — Henry Miller, manufacturer of tacks, died, aged 56 years. *February.* Shawmut Lead Co. started up. *March.* Henry Perkins, iron founder, died, aged 87 years; he began business in 1848. *April.* Shoe firm of McElwain & Co. incorporated under Maine laws, with capital stock of \$200,000, under name of the W. H. McElwain Co. — Shawmut Lead Co. erected addition of about 600 square feet, to be used for a granulating room. — Bridgewater Brick Co. formed to manufacture brick on the grounds occupied by the Plymouth County Agricultural Society; extensive improvements made in the buildings, and machinery added; output to be about five million bricks annually. *May.* W. H. McElwain Co. shut down gang room for a few days while taking account of stock.

BROCKTON. In January, D. S. Packard & Co., sole leather counters, succeeded by V. & F. W. Floom. — Gray & Earle, pattern makers, succeeded by George R. Earle. — Hurley Brothers retired from firm of N. R. Packard & Co., shoes, and took factory in Rockland. — Business of Harvey F. Crawford, shoes, sold to W. H. McElwain and others; to continue as the Crawford Shoe Company.

February. M. A. Packard Co., shoes, occupied new addition of 4 stories, 85 x 40 feet, and increased output to 2,400 pairs a day. — Pope Rand Co., rand manufacturers, began work. — R. B. Grover Co., shoes, started all departments. — Luther H. Hollis, retired shoe manufacturer, died, aged 65 years; he began business in 1866. — Monarch Rubber Co. added manufacture of cement for shoes to product.

March. New company formed under name of The Tougas Machine Co., with capitalization of \$200,000, to manufacture machine for cutting rubber soles on a bevel; with one movement the machine cuts out the rubber soles, bevels the edge, and at the same time stamps upon the bottom the trade mark and the size and width of the shoe or boot; the fly wheel which contributes the power makes 240 revolutions a minute, and the soles can be stamped out as fast as a man can feed them into the machine and operate the pressure lever. — Eaton Co., shoes, moved into space in Chas. A. Eaton No. 2 factory formerly occupied by J. B. Lewis Co., who removed to Randolph. — F. C. Kingman & Co., shoes, took another floor of the factory in which they are located, giving them about 1,500 square feet extra space.

April. Old Colony Rand Co. added new machinery for the production of Goodyear welts and heels. — F. C. Kingman & Co. sold factory on Centre Street to Inkley & Johnson, heel manufacturers. — W. L. Dunbar & Co. sold shoe pattern business to H. J. Dunbar, who continued under name of Brockton Pattern Co. — William P. Kingman, of William P. Kingman Co., shoes, moved to Cleveland, Ohio, and became member of the firm of Kingman & Worbass, to manufacture boys' and youths' shoes. — W. L. Emery, leather dealer, died, aged 56 years; he commenced business in Brockton in 1882, and was

associated for a time with Everett T. Packard, but at the time of his death was connected with the Brockton Cut Sole Co. — Gang room employes of the D. W. Field Co., shoes, were allowed day's vacation owing to the sole leather department being somewhat behind on the work. — Work on addition to D. W. Field Co. shoe factory begun; completed in June. — George H. Stevens Shank Company began work after a shutdown of several weeks on account of inability to get steel.

May. Inkley & Johnson, heels, moved business from Rockland. — United States Die Co. formed and began business. — Factory building at Campello, formerly occupied by the Standard Rubber Co., together with shafting, electric motors, machinery, and office fixtures, sold at auction to T. E. Eustis, of Boston. — United States Machinery Co. purchased the business of the Johnson Cementing Machine Co.

June. The George H. Stevens Shank Co.'s factory at Montello, together with the Boston plant, purchased by the Union Shank Co., which had factories at Whitman, Taunton, and Boston. — The cutting room of W. L. Douglas Shoe Co. shut down for two weeks. — Brockton Last Co. began erection of 2-story house, 90 x 22 feet, to be used for storing and drying last blocks. — E. E. Taylor & Co. made addition to shoe factory. — Smith & Wade, shoe stays, erected new factory of wood, 2 stories, 26 x 56 feet. — Clarence L. Calkins withdrew from firm of F. C. Kingman & Co., shoes, and business continued by F. C. Kingman. — Lightning struck woodworking mill of Washburn & Hayward; damage about \$1,000. — Church & Alden, shoes, started up after shutdown of two weeks.

July. Brockton Co-operative Boot & Shoe Co. started up after shutdown of one week, putting union stamp on all its output. — George A. Carter began erection of modern factory, 35 x 180 feet, for the manufacture of tacks and taps. — Crafts, Harrington, & Co., shoes, occupied new location in old Packard & Field factory and added new machinery by which the business of the firm was increased nearly one-third. — Tuck Manufacturing Co. began erection of addition, 75 x 95 feet, two stories, to knife shop in Montello. — H. B. Walker, well known in the last manufacturing business, began manufacture of iron, tin, and wood sole patterns. — Cavanaugh Bros. & Knapp purchased plant formerly occupied by Standard Rubber Co. and continued manufacture of rubber goods; additional operatives and much new machinery employed. — Condon Bros. & Co., boots and shoes, added 1,200 feet to floor space in factory.

August. Nesmith-Roarty Shoe Co., incorporated under Maine laws, succeeded W. F. Nesmith Shoe Co. — Old Colony Rand Co. added new machinery. — Clarence L. Calkins began manufacturing shoes. — Peleg S. Leach, retired shoe manufacturer, died, aged 71 years; he began business in 1851 and retired in 1878, when factory and contents were destroyed by fire. — John T. Bullivant and George R. Earle began manufacturing shoe patterns.

September. In railroad accident at Avon, Ernest Joyce, of Joyce & Fletcher, shoe manufacturers, was instantly killed; Loring Q. White, of F. E. White Co., shoes; Frank M. Hawthaway, of C. M. Hawthaway & Co., blacking manufacturers; J. M. O'Donnell, shoes; and F. W. Flloon, counter manufacturer, were injured.

Shoe shipments. The number of cases of shoes shipped during the year ending September 30, 1901, as compiled by the *Brockton Enterprise*, is presented in the following table:

MONTHS.	1895-96	1896-97	1897-98	1898-99	1899-00	1900-01
October,	30,915	43,787	45,678	31,299	43,170	44,057
November,	35,805	28,850	37,637	39,748	37,168	46,343
December,	20,527	22,950	34,112	36,769	37,528	33,918
January,	33,465	28,249	38,818	35,476	45,770	39,694
February,	36,110	37,417	38,510	41,998	43,243	45,053
March,	40,556	40,088	46,576	66,524	64,671	70,166
April,	42,150	49,834	57,015	46,544	44,274	50,388
May,	51,242	33,113	36,218	40,378	37,958	57,470
June,	31,681	24,991	29,041	40,254	35,123	44,577
July,	30,455	30,383	38,672	31,732	27,623	38,131
August,	33,100	39,265	43,187	45,944	52,447	64,744
September,	40,029	41,083	56,121	62,563	45,607	47,721
TOTALS,	426,035	419,910	501,585	519,229	519,579	582,262

Brockfield. In January, factory of Speedway Wheel Co., 4 stories, 185 x 60 feet, together with patents, rights, and goodwill sold to new corporation known as Lashaway Carriage & Wheel Co., for the manufacture of pneumatic speedway and road carriages. The patents owned by the old firm for pneumatic wheel gearing will pass to the new corporation. — C. H. Moulton & Co., shoes, started up cutting department after shutdown of eight weeks. *February.* C. H. Moulton & Co., shoes, shut down one week for stock taking. — Lashaway Carriage & Wheel Co. made first shipment of buggies.

CAMBRIDGE. In January, fire damaged stock and building of Warren Bros., manufacturers of tar paper. *February.* The plant in Cambridge, stores and warehouses in Boston, and merchandise, wherever situated, of John P. Squire Co., provision and packing concern, sold at auction; the sale affects property in Lowell, Mass., and Bangor, Me., and includes all property held by the allied companies of the concern in New England. — George F. Blake Manufacturing Co., machines, began erection of 3-story building, 45 x 34 x 154 feet. *March.* Plant of Dover Stamping Co., kitchen utensils, sold to Joslyn & Co. for \$92,500. — Hoxie Chemical Co. incorporated; authorized capital \$1,000. *August.* Fire damaged factory of Shaw & Remby, moldings.

Canton. In March, Canton Manufacturing and Bleaching Co.'s plant sold at auction and bid in by the attorney for the mortgagee.

Charlemont. In February, Frary Manufacturing Co. shut down on account of low water. — Fire damaged contents of drying house and some of the buildings of the Frary Manufacturing Co.

Charlton. In January, James O. Copp satinet mill, with 60 acres of land and 4 tenement houses sold to Charles A. Hill of Worcester; the mill contained 12 looms, cards, and all machinery necessary for the manufacture of cloth. Mill has been idle since the death of former owner; in July, a new corporation, known as Aldrich Mill Co., formed to manufacture satinet there.

Chelmsford. In January, Success Worsted Co., shoddy, installed number of finishing machines. — George C. Moore's mills started up after shutdown of few days owing to dull trade. *April.* Chelmsford Foundry Co. closed for a short time on account of low water; new office fitted up by the company. — George C. Moore's mills resumed work after shutdown of three days. — Buildings of George C. Moore, Silver & Gay Co., machines, North Chelmsford Mill Supply Co., and the Lowell Model Co. damaged by fire.

Cheshire. In January, Farnum Bros. lime works purchased by New York syndicate with capital of \$500,000, for the manufacture of lime and Portland cement. Half a hundred new houses for workmen to be erected and extensive additions made to the plant. *July.* Lightning struck powder house in quarry of Cheshire Lime Manufacturing Co. and caused explosion. — Plant of Cheshire Glass Manufacturing Co., except the office, destroyed by fire; buildings were vacant owing to lack of business; property owned by a company of which E. V. Wood is president.

Chester. In February, International Emery & Corundum Co. started up tannery mill which had been closed since December. — The Bows Granite Co. reorganized to open quarries on the Chester & Becket railroad. *March.* The International Emery & Corundum Co. No. 2 mill shut down for a short time owing to accident to engine.

CHICOPEE. In January, fire damaged plant and machinery of Olmstead & Tuttle, cotton waste. — Chicopee Manufacturing Co., cotton goods, added new machinery in card room. — D. J. Curtis & Son, bricks, added manufacture of vitrified brick to product; three men were employed on new kiln. — J. Stevens Arms & Tool Co. moved office to buildings formerly occupied by the Overman Co.

February. Chicopee Manufacturing Co., cotton, stopped night work in card room owing to low water. — Cotton waste warehouse of the S. Blaisdell Jr. Co. totally destroyed by fire. — Belcher & Taylor Agricultural Tool Co. received order through New York firm for a feed cutter to be shipped to Manila, P. I.

March. Dwight Manufacturing Co., cotton goods, added several hundred draper looms, one 550 horse-power engine, and a boiler. — Work begun on new factory for Chicopee Manufacturing Co., to be used for spooling, warping, picking, and napping departments. — Heavy rains caused flood in basement of factories of Stevens Arms & Tool Co. on

Broadway.—Dwight Manufacturing Co. shut down rooms No. 1 and 2 owing to accident to shaft between No. 3 and 4 card rooms.

April. Overman Automobile Co., bicycles, leased 20,000 feet of floor space in Ames Building and began installation of new machinery.—Dwight Manufacturing Co. shut down No. 5 mill for a day on account of accident to shaft.

May. Fire destroyed valuable bolt machine of the Springfield Facing Co.'s mill; property is owned by L. S. Brown.—Dwight Manufacturing Co. set up 600 automatic looms and claim that 20 looms can be operated by one man.—American Bicycle Co. closed the Lamb shop indefinitely.—Chicopee Manufacturing Co. shut down portion of machinery in the cotton mills, owing to poor market; present force divided into two parts, and employed on alternate weeks.—The ponds of the Hampden Bleachery were totally drawn off for the first time in 33 years; a leak was found in the flume and a coffer dam built to repair it; the dam proved too weak for the pressure and burst.

June. S. Blaisdell Jr. Co. occupied new quarters built to replace waste house burned; new machinery installed, and thermostat automatic sprinkling system added.—Chicopee Manufacturing Co. started 150 new looms.

July. Overman Automobile Co., bicycles, laid off 25 tool makers and about 12 machinists because their branch of the work was far ahead of others.—Pump used in one of the case-hardening machines at the river plant of J. Stevens Arms & Tool Co. broke, causing shutdown for part of a day.—Night force of Overman Automobile Co., bicycles, discontinued and men went on day work.—Chicopee Manufacturing Co. started up nearly all machinery on full time.—Dwight Manufacturing Co. started mills after shutdown of about a week.—The J. Stevens Arms & Tool Co. shut down for half day owing to break in main belt at river plant.—Chicopee Manufacturing Co. shut down for part of a day owing to breaking of main belt in No. 2 mill.

Clinton. In January, new corporation, known as The Clinton Braid Co., with capital of \$7,500, succeeded to business of Clinton Binding Co. **February.** Clinton Worsted Co. began work on double shifts in spinning and carding departments in order to keep up with rest of mill. **March.** Sterling Worsted Co. shut down for two days owing to slack work.—Spinning department of Mill No. 3 of Bigelow Carpet Co. shut down for an indefinite time; curtailment necessary because of over-production. **April.** Bigelow Carpet Co. built addition to boiler house on Union Street and added 2 new boilers; excavation begun for foundation of addition to dyehouse. **May.** Sterling Worsted Co. shut down for few weeks. **July.** Lancaster Mills shut down for two days; in August, installed new combers and lap machines.

Concord. In January, Edward C. Damon died, aged 68 years; in 1854, he began business in the woollen mill, in 1861 went into partnership with his brother, and in 1835 became president of the Damon Manufacturing Co.; firm discontinued in 1892. **April.** George A. Conant died, aged 43 years; he first discovered the method of coating brown paper with blaine, which he patented.

Conway. In January, Darby & Moore, clothing, succeeded by George M. Darby.—Tucker & Cook Manufacturing Co., cotton yarn and thread, added electric lighting plant to No. 1 mill; generator is turned by water wheel; in July, the company's upper mill struck by lightning.

Dalton. In January, Byron Weston Co., paper, began foundation for dust house, wooden structure, 11½ by 17 feet and 24 feet high. **March.** Byron Weston Co. placed Westinghouse electric dynamo of 340 lights in Centennial mill. **July.** Paper works of Z. & W. M. Crane shut down for one week.—Centennial mill of Byron Weston Co. shut down for one week, and Defiance mill for two weeks; two new heaters were added to Defiance mill and slanting roof changed to flat roof.—Berkshire mills shut down two weeks for repairs.

Dana. In August, Cooley & Vaughn started up sawmill after shutdown of one month.

Danvers. In January, Eaton & Armitage, shoes, occupied new quarters and began shipments.—C. C. Farwell & Co., shoes, occupied shop formerly used by Eaton & Armitage.—Donovan, Shea, & Newhall, boots and shoes, shut down for stock taking.—Donovan & Shea, boots and shoes, succeeded by D. F. Donovan & Co. **February.** Fire destroyed small wooden building in rear of Downing, Perkins, & Co.'s shoe factory, used as a laboratory.—Colcord & Walcott, heels, succeeded by N. T. Walcott. **March.** Factory of American Hide & Leather Co. shut down for day and a half owing to flooding of

boilers by rising of Crane river. *April*. Charles P. Kerans, leather manufacturer, began erection of new tannery at plant; tanning heretofore done out of town.

Dedham. In January, Cochran Manufacturing Co., carpetings, began erection of new brick addition to plant, to be 400 x 80 feet, 3 stories. *August*. Merchants Woollen Co. fitted up works for yarn dyeing and installed winding machinery. *September*. George A. Nickerson, president of Arlington Mills, died, aged 47 years. — Merchants Woollen Co. installed 50 new looms.

Deerfield. In August, Arms Manufacturing Co., leather goods, erected addition to factory.

Dighton. In March, L. Lincoln & Co., paper and paper goods, added machinery to make cone paper for cotton mills. *April*. Dighton canning factory, lot, buildings with engine, and personal property, sold at auction; factory was built in 1888 by building association. *June*. Land and building known as Mount Hope property purchased for new industry of dyeing cloth; addition for drying shed, 100 feet long, to be erected; corporation formed under name of Mount Hope Finishing Co., with capital of \$125,000. *August*. L. Lincoln & Co. shut down paper mill for repairs.

Douglas. In January, American Axe & Tool Co. shut down bit shop for a week; in August, began removal of plant to Glassport, Pa.

Dracut. In January, entire weaving department of Beaver Brook mills, woollen goods, shut down for three days.

Dudley. In April, Stevens Linen Works began erection of annex to storehouses, 100 x 52 feet. *July*. Josiah Perry mills, woollen goods, shut down for two weeks.

Easthampton. In May, brick yard of Martin Rich estate purchased by Bartley F. Coyle & Son, contracting masons, and business carried on by new firm. *August*. Nashawannuck Manufacturing Co., clothing, Glendale Elastic Fabrics Co., and Williston & Knight Co., buttons and dress trimmings, shut down owing to accident to boilers. — Easthampton Rubber Thread Co. built addition of 50 feet, 2 stories with basement, at east end of mill. *September*. Several manufacturing concerns joined in scheme to install underwriters' fire pump with capacity of 1,000 gallons a minute.

Enfield. In April, Woods & Ward shut down box shop for few days to make repairs; new smoke stack 50 feet high and 28 inches diameter erected; in July, shop shut down for a week to make repairs on machines; in August, shut down two days for boiler inspection. — Enfield Manufacturing Co., woollen goods, shut down for 10 days.

Erving. In June, Millers Falls Co., artisans' tools, began brick addition to shop, 230 feet long, 2 stories high for 147 feet, remainder one story; forge and shipping rooms downstairs. *August*. Washburn & Heywood Chair Co. started up after week's vacation.

EVERETT. In January, New England Bolt & Nut Co. began excavation for erection of building 125 x 175 feet. — Hampden Cream Co. purchased factory property formerly occupied by Degno Bros. *February*. United States Steel Co. organized with capital stock of \$3,000,000 to manufacture Jupiter steel. *July*. Fire damaged main building and machinery of New England Structural Co., metals and metallic goods. — James Donovan & Co. established to manufacture shoes and slippers.

Fairhaven. In June, Atlas Tack Co. began erection of new mill to be 620 x 220 feet, one story, with saw-toothed roof to give best possible light; front to be two stories for the offices; power house and chimney with 7 foot flue and 180 feet high will be built; engines will be of 1,000 horse power.

FALL RIVER. In January, Sagamore Manufacturing Co., cotton goods, shut down for one day owing to defective shaft; later, shut down for a day because of injury to other machinery. — U. S. Bobbin & Shuttle Co. began erection of addition to boiler and engine house, 64 x 10 feet. — New machinery added by Pocasset Manufacturing Co., Union Cotton Manufacturing Co., Stafford Mills, Parker Mills, and King Philip Mills. — Stafford Mills installed new electric lighting plant, furnishing about 2,000 lights of 16-candle power. — Sagamore Manufacturing Co. started up No. 2 mill after 3 days' shutdown. — Stockholders of Mechanics Foundry & Machine Co. voted to increase capital stock from \$8,000 to \$10,000, in order to provide funds to cover cost of removal of plant in case change in grade of railroad makes removal necessary. — Joseph Healy, agent and treasurer of

Osborn Mills, died, aged 73 years; he began career as cotton manufacturer in 1871, when he became connected with the Osborn Mills. — Pocasset Manufacturing Co. shut down for few days on account of injury to main driving pulley in belt tower. — Globe Yarn Mills No. 2 shut down mule room owing to surplus of yarn. — Carding department of King Philip Mill No. 1 and weave room of Troy Cotton & Woollen Manufactory damaged by fire.

February. Frank W. Brightman, treasurer of Stafford Mills, cotton goods, died, aged 50 years; he was at one time in the trading business in the Azores Islands. — Owing to surplus of yarn, the New England Cotton Yarn Co. closed mule spinning departments of Globe Yarn Mill No. 2, and Bennett Spinning Co., New Bedford. — Mechanics Mills erected large number of revolving flat cards. — Mechanics Foundry & Machine Co. purchased land for erection of new foundry. — No. 2 mill of Fall River Iron Works Co. started up after shutdown of several weeks because of accident to engine.

March. Pocasset Manufacturing Co. installed complete electric light plant. — Granite Mills installed 50 new Crompton looms. — Durfee Mills installed new machinery. — The following mills closed from one week to 10 days to curtail production: Chace, Robeson, Merchants, American Linen, Metacommet, Laurel Lake, Davol, Durfee, Richard Borden, Shove, Stafford, Troy, Wampanoag, Granite No. 2, Cornell, Union Cotton Manufacturing Co., Barnard, Flint, Osborn No. 1, Sagamore, Slade, Weetamoe, and Fall River Manufactory.

April. Crystal Spring Bleaching & Dyeing Co. increased capital stock to \$125,000; this move was preceded by a reduction from \$100,000 to \$50,000. — Globe Yarn Mills No. 3 installed 22 Mason cards and 8 speeders. — Arkwright Mills, cotton goods, installed 10 new cards and 4 drawing frames. — Granite Mills added 41 revolving top flat cards for work on long staple cotton. — American Linen Co. put new creels on 250 of their spinning frames. — Two small pulleys broke in weave room of Merchants Manufacturing Co. No. 1 mill, causing shutdown of few hours. — The following mills shut down for one week or less as part of curtailment agreement: Chace, Durfee, Laurel Lake, Robeson, Seaconnet, Stafford, Wampanoag, Mechanics, Tecumseh, Pocasset Manufacturing Co., American Linen, Fall River Manufactory, Flint, Osborn, Troy, Sagamore No. 1, Weetamoe, Union mills Nos. 2 and 4, Cornell, Granite No. 2, Shove, Slade, Barnard, Merchants, Davol, Metacommet, Richard Borden, and Narragansett.

May. American Printing Co. began run of five days a week. — Granite Mills No. 2 shut down for several days owing to accident to engine. — New machinery installed in the Granite, Mechanics, and Sagamore mills. — Accident to pulley in mule room of American Linen Co.'s mill caused shut down of whole plant for nearly two weeks to make repairs. — Algonquin Printing Co. began run of five days a week instead of shutting down. — Barnaby Manufacturing Co. received several carloads of new machinery. — The following mills shut down from one to two weeks, as part of curtailment agreement: Narragansett, Mechanics, Merchants Manufacturing Co., Union, Border City, Fall River Manufactory, Shove, Davol, Richard Borden, Tecumseh, Weetamoe, Osborn, Sagamore, Granite, Barnard, and Seaconnet.

June. As result of conference between representatives of the breweries and Brewery Workmen's union, 9 hours was agreed on as a day's work in 3 local breweries. — Fall River Machine Co.'s storehouse damaged by fire. — Owing to overheating of shafting and pulleys, 4 warps in operation on looms in Narragansett mill weave room were damaged by fire. — Accident to pumps at Seaconnet Mill caused shutdown of new weave shed for one day. — Parts of plant of King Philip Mills shut down owing to damage to boilers. — Merino mill owned by Joseph Healy estate sold to James M. Morton, Jr. for \$11,500. — Sagamore Mill No. 2 shut down owing to defective pump. — Following mills shut down for one or more weeks: Stafford, Flint, American Linen, Merchants, Wampanoag, Weetamoe, Slade, Sagamore, and Laurel Lake. — Shove Mill No. 2 shut down for a few days owing to accident to shafting. — Albee-Russell Co., shoes, reduced capital to \$13,500.

July. Flint mill shut down for two weeks as part of curtailment agreement, and installed 3 Babcock & Wilcox water and tube boilers to replace 9 upright Manning type boilers. — Fire caused slight damage at the Mechanics Foundry and Machine Co. — Osborn mill No. 2 installed 16 new revolving top flat Whitton cards, 20 combers, and complete set of opening machinery, preparatory to making finer grades of product. No. 1 mill added 41 new cards. — Pocasset Manufacturing Co. installed new railway drawing frames, also new American Machine Co. cards to replace old top flat cards. — Following mills shut down to complete curtailment agreement: Sagamore Mill No. 1, Union Manufacturing Co., Fall River Manufactory, American Linen, Cornell, Merchants, Narragansett, Stafford, Wampanoag, Arkwright, and Flint.

September. Fred W. Harley erected 2-story wooden building, 60 x 40 feet, for silk weaving plant. — Fall River Manufactory started up after shutdown of seven weeks; 500 wide looms set up in place of looms of ordinary width. — Shove Mill No. 2 shut down for few days owing to damage by fire. — American Printing Co. awarded contracts for 3½-story brick addition for dyehouse, to cost \$50,000. — Stevens Manufacturing Co. awarded contract for 2-story spinning mill, 144 x 278 feet, weave shed 100 x 225 feet, storehouse 100 x 60 feet, store shed 80 x 50 feet, and addition to boiler and engine house.

FITCHBURG. In April, American Woollen Co. installed 78 new looms in worsted mill. *May.* American Comb Co., shell and horn goods, moved machinery and plant from Leominster.

September. Iver Johnson Arms & Cycle Co. started up after shutdown for alterations. — Star Worsted Co. built 2 additions to mills.

Framingham. In January, Gregory, Shaw, & Co., shoes, succeeded by new corporation of Gregory-Shaw Co.; authorized capital \$250,000. *February.* Saxonville Mill installed new machinery for manufacture of fine worsted goods. *September.* Gregory-Shaw Co., shoe manufacturers, succeeded by F. Brigham & Gregory Co.; firm originally organized nearly 60 years ago and came to Framingham in 1883.

Franklin. In January, Ray Fabric Co., textiles, erected new building and installed considerable new machinery. *March.* Shoestring company began brisk business but were unable to get good female help although offering good wages and clean, easy work. — Storehouse of the American Felt Co., woollen goods, damaged by fire; to be rebuilt. *July.* Dunbar Wood Heel Co. incorporated under Massachusetts laws; authorized capital \$5,000. *August.* William M. Brown leased shoddy mill owned by Enoch Walte to manufacture woollen blankets.

Freetown. In July, Crystal Spring Bleaching & Dyeing Co. installed 8 new boilers.

Gardner. In January, Lucien G. Dockham, proprietor of Otter River mills, woollen goods, died, aged 65 years. — Chair factory of Alfred Wyman sold at auction to Charles W. Conant. *September.* Fire damaged building owned by A. N. Pineo and occupied by him for carriage manufactory, also by Jackson & Parcher, toys, and Kendall & Nichols, crutch makers.

Georgetown. In April, factory of A. B. Noyes & Co., shoes, shut down part of a week during which boilers were inspected. *June.* Georgetown Boot & Shoe Co. resumed work after shutdown of a week for stock taking.

GLOUCESTER. In January, George A. Reed & Son, metal workers, erected addition to brass foundry, 47 x 73 feet; also large crane capable of lifting 5 tons, and additional sheds for other machinery. *June.* The Merchant Box & Cooperage Co. erected 2-story addition, 60 x 170 feet.

Grafton. In January, Edward Story's paper box factory shut down for a week owing to break in power rope.

Granby. In June, Frederick Taylor, paper manufacturer, died, aged 85 years; he began business in the firm of Brown & Taylor, occupying a mill in the north part of the town which was burned about 50 years ago; later, he was a member of a stock company which manufactured paper in South Hadley, and retired from business about 1885, when the mill was burned.

Granville. In July, Noble & Cooley closed drum factory for 2 weeks' annual summer vacation.

Great Barrington. In January, Monument Mills, cotton goods, added 200 horse-power motor. *March.* Business of C. R. Brewer Lumber Company closed. *April.* Ashley Falls Marble Co. erected new mill, 50 x 135 feet, one story. — Riverdale Mills, cotton goods, shut down 4 days for repairs; this is first shutdown in 7 years. *June.* Goran Borg, of Canaan, Conn., leased woodworking department of C. R. Brewer's lumber mill. *August.* Sheridan Woollen Mills shut down.

Greenfield. In February, William G. Rogers Co. organized to manufacture silver plated flat ware, and purchased plant of Nichols Bros. which had been idle 2 years. — Wiley & Russell Manufacturing Co., machines and machinery, erected addition to plant.

March. E. C. Hartwell & Co., wooden goods, added new machinery and steam heating to factory, and increased number of workmen. *September.* Cutler, Lyons, & Field, shoes, offered plant for sale. — Wells Bros. & Co., artisans' tools, incorporated as Wells Bros. Co.

Groveland. In February, Groveland Mill No. 1, woollen goods, shut down for a week owing to break in main shaft. *May.* Groveland Mill No. 3 shut down for part of a day owing to accident to engine.

Hardwick. In May, George H. Gilbert Manufacturing Co., woollen goods, enlarged boiler room at No. 4 mill and set up 4 new boilers; in June, installed new machinery; in August, set up new worsted spinning frames.

Hatfield. In February, Porter Machine Works enlarged plant and built addition 14 feet wide on south side.

HAVERHILL. In January, C. W. Tappan Shoe Co. went out of business; no successor. — Orra I. Foster, slippers, sold business to R. J. Tasker & Co., who sold to Daniel Green Felt Shoe Co., of New York, and business moved there. — Henry C. Pluff began manufacture of cuffs and collars. — Improved Gasolene Motor & Automobile Co. organized, to develop air-cooled gasolene engines. — Chas. W. Arnold & Co., cut soles, incorporated; authorized capital \$50,000. — R. G. Allen & Co. began manufacture of counters. — Henry Harris, shoes, who has been doing contract work, began manufacturing for himself. — Factory of Chesley & Rugg, shoes, shut down owing to break in shafting. — Heavy machinery of International Paper Co. shipped to Berlin Falls, N. H. — Firm of Collins & Lord formed to manufacture shoe dressings. — Stocker & Taska began manufacture of boots and shoes. — E. A. Jennings made improvements in shoe factory and increased number of workmen. — J. H. Durgin & Son, shoes, shut down factory for a day and a half owing to accident to motor. — Elmer Murray, shoes, moved from 32 Washington Street to No. 24.

February. M. T. Stevens & Sons Co., woollens, shut down two days to install new boiler. — Haverhill Pickle works incorporated with capital stock of \$10,000, to manufacture pickles, relishes, salads, etc. — Chick Bros., shoes, put on 12 cutters in men's department. — John M. Madigan began manufacture of a washing fluid, known as B. & M. mixture. — Chesley & Rugg shut down entire plant for few days owing to break in heating apparatus. — H. B. Goodrich, shoes, shut down plant owing to lack of heat caused by break in boiler. — M. C. Cram sold machinery of Tappan Shoe Co. and filled orders of company at his own factory. — Henry L. Harris, shoes, formerly doing business as L. M. Harris, discharged from bankruptcy and started again. — E. F. Lang, shoes, admitted John D. Crimmin to partnership and name changed to E. F. Lang & Co.; Mr. Crimmin retired in April.

Marble, retired woollen manufacturer, died, aged 99 years. — Worcester Corset Co. incorporated; authorized capital \$400,000. — Gleaner Brush Co. purchased factory of Louis Bourneuf & Co. in Swampscott and moved business to Worcester. — Samuel Ayres, wire goods manufacturer, died, aged 82 years; he began weaving wire in 1845, starting the business now carried on by the National Wire Goods Co.; he retired about 12 years ago.

February. Queensbury Mills Co., woollen goods, incorporated; authorized capital \$100,000. — Locomobile Company of America shipped machinery to factory at Bridgeport, Ct. — William H. Burns Co., clothing, increased capital stock from \$150,000 to \$250,000. — Natural Food Co., successors to Shredded Wheat Co., built new factory at Niagara Falls, and advertising department removed from Worcester. — Morgan Spring Co. bought all staple and tack machines used by Washburn & Moen department of American Steel & Wire Co., and moved them to plant at Barber's crossing.

March. Walter B. Clark purchased machinery and stock of Parisian Wrapper Manufacturing Co. — Bent & Evans began manufacturing boots and shoes in part of Walker

& Brown's factory. — Charles C. Houghton, shoe manufacturer, died; he began manufacturing in 1858, and retired in 1893. — Worcester Novelty Co. began manufacturing wire goods and novelties. — United States Mobile & Power Co. established in plant formerly occupied by Warren Manufacturing Co.; building is of brick, 4 stories, and contains 8,000 square feet. — Wachusett Mills Corporation increased capital stock from \$15,000 to \$50,000; company purchased Sargent building, erected in 1866, and remodeled it for manufacturing fancy cotton goods. — Peter Wood Dyeing Co. built large addition to dyehouse. — Stock of Claflin Dental Co. sold to W. H. DeLon.

April. Parisian Wrapper Manufacturing Co. incorporated with capital of \$25,000. — United States Steel Co. started up plant at South Worcester. — Litchfield Cushion Heel Co. incorporated; authorized capital \$100,000. — Star Hammock Co. began manufacturing. — Worcester Manufacturing Co., incorporated, bought patent rights of the Burnham shutter worker; capital stock \$180,000. — Solomon Kunitz, formerly of the Parisian Wrapper Manufacturing Co., organized new company to manufacture similar line of goods.

June. Plant and business of Worcester Carpet Co. purchased by M. J. Whitall. — Parker Wire Goods Co. incorporated under Massachusetts laws; authorized capital \$10,000; to manufacture wire goods specialties. — Witherby, Rugg, & Richardson, woodworking machinery, succeeded by Witherby, Rugg, & Richardson Company. — Browning & Elliott bought business of H. W. Beach and began manufacturing heels. — Fire damaged building occupied by John J. Griffin, manufacturer of mattresses. — Thomas C. Orundoff succeeded by Anson Mills Woven Belt Cartridge Co.

July. Fire destroyed ice houses of Walker Ice Co. — Charles J. Goessman erected factory for manufacture of patented waterproof paper. — Fire damaged factory of Hatch & Barnes, builders' finish. — Loring Coes & Co. awarded contract for new wrench factory, 100 x 180 feet, 8 stories, brick, to cost about \$25,000.

August. Crompton & Knowles shut down loom works for annual 10 days' vacation. — Star Foundry shut down for 10 days. — W. E. Oakley & Son, brass founders, sold to Kindred & Taylor.

September. Plant of Worcester Carpet Co. formally transferred to Mathew J. Whitall, who purchased property in June, and will continue to manufacture the same line of goods.

THE STATE. As in past years, the preceding Chronology has been prepared from information supplied by manufacturers, and from other sources. It includes the more important events affecting the conduct of industrial enterprises of the Commonwealth. In the following summary will be found a statement of the principal industrial events, arranged by subjects and industries. The proper method of reading the table is as follows: During the nine months ending September 30, 1901, there were 109 instances of new firms or industries established in the several cities or towns; of these, 87 were established to manufacture boots and shoes; 3, carriages and wagons; 5, leather; 7, machines and machinery; 9, metals and metallic goods, etc. There were 78 new buildings constructed during the nine months; 4 for firms manufacturing artisans' tools; 10 for firms or corporations making boots and shoes; 7, cotton goods; 10, machines and machinery, etc. Other lines may be read in a similar manner.

Corporations and Capital Stock.

In the following table, the number of new corporations formed during the first nine months of the year 1901 is shown, together with the amount of capital authorized by their charters; also, increases and decreases in capital stock, classified by industries. These figures include the private firms which, in 1901, changed from the individual form to the corporate form of management.

SUBJECTS AND INDUSTRIES.	Number	Amounts
New Corporations.	44	\$8,018,800
Artisans' tools,	1	75,000
Boots and shoes,	12	1,080,000
Carriages and wagons,	2	260,000
Chemical preparations (compounded),	1	1,000
Clothing,	2	425,000
Cotton goods,	2	615,000
Electrical apparatus and appliances,	1	20,000
Food preparations,	3	40,100
Furniture,	1	50,000
Hosiery and knit goods,	1	20,000
Machines and machinery,	6	3,555,000
Metals and metallic goods,	2	20,000
Musical instruments and materials,	2	550,000
Paper,	1	660,000
Print works, dye works, and bleacheries,	1	125,000
Stone,	1	200,000

Corporations and Capital Stock — Concluded.

SUBJECTS AND INDUSTRIES.	Number	Amounts
New Corporations — Con.		
Whips, lashes, and stocks,	1	\$30,000
Woollen goods,	4	352,500
Increases in Capital Stock.		
	11	\$1,697,000
Clothing,	1	100,000
Cotton goods,	4	610,000
Electrical apparatus and appliances,	1	250,000
Glass,	1	10,000
Metals and metallic goods,	1	2,000
Print works, dye works, and bleacheries,	1	75,000
Rubber and elastic goods,	1	250,000
Shipbuilding,	1	400,000
Decreases in Capital Stock.		
	3	\$104,500
Boots and shoes,	2	54,500
Print works, dye works, and bleacheries,	1	50,000

RECAPITULATION. 1900, 1901.

In the following table, we bring forward the subjects shown in the two preceding presentations in comparison with similar data contained in the Chronology for 1900:

CLASSIFICATION OF SUBJECTS.	NUMBER OF ESTABLISHMENTS, ETC.	
	1900 (12 months)	1901 (9 months)
New establishments, etc.,	156	109
Buildings constructed during the year,	119	78
Machinery added to plants,	146	112
Other additions to plants,	136	63
Addition of new class of product to manufacture,	20	9
Rebuilding of burned factories, etc.,	15	7
Removals to new or larger quarters,	46	21
Resumption of business after protracted shutdowns,	5	8
Increased capacity of plants,	31	33
Changes from private firms to corporations,	23	15
Changes in firms, firm names, etc.,	77	39
Changes in character of product,	5	-
Changes in character of machinery,	11	7
Consolidations of firms and corporations,	6	4
Removals of firms and industries to Massachusetts from other States,	-	2
Removals of firms and industries from Massachusetts to other States,	15	9
Removals from one town to another in Massachusetts,	19	11
Introduction of electric lighting and power into factories, etc.,	9	9
Suspensions for vacations,	81	43
Suspensions for stock taking,	50	19
Suspensions on account of low water,	15	4

Recapitulation. 1900, 1901 — Concluded.

CLASSIFICATION OF SUBJECTS.	NUMBER OF ESTABLISHMENTS, ETC.	
	1900 (12 months)	1901 (9 months)
Suspensions on account of high water,	65	40
Suspensions on account of repairs and improvements,	80	40
Suspensions on account of shortage of materials,	5	4
Suspensions for curtailment of production,	70	104
Suspensions on account of accidents to machinery, etc.,	78	87
Suspensions on account of dull trade,	27	18
Suspensions (temporary as to duration),	111	54
Suspensions (indefinite as to duration),	17	17
Suspensions (cause not given),	59	8
Suspensions on account of retirement from business (no successor),	62	13
Sales of plants in whole or in part,	72	66
Sales of plants to industrial combinations,	55	8
Plants damaged by explosions,	6	-
Fires during the year,	185	108
Deaths of manufacturers,	120	53
New corporations,	48	44
Amount of authorized capital,	\$10,535,500	\$8,018,600
Increases in capital stock,	12	11
Amount of increase,	\$1,938,000	\$1,697,000
Decreases in capital stock,	2	3
Amount of decrease,	\$750,000	\$104,500
Net increase of capital stock,	\$1,188,000	\$1,592,500

STOCK PRICE QUOTATIONS.

In the following table are shown the highest and lowest price quotations for the 12 calendar months of 1900 and the first nine months of 1901, together with the amount of capital stock outstanding on January 1, 1901, and the par value of stock. The majority of the figures were compiled by Frank A. Ruggles of Boston.

NAMES OF COMPANIES.	Capital Stock, Jan. 1, 1901	Par Value of Stock	STOCK PRICE QUOTATIONS			
			1900 (12 months)		1901 (9 months)

INDUSTRIAL DIVIDENDS.

In the following table, we reproduce, as a matter of record, the dividends paid in certain manufacturing corporations doing business in this Commonwealth, as compiled by Frank A. Ruggles of Boston. The figures for 1900 represent a full year, those for 1901, nine months.

NAMES OF COMPANIES.	RATE OF DIVIDENDS	
	1900 (12 months)	1901 (9 months)
Appleton Co.,	7	4
Arlington Mills,	6	6
Atlantic Mills,	4	2
Bigelow Carpet Co.,	1½	5
Boott Cotton Mills,	6	0
Boston Belting Co.,	8	8
Boston Duck Co.,	10	10
Boston Manufacturing Co.,	-	0
Chicopee Manufacturing Co.,	6	3
Dwight Manufacturing Co.,	12	12
Everett Mills,	6	6
Hamilton Manufacturing Co.,	6	3
Hamilton Woollen Co.,	4	4½
Lancaster Mills,	8	0
Lawrence Manufacturing Co.,	8	*3
Lowell Bleachery,	4	0
Lowell Machine Shops,	10	5
Lyman Mills,	4	4

* Also, \$66.67 extra dividend, occasioned by increase in capital stock.

Industrial Dividends — Concluded.

NAMES OF COMPANIES.	RATE OF DIVIDENDS	
	1900 (12 months)	1901 (9 months)
Massachusetts Cotton Mills,	6	6
Merrimac Manufacturing Co.,	*6	3
Middlesex Co.,	6	3
Naumkeag Steam Cotton Co.,	4	2
Otis Mills,	10	10
Pacific Mills,	†30	5
Thorndike Co.,	8	8
Tremont & Suffolk Mills,	8	4
Wamsutta Mills,	6	4½

* Increased capital stock from \$2,500,000 to \$2,750,000 in July, and reduced par value of stock from \$1,000 to \$100—10 shares for one.

† Increased capital stock from \$2,500,000 to \$3,000,000 in March, and at same time paid extra cash dividend of 20 per cent which just covered the increase.

PART II.

STATISTICS OF MANUFACTURES.

1900, 1901.

[39]

PART II.

STATISTICS OF MANUFACTURES. 1900, 1901.

Introduction.

This Part contains the sixteenth report of the Annual Statistics of Manufactures, issued in accordance with the provisions of Chapter 107 of the Revised Laws of Massachusetts.

The statistical presentations have been prepared from the returns made by 4,696 identical establishments covering each of the years 1900 and 1901, and are arranged under five section heads, as follows :

I. *Establishments and their Management.* Under this head are exhibited the data relating to the management of 4,696 establishments, showing the number of establishments controlled by private firms, corporations, and industrial combinations, together with the number of partners and stockholders interested therein separated as to males, females, estates, banks, trustees, etc.

II. *Investment, Materials Used, and Product.* This section covers the amount of capital devoted to production, the cost value of stock and materials used, and the selling value of the goods made and work done.

III. *Labor and its Compensation.* Under this section head are presented the average number of males and females employed ; the smallest, greatest, and average number of persons employed of both sexes ; the range of employment and unemployment, as shown by the excess of greatest number over smallest number of persons employed ; the number of persons employed, both sexes, by months, with percentages of employment and unemployment for the nine leading industries ; the total amount paid in wages during each of the years 1900 and 1901 together with the average yearly earnings per individual, without distinction as to sex or age ; and the classified weekly

wages paid to adult males and females and to young persons under 21 years of age, for the nine leading industries.

IV. *Working Time and Proportion of Business Done.* Under this head are shown the average number of days in operation based upon the average number of persons employed, and the proportion of the business done each year in each establishment; on an average, based upon a maximum production of 100 per cent.

V. *General Summary of Industrial Conditions.* This section is devoted to a general *résumé* of the conditions of the industries of the Commonwealth as indicated by the returns made from 4,696 identical establishments in 1900 and 1901.

Each of the above sections is followed by a complete analysis of the tabular presentations which should be carefully read in order to understand the character and value of the returns.

The term "All Industries," used in these reports for aggregates, refers only to the numerical totals of the various columns and *not* to the total investment, production, persons employed, wages paid, etc. of *all* establishments engaged in the manufacturing and mechanical industries of the State. Such totals are presented only in the Decennial Census reports once in ten years. Wherever, therefore, All Industries are mentioned in this Part, it is understood that the 80 classified industries shown in the table on pages 44 and 45 are referred to; and wherever numerical aggregates are presented for All Industries or for any single industry, whether for capital devoted to production, stock used, goods made, persons employed, wages paid, etc., only such aggregates are intended as are derived from the 4,696 establishments each of which made returns for the years 1900 and 1901, and for which it is, therefore, possible to make comparisons, unless some other meaning is distinctly stated in the text.

Establishments and Their Management.

The word "Establishment," as used in this Report, should be understood as meaning the factory, mill, or shop from which a report has been secured, and not the firm or corporation controlling said factory, mill, or shop.

Below we present the number of establishments compared in each year since the first publication of these annual reports.

YEARS.	Establishments	YEARS.	Establishments	YEARS.	Establishments
1886, 1887, . . .	1,027	1892,	4,473	1897,	4,696
1888,	1,140	1893,	4,397	1898,	4,701
1889,	1,364	1894,	4,093	1899,	4,740
1890,	3,041	1895,	3,629	1900,	4,645
1891,	3,745	1896,	4,609	1901,	4,696

The presentations covering the data relating to the establishments and their management are arranged as follows :

1. The total number of establishments considered ; the number of establishments controlled by private firms, corporations, and industrial combinations, respectively ; and the number of such private firms, corporations, and industrial combinations for each of the years 1900 and 1901.

2. The number of male and female partners, the number of special partners, and the number of estates engaged in carrying on the private firms.

3. The number of males and females, and the number of banks, trustees, etc., interested in the management of the corporations as stockholders.

Attention is called to the head-notes on pages 44 and 46, in which it is stated that certain unavoidable duplications occur in the columns devoted to private firms, corporations, and industrial combinations ; and to the head-notes on pages 52 and 54, in which the omission of stockholders for industrial combinations is explained.

PRIVATE FIRMS, CORPORATIONS, ETC.: BY INDUSTRIES.

1901.

[This presentation shows the aggregate number of establishments considered, the number of these establishments which are conducted by private firms; by corporations; and by industrial combinations, together with the actual number of such firms, corporations, and combinations. There are certain duplications in management, caused by the fact that the same firm, corporation, or combination is often engaged in manufacturing in more than one industry. The industries in which they occur have been indicated by an asterisk (*), and the plan adopted in such cases has been to consider each establishment, whether managed in connection with another or not, as a unit, and to credit the entire number of firms, etc., to each industry. The last three columns of the table show the actual number of firms, corporations, and combinations, all duplications having been eliminated except as they occur between the industries, and in making up the total for All Industries these duplications, too, have been omitted; so that the final line in the table shows the exact number of different private firms, corporations, and industrial combinations conducting the specified number of establishments.]

PARTNERS: BY INDUSTRIES.

1900.

[This presentation shows the number of partners comprising the 3,323 private firms engaged in the management of the 3,339 establishments. As explained in the preceding presentation, duplications in partners occur in the industries indicated by an asterisk (*), since the same firm is sometimes engaged in more than one industry, and the plan, as stated, has been to consider each establishment as a unit and to credit thereto the whole number of partners, but in making up the total for All Industries to omit duplications; so that the final line in the table shows the exact number of partners conducting the specified number of private firms.]

PARTNERS: BY INDUSTRIES.

1901.

[This presentation shows the number of partners comprising the 3,392 private firms engaged in the management of the 3,280 establishments. As explained in the preceding presentation, duplications in partners occur in the industries indicated by an asterisk (*), since the same firm is sometimes engaged in more than one industry, and the plan, as stated, has been to consider each establishment as a unit and to credit thereto the whole number of partners, but in making up the total for All Industries to omit duplications; so that the final line in the table shows the exact number of partners conducting the specified number of private firms.]

Analysis.

From the foregoing presentations, it will be seen that in 1900, 3,323 private firms managed 3,339 establishments, and in 1901, 3,262 firms managed 3,280 establishments, a decrease, in 1901, of 61 private firms and 59 establishments.

In 1900, 1,225 corporations controlled 1,277 establishments, and in 1901, 1,272 corporations controlled 1,326 establishments; an increase, in 1901, of 47 in the number of corporations and of 49 in number of establishments.

In 1900, 19 industrial combinations controlled 80 establishments, and in 1901, 20 combinations controlled 90 establishments, an increase of one industrial combination and of 10 establishments in 1901 as compared with 1900.

While there was a decrease of 61 private firms and an increase of but 47 corporations and one industrial combination, with the consequent loss of 13 in the actual number of firms, corporations, and combinations, it should not be understood that this loss means the abandonment of the establishments which were managed by the 13 firms or corporations. It means simply that 13 firms or corporations were, in 1901, absorbed by firms, corporations, or combinations which were already in existence. There was no loss in the number of establishments, 4,696 reporting in both years. The figures indicate, however, the prevailing tendency towards the corporate form of management, and towards concentration, to which attention has been called in preceding issues of these Annual Reports.

Each corporation managed, on an average, 1.04 establishments in 1900 and 1.04 in 1901, and each industrial combination controlled, on an average, 4.21 establishments in 1900 and 4.50 in 1901, while the private firms each controlled, practically, but one establishment in both years.

In the head-notes to the presentations on pages 44 and 46 it is explained that duplications occur so far as the number of firms, corporations, and combinations are concerned, for the reason that one firm, corporation, or combination may carry on two or more establishments in the same or in different towns and industries. It is further explained that the plan adopted in the statistical presentation has been to consider each establishment, whether managed in connection with another or

not, as a unit, and to credit to each industry its own number of firms, corporations, and combinations, but when considering the total for "All Industries," to omit the duplications.

The same is also true in regard to partners and stockholders, as indicated in the head-notes on pages 48, 50, 52, and 54. Upon the last two named pages, attention is called to the fact that the stockholders of certain establishments which are operated by railroad companies, or by industrial combinations, many of which have extensive investments of capital outside this Commonwealth, are not included in the presentations; since to include all the stockholders of a railroad company, or of an industrial combination, in connection with such merely branch establishments incidental only to the main business of the corporation, would have the result of abnormally increasing the aggregate.

In this connection, it should be stated that only the number of firms, corporations, combinations, partners, and stockholders are affected by these duplications and omissions. The returns relative to capital devoted to production, stock used, goods made, persons employed, wages paid, etc., are made separately for each establishment, and in the tabular presentations are credited to the industry to which they properly belong. There are, therefore, no duplications or omissions in the number of establishments.

From the presentations relating to partners and stockholders (pages 48-55), we bring forward in the following table the aggregates for All Industries for the years 1900 and 1901, and show the increase or decrease in the later as compared with the earlier year:

PARTNERS AND STOCKHOLDERS.	NUMBER		INCREASE (+) OR DECREASE (-) IN 1901	
	1900	1901	Number	Percentages
<i>Partners.</i>				
	5,218	5,091	-127	-2.43
Males,	4,951	4,828	-123	-2.48
Females,	168	172	+4	+2.38
Special and estates,	99	91	-8	-8.08
<i>Stockholders.</i>				
	47,410	49,038	+1,628	+3.43
Males,	26,584	27,360	+776	+2.92
Females,	15,602	16,353	+751	+4.81
Banks, trustees, etc.,	5,224	5,325	+101	+1.93

PARTNERS AND STOCKHOLDERS.	NUMBER		INCREASE (+) OR DECREASE (-) IN 1901	
	1900	1901	Number	Percentages
<i>Aggregates.</i>	52,628	54,129	+1,501	+2.85
Males,	31,585	32,188	+603	+2.07
Females,	15,770	16,525	+755	+4.79
Special, banks, etc.,	5,323	5,416	+93	+1.75

The total number of partners shows a decrease of 2.43 per cent in 1901 as compared with 1900. The males decreased 2.48 per cent, the females increased 2.38 per cent, and the special partners and estates decreased 8.08 per cent.

The total number of stockholders shows an increase of 3.43 per cent in 1901 as against 1900. The males increased 2.92 per cent, the females 4.81 per cent, and the banks, trustees, etc., 1.93 per cent.

Comparing the aggregates for 1900 and 1901, an increase of 2.85 per cent appears in the later year. The males increased 2.07 per cent, females 4.79 per cent, and special partners, banks, etc., 1.75 per cent.

Considering the whole number of partners and stockholders, we find that the partners constituted 9.91 per cent and stockholders 90.09 per cent of the aggregate in 1900 and 9.41 per cent and 90.59 per cent, respectively, in 1901. Of the aggregate number of males, 15.70 per cent were in private firms in 1900 and 15 per cent in 1901. Of the females, 98.93 per cent of the aggregate were financially interested in corporations in 1900 and 98.96 per cent in 1901.

The next table exhibits the effect of the change from the private firm to the corporation upon the number of partners and stockholders in the aggregate and in the average:

CLASSIFICATION.	NUMBER	
	1900	1901
Private firms,	3,323	3,263
Partners,	5,218	5,091
Average number of partners to a private firm,	1.57	1.56
Corporations,	1,225	1,272
Stockholders,	47,410	49,038
Average number of stockholders to a corporation,	38.70	38.55

Practically no change appears in the average number of partners to a private firm in 1900 and 1901, the averages being 1.57 and 1.56, respectively. The same is true of the average number of stockholders to a corporation, the average being 38.70 in 1900 and 38.55 in 1901.

Summarizing the facts, we find that in 1901 the returns represent 4,696 establishments classified in 80 industries. These establishments are conducted by 3,262 private firms, 1,272 corporations, and 20 industrial combinations, or, in other words, 71.63 per cent of the establishments are in the hands of private firms, 27.93 per cent are managed by corporations, and 0.44 per cent are controlled by industrial combinations. The private firms constitute 71.63 per cent of the total number of firms, corporations, and combinations, and are managed by 5,091 persons, of whom 94.83 per cent are males, 3.38 per cent are females, and 1.79 per cent are special partners and estates. The corporations are managed by 49,038 persons, of whom 55.79 per cent are males, 33.35 per cent are females, and 10.86 per cent are banks, trustees, etc. The industrial combinations form but 0.44 per cent of the total number of firms, corporations, and combinations. The average number of partners to a private firm is 1.56 and the average number of stockholders to a corporation, 38.55. Of the aggregate partners and stockholders, 59.46 per cent are males, 30.53 per cent are females, and 10.01 per cent are special partners, banks, etc.

Investment, Materials Used, and Product.

On the following pages are shown comparisons of the amount of capital devoted to production, the value of stock and materials used, and the value of goods made and work done in 4,696 identical establishments each making returns for the years 1900 and 1901.

The term "capital devoted to production" includes cash on hand and in bank, the value of land and buildings, when owned, the value of machinery, implements, and tools, when owned, and also the value of stock on hand in a raw state or in process of manufacture at the date of making the return. The last named element is, obviously, susceptible of wide variation from year to year. A small amount of stock on hand or in process of manufacture at the time the report is made would have the effect of showing a less amount devoted to production, and, on the other hand, an investment in materials purchased in a favorable market, the same being on hand at the time of making the return, would increase relatively the amount devoted to production and yet neither would affect the standing of the industry.

The term "stock used" includes all materials used in the establishment, whether entering into the construction of the article, or consumed in the processes necessary to the production of the finished goods. Increase or decrease in value, considered by itself, does not always indicate gain or loss in the *quantity* consumed or a corresponding increase or decrease in the *quantity* of goods made, it may mean simply a rise or fall in *values* and have no appreciable effect on the quantity.

The term "goods made and work done" is sufficiently explicit. The figures represent the gross selling value of the output in the establishments making return in the years 1900 and 1901.

The total number of establishments considered is 4,696 and the number in each industry may be found on pages 44 to 47; they are omitted in the tables which follow, owing to consideration of space.

CAPITAL DEVOTED TO PRODUCTION: BY INDUSTRIES.

1900, 1901.

[In this presentation, the figures given under "Amount of Capital Devoted to Production" represent the returns made by 4,696 identical establishments for the years 1900 and 1901. The number of establishments considered in each industry may be found in the presentation on pages 44 to 47. Comparison is made, as regards the amount of capital devoted to production, between the two years. The relative increase or decrease in 1901 as compared with 1900 is given with its equivalent percentage.]

INDUSTRIES.	AMOUNT OF CAPITAL DEVOTED TO PRODUCTION		INCREASE (+) OR DECREASE (-) IN 1901	
	1900	1901	Amounts	Percentages
Agricultural implements,	\$1,010,121	\$1,077,879	+667,758	+6.71
Arms and ammunition,	2,011,285	2,819,166	+807,881	+40.18

GOODS MADE: BY INDUSTRIES.

1900, 1901.

[In this presentation, the figures given under "Value of Goods Made and Work Done" represent the returns made by 4,696 identical establishments for the years 1900 and 1901. The number of establishments considered in each industry may be found in the presentation on pages 44 to 47. Comparison is made, as regards value of goods made and work done, between the two years. The relative increase or decrease in 1901 as compared with 1900 is given with its equivalent percentage. These percentages, based upon returns from 4,696 typical establishments, may be considered a fair indication of the increase or decrease in value of product in the various industries for *all* the establishments in the State.]

INDUSTRIES.	VALUE OF GOODS MADE AND WORK DONE		INCREASE (+) OR DECREASE (-) IN 1901	
	1900	1901	Amounts	Percent- ages

Analysis.

On pages 61 and 62 is given the amount of capital devoted to production in the 4,696 establishments in each of the years 1900 and 1901. The total amount of capital in 1900 was \$462,101,015, and in 1901, \$478,075,904, an increase in the latter year of \$15,974,889, or 3.46 per cent.

The term "capital" as used in these reports does not mean assets, and the figures as here presented are comparable only with others prepared upon a similar basis. Therefore, unwarranted deductions should not be made as regards increase or decrease in the amount of capital invested, nor should the returns as given in this volume be compared with those published in preceding years without consideration of all the elements involved. The comparisons in these abstracts are made upon the same basis each year, but each volume should be considered by itself.

In our consideration of capital devoted to production, we include the value of land, buildings, machinery, motive power, tools, and implements (if owned), patterns, patent rights, etc., the amount of cash on hand and in bank, and the raw stock and materials on hand or in process of manufacture at the date of making the return. The aggregate amounts given as capital devoted to production in the different industries, therefore, include the actual capital of all forms found in the industry at the time of making report.

Of the nine leading industries, six exhibit increases in capital devoted to production in 1901 as compared with 1900. They are as follows: Boots and Shoes, 6.95 per cent; Leather, 11.63 per cent; Machines and Machinery, 6.04 per cent; Metals and Metallic Goods, 4.09 per cent; Paper, 0.94 per cent; and Worsted Goods, 1.56 per cent.

Three of the nine leading industries show decreases in the amount of capital devoted to production in 1901 as compared with 1900. They are: Carpetings, 1.46 per cent; Cotton Goods, 1.17 per cent; and Woollen Goods, 2.67 per cent.

On pages 63 and 64 is presented a comparison of the value of the stock and materials used in the 4,696 establishments

during each of the years 1900 and 1901. The aggregate value in 1900 was \$471,452,564, and in 1901, \$503,326,395, an increase in the latter year of \$31,873,831, or 6.76 per cent.

Seven of the nine leading industries show percentages of increase in 1901 as against 1900 as follows: Boots and Shoes, 14.03; Cotton Goods, 6.03; Leather, 11.84; Metals and Metallic Goods, 12.78; Paper, 8.21; Woollen Goods, 1.29; and Worsted Goods, 24.14.

Two of the leading industries show decreases in the value of stock and materials used in 1901 as compared with 1900, namely, Carpetings, 12.12 per cent, and Machines and Machinery, 1.89 per cent.

The presentation on pages 65 and 66 exhibits a comparison of the value of goods made and work done in the 4,696 establishments, each of which made returns in 1900 and 1901. The total value of goods made and work done in 1900 was \$825,540,858, and in 1901, \$869,771,876, an increase in the last named year of \$44,231,018, or 5.36 per cent.

Sixty-three of the 80 classified industries show increases in value of goods made and work done in 1901 as against 1900, the range of increase being from 0.23 per cent in Drugs and Medicines to 64.25 per cent in Oils and Illuminating Fluids. The aggregate value of product in the 63 industries showing increase was, in 1900, \$577,680,373, and in 1901, \$631,377,675, a gain of \$53,697,302, or 9.30 per cent.

Seventeen of the 80 classified industries show decreases in value of goods made and work done in 1901 as compared with 1900, the percentages of decrease ranging from 0.12 per cent in Cordage and Twine to 21.85 per cent in Bicycles, Tricycles, etc. The aggregate value of product in the 17 industries showing decrease in 1900 was \$247,860,485, and in 1901, \$238,394,201, a decrease of \$9,466,284, or 3.82 per cent.

The following table presents a comparison of the value of goods made and work done for the nine leading industries :

No. 36.] INVESTMENT — MATERIALS — PRODUCT. 69

INDUSTRIES.	VALUE OF GOODS MADE AND WORK DONE		INCREASE (+) OR DECREASE (-) IN 1901	
	1900	1901	Amounts	Percentages
Boots and shoes (aggregate),	\$125,471,177	\$142,275,334	+ \$16,804,157	+13.39
Factory product,	108,064,112	122,065,562	+14,681,450	+13.54

Leather,	22,355,846	25,896,712	+3,540,866	+15.84
Machines and machinery,	49,280,905	49,136,267	-124,638	-0.25
Metals and metallic goods,	41,011,205	46,753,140	+5,741,935	+14.00
Paper,	21,835,119	24,344,202	+2,509,083	+11.49
Woollen goods (aggregate),	40,865,404	42,594,922	+1,729,518	+4.23
Woven goods and yarn,	38,985,186	40,570,049	+1,584,863	+4.07
Shoddy, waste, etc.,	1,880,218	2,024,873	+144,655	+7.69
Worsted goods,	32,806,027	39,672,642	+6,867,615	+20.93
Nine industries,	466,090,095	495,963,111	+29,873,016	+6.41
Other industries,	359,450,783	373,808,765	+14,358,002	+3.99
All industries,	825,540,858	869,771,876	+44,231,018	+5.36

In 1900, the aggregate value of goods made and work done in the establishments compared in the nine leading industries was \$466,090,095, and in 1901, \$495,963,111, representing 56.46 per cent of the total value of goods made and work done in All Industries in 1900 and 57.02 per cent in 1901. Three of the leading industries, namely, Carpetings, Cotton Goods, and Machines and Machinery, show decreases in 1901 as compared with 1900.

The percentage of increase or decrease in the value of goods made and work done in these 4,696 establishments is typical of corresponding increase or decrease in all the establishments carrying on the entire manufacturing and mechanical industries in the Commonwealth. Although only a comparatively small number of establishments is shown in this annual comparison, the value of goods made in them represents over 80 per cent of the aggregate product value for the State in any year, and any fluctuation in employment or in output shown in these establishments would be reflected in the aggregate for all establishments were a complete canvass taken. Therefore, the per-

centages of increase or decrease shown in the presentation on pages 65 and 66, for each industry, may be taken as indicating the rate of increase or decrease of *all* the establishments in the specified industry.

In the following table, we bring the several industries into classified groups showing the value of goods made and work done in 1900 and 1901 and the percentages of increase or decrease in the later over the earlier year :

Manufactures : By Classified Industrial Groups.

INDUSTRIAL GROUPS.	VALUE OF GOODS MADE AND WORK DONE		Per- centages of In- crease (+) or De- crease (-) in 1901
	1900	1901	
Animal.	\$10,302,403	\$11,009,771	+6.87
Fertilizers,	1,726,947	1,918,438	+11.09
Glue, isinglass, and starch,	1,387,973	1,442,001	+3.89
Hair work (animal and human),	371,931	341,283	-8.24
Ivory, bone, shell, and horn goods, etc.,	2,237,426	2,377,768	+6.27
Tallow, candles, soap, and grease,	4,573,126	4,930,281	+7.69
Chemical.	13,326,574	14,872,918	+11.60
Chemical preparations (compounded),	1,874,073	2,005,539	+7.01
Drugs and medicines,	4,984,173	4,995,746	+0.23
Fireworks and matches,	132,765	152,799	+15.09
Dyestuffs,	428,603	455,188	+6.20
Ink, muclage, and paste,	515,183	576,520	+11.91
Oils and illuminating fluids,	1,334,461	2,101,882	+64.25
Paints, colors, and crude chemicals,	1,658,602	1,756,057	+5.88
Perfumes, toilet articles, etc.,	183,532	191,268	+4.22
Pollshes and dressing,	2,215,182	2,547,919	+15.02
Food.	94,833,375	96,337,770	+1.59
Food preparations,	79,038,774	80,636,549	+2.02
Liquors (bottled) and carbonated beverages,	1,041,758	1,148,656	+10.26
Liquors (malt),	11,901,161	11,563,541	-2.67
Liquors (distilled),	2,852,182	2,969,024	+4.10
Leather.	152,410,027	172,853,984	+13.41
Boots and shoes,	125,471,177	142,275,334	+13.39
Leather,	22,355,846	25,896,712	+15.84
Leather goods,	3,476,225	3,645,440	+4.87
Saddlery and harness,	1,106,779	1,036,498	-6.35
Metal.	79,354,987	87,176,268	+9.17
Arms and ammunition,	2,759,076	3,824,233	+38.61
Artisans' tools,	3,343,736	3,990,632	+19.69
Bicycles, tricycles, etc.,	1,347,302	1,052,933	-21.85
Clocks and watches,	4,220,062	3,555,209	-15.76
Cooking, lighting, and heating apparatus,	3,071,998	3,353,953	+9.13
Electrical apparatus and appliances,	11,279,255	11,893,151	+5.49
Electroplating,	174,013	169,021	-2.87
Jewelry,	9,322,502	9,989,470	+1.70

Manufactures: By Classified Industrial Groups — Continued.

INDUSTRIAL GROUPS.	VALUE OF GOODS MADE AND WORK DONE		Per- centages of In- crease (+) or De- crease (-) in 1901
	1900	1901

Paper,	2,667,153	2,879,433	+7.96
Paper goods,	21,835,119	24,344,202	+11.49
Printing, publishing, and bookbinding,	7,796,912	8,789,367	+12.73
	9,302,261	9,779,985	+5.14
Rubber.			
Hose and belting: rubber, linen, etc.,	31,462,483	32,981,340	+4.83
Rubber and elastic goods,	339,258	368,082	+8.50
	31,123,230	32,613,258	+4.79
Textile.			
Awnings, sails, tents, etc.,	282,979,671	285,574,565	+0.92
Buttons and dress trimmings,	714,022	691,942	-3.09
Carpetings,	1,113,669	953,674	-14.37
Clothing,	8,398,602	8,211,483	-2.23
Cordage and twine,	23,271,352	23,430,691	+0.68
Cotton goods,	8,187,180	8,177,680	-0.12
Flax, hemp, and jute goods,	124,086,810	117,078,409	-5.65
Hosiery and knit goods,	4,982,405	5,145,716	+5.39
Print works, dye works, and bleacheries,	6,400,656	7,288,934	+13.88
Silk and silk goods,	27,344,170	27,084,794	-0.95
Woollen goods,	4,910,375	5,243,678	+6.79
Worsted goods,	40,865,404	42,594,922	+4.23
	32,805,027	39,672,642	+20.93
Wood.			
Boxes, barrels, kegs, etc.,	12,957,217	13,797,671	+6.49
Building materials,	5,644,205	6,140,735	+8.80
Burial cases, caskets, coffins, etc.,	2,566,789	2,630,689	+2.89
Lumber,	335,267	354,556	+5.75
Wooden goods,	2,041,985	2,266,928	+11.02
	2,378,971	2,404,711	+1.08

Manufactures: By Classified Industrial Groups — Concluded.

INDUSTRIAL GROUPS.	VALUE OF GOODS MADE AND WORK DONE		Per- centages of In- crease (+) or De- crease (-) in 1901
	1900	1901	
Miscellaneous.	\$15,482,348	\$15,988,025	+3.27
Brooms, brushes, and mops,	1,710,157	1,726,924	+0.98
Fancy articles, etc.,	712,623	854,191	+19.87
Fine arts and taxidermy,	47,684	45,272	-4.96
Photographs and photographic materials,	685,537	646,664	+1.75
Sporting and athletic goods,	592,643	731,339	+23.40
Straw and palm leaf goods,	5,263,985	5,198,685	-1.24
Tobacco, snuff, and cigars,	4,423,316	4,604,342	+4.09
Toys and games (children's),	719,970	733,756	+1.91
Trunks and valises,	170,459	181,851	+6.68
Whips, lashes, and stocks,	1,206,024	1,265,001	+4.89

It will be seen from the above figures that the highest percentage of increase in 1901 as against 1900 appears in the Leather group. The Textile group shows in a marked degree the effect of the fluctuations in market values, the increase being but ninety-two one-hundredths of one per cent in 1901 as compared with 1900, yet the output of this group of industries exceeds that of any other and the value of product is about one-third of the aggregate product value of the State. None of the groups show a decrease in value of goods made in 1901 as compared with 1900.

Considering the value of stock and materials used in connection with the value of goods made and work done in the nine leading industries, we present the following table:

INDUSTRIES.	PERCENTAGES OF INCREASE (+) OR DECREASE (-) IN 1901 IN THE VALUE OF -	
	Stock Used	Goods Made
Boots and shoes,	+14.03	+13.39
Carpetings,	-12.12	-2.23
Cotton goods,	+6.03	-5.65
Leather,	+11.84	+15.84
Machines and machinery,	-1.89	-0.25
Metals and metallic goods,	+12.78	+14.00
Paper,	+8.21	+11.49
Woollen goods,	+1.29	+4.23
Worsted goods,	+24.14	+20.93

Percentages of increase and decrease in the cost value of stock used are accompanied by corresponding increase or

decrease in value of goods made in the above industries, except for Cotton Goods. Here we find that the value of stock used increased 6.03 per cent, while the value of goods made decreased 5.65 per cent. Confining our analysis to this industry, we find that out of 157 establishments, 66 show increases in the value of goods made in 1901 as against 1900. These establishments produced goods to the value of \$44,139,621 in 1900, and in 1901, \$48,754,297, an increase in the latter year of 10.45 per cent. Ninety-one establishments show decreases in value of product in 1901 as compared with 1900. The value of output in these establishments was \$79,947,189 in 1900, and \$68,324,112 in 1901, a decrease in the latter year of 14.54 per cent. The product of the 66 establishments showing increase represented 35.57 per cent of the aggregate value of goods made in this industry in 1900, and 41.64 per cent of the aggregate value in 1901.

The cost value of all stock and materials used, as stated above, shows an increase of 6.03 per cent. The cost of raw cotton, the principal article of stock, was in 1900, \$0.08473, and in 1901, \$0.09891 per pound, an increase in 1901 as compared with 1900 of 16.74 per cent. We find, too, that in 1901 less cotton was used than in 1900, the figures from 113 identical establishments making a report in both of the years being 479,768,354 pounds in 1900, as against 450,765,718 pounds in 1901. The cost value of same in 1900 was \$40,648,725, and in 1901, \$44,584,673. The quantity used shows a decrease of 6.05 per cent while the aggregate cost value shows an increase of 9.68 per cent.

Comparing those establishments which made a return of the kind and quantity of goods made in each of the years, we secure the following table :

Quantity and Value of Cotton Goods Made.

KINDS OF GOODS MADE.	Basis of Measurement	QUANTITIES		AGGREGATE SELLING VALUES	
		1900	1901	1900	1901
Cotton cloth,	pounds	132,923,606	125,598,043	\$32,846,617	\$31,874,430
Dress goods,	pounds	12,329,821	12,129,163	2,694,488	2,901,446
Dress goods,	yards	137,345,426	175,293,897	8,512,414	9,869,265
Duck,	pounds	2,928,111	2,994,133	488,360	537,190
Fancy woven fabrics, . .	pounds	3,039,402	3,061,094	2,016,830	2,340,888
Fancy woven fabrics, . .	yards	11,256,780	13,432,861	1,231,044	1,505,624

Quantity and Value of Cotton Goods Made — Concluded.

KINDS OF GOODS MADE.	Basis of Measurement	QUANTITIES		AGGREGATE SELLING VALUES	
		1900	1901	1900	1901
Flannel,	yards	51,144,567	53,814,300	\$3,239,397	\$3,096,508
Gingham,	pounds	6,542,704	6,345,237	2,408,016	2,468,147
Print cloth,	pounds	57,077,712	57,807,606	13,881,590	13,368,285
Sewing cotton,	dozen	11,268,172	11,735,688	2,544,440	2,440,224
Sheetings and shirtings,	pounds	33,245,241	31,188,487	6,962,875	6,937,572
Sheetings and shirtings,	yards	24,715,324	25,778,756	1,651,129	1,701,779
Ticks, denims, stripes, etc.,	pounds	20,601,615	20,268,376	4,254,112	4,196,744
Ticks, denims, stripes, etc.,	yards	19,561,480	19,929,066	1,356,956	1,508,232
Yarn,	pounds	68,551,314	60,991,139	17,008,012	13,712,820

It should be borne in mind that these reports are made by identical establishments. That is to say, 37 establishments reported the manufacture of 132,923,606 pounds of cotton cloth in 1900, valued at \$32,846,617, and these same establishments returned an output of 125,593,043 pounds, valued at \$31,874,430, in 1901.

In the next table, we show the average prices in 1900 and 1901 for each of the above named articles based upon the foregoing table.

KINDS OF GOODS MADE.	Basis of Measurement	AVERAGE SELLING PRICES	
		1900	1901
Cotton cloth,	pounds	\$0.24711	\$0.25379
Dress goods,	pounds	0.21853	0.23921
Dress goods,	yards	0.06198	0.05624
Duck,	pounds	0.16678	0.17941
Fancy woven fabrics,	pounds	0.66358	0.75960
Fancy woven fabrics,	yards	0.10986	0.11209
Flannel,	yards	0.06315	0.05754
Gingham,	pounds	0.36805	0.38898
Print cloth,	pounds	0.24233	0.23108
Sewing cotton,	dozen	0.22581	0.20793
Sheetings and shirtings,	pounds	0.20943	0.22244
Sheetings and shirtings,	yards	0.06681	0.06601
Ticks, denims, stripes, etc.,	pounds	0.20649	0.20706
Ticks, denims, stripes, etc.,	yards	0.06387	0.07543
Yarn,	pounds	0.24808	0.22433

The average selling value of cotton cloth was a fraction less than 2½ cents per pound in 1900 and a fraction more than 2½ cents in 1901. Six of the articles show a lower average

No. 36.] INVESTMENT — MATERIALS — PRODUCT. 75

selling value in 1901 than in 1900, and in the instance of cotton yarn the decrease is quite marked. The next table shows the percentages of increase or decrease in the quantity of goods manufactured, in total selling value, and in the average selling price per unit of measurement in 1901 as compared with 1900 :

KINDS OF GOODS MADE.	Basis of Measurement	PERCENTAGES OF INCREASE (+) OR DECREASE (-) IN 1901 AS COMPARED WITH 1900 IN —		
		Quantities	Aggregate Values	Average Prices
Cotton cloth,	pounds	-5.51	-2.96	+2.70
Dress goods,	pounds	-1.63	+7.68	+9.46
Dress goods,	yards	+27.63	+15.82	-9.26
Duck,	pounds	+2.25	+10.00	+7.57
Fancy woven fabrics,	pounds	+1.37	+16.04	+14.47
Fancy woven fabrics,	yards	+19.33	+22.30	+2.50
Flannel,	yards	+5.22	-4.13	-8.88
Gingham,	pounds	-3.02	+2.50	+5.69
Print cloth,	pounds	+1.28	-3.42	-4.64
Sewing cotton,	dozen	+4.15	-4.10	-7.92
Sheetings and shirtings,	pounds	-6.19	-0.36	+6.21
Sheetings and shirtings,	yards	+4.30	+3.07	-1.20
Ticks, denims, stripes, etc.,	pounds	-1.62	-1.35	+0.28
Ticks, denims, stripes, etc.,	yards	+1.88	+10.78	+8.74
Yarn,	pounds	-11.03	-19.36	-9.37

The proper method of reading this table is as follows: Those establishments producing cotton cloth turned out 5.51 per cent less in 1901 than in 1900 and received 2.96 per cent less in aggregate value although the average price per pound of product increased 2.70 per cent. Those establishments manufacturing dress goods by the yard produced 27.63 per cent more in 1901 than in 1900, received 15.82 per cent more in aggregate value, but the average selling value per yard decreased 9.26 per cent. Those establishments manufacturing cotton yarn produced 11.03 per cent less in 1901 than in 1900, received 19.36 per cent less in aggregate value, and the average selling value per pound decreased 9.37 per cent. Other lines may be read in a similar manner.

The value of the output in the establishments considered in the above table was \$101,034,640 in 1900, and \$98,433,674 in 1901, representing 81.42 per cent of the aggregate value of production in this industry in 1900 and 84.08 per cent in 1901.

Labor and its Compensation.

The statistical presentations under this subject head cover the persons employed in 4,696 industrial establishments for each of the years 1900 and 1901, as well as the total amount paid in wages, the average annual earnings, and a classification of the rates of weekly wages. It should be borne in mind that the persons enumerated are wage earners only; officers, clerks, salesmen, or other salaried persons are not included. The data are arranged as follows:

1. The average number of males and females employed for each of the years 1900 and 1901.
2. The average number of persons employed of both sexes, and the smallest and greatest number of persons employed at periods of employment of the smallest and greatest number. By the terms periods of employment of smallest number and periods of employment of greatest number are meant those times, as regards aggregate number of persons employed, when the smallest or greatest number, respectively, was employed.
3. The range of employment and unemployment in 1900 and 1901; that is to say, the difference between the greatest and the smallest number of persons employed, with the increase or decrease in "range" in 1901 as compared with 1900 expressed in numbers and percentages.
4. The aggregate number of persons employed of both sexes month by month during each of the years 1900 and 1901, together with the percentages of employment and unemployment for each of the nine leading industries and for All Industries.
5. The total amount paid in wages during each of the years 1900 and 1901 and the average yearly earnings for both years, based upon the average number of persons employed, without regard to sex or age, and the total amount paid in wages.
6. Classified weekly wages for the nine leading industries and for All Industries for adult males and females and for young persons irrespective of sex, for each of the years 1900 and 1901.

AVERAGE NUMBER OF PERSONS EMPLOYED: BY SEX AND INDUSTRIES.

1900, 1901.

[In this presentation, the average number of males, females, and both sexes for each industry is shown. The total number of establishments is 4,696, and the number of establishments in each industry is as given in the presentation on pages 44 to 47. It should be borne in mind that the persons here enumerated are wage earners only; officers, clerks, or other salaried persons are not included.]

INDUSTRIES.	1900			1901

RANGE OF EMPLOYMENT AND UNEMPLOYMENT: BY INDUSTRIES.

1900, 1901.

[In this presentation, the excess of greatest over smallest number of persons, as obtained from the tables on pages 79 and 80, is shown, and a comparison is made between the two years. The relative increase or decrease in the excess of greatest over smallest number employed in 1901 as compared with 1900 is given with its equivalent percentage. It should be borne in mind that the persons here enumerated are wage earners only; officers, clerks, or other salaried persons are not included.]

INDUSTRIES.	EXCESS OF GREATEST OVER SMALLEST NUMBER OF PERSONS EMPLOYED		INCREASE (+) OR DECREASE (-) IN 1901	
	1900	1901	Number	Percentages
Agricultural implements,	156	174	+18	+11.54

**PERSONS EMPLOYED—BOTH SEXES.
AGGREGATES, BY MONTHS.**

1900, 1901.

[This presentation shows, for the nine leading industries and for All Industries, the aggregate number of persons employed during each month of the years 1900 and 1901, together with percentages of employment and unemployment based on the month when the greatest number of persons was employed; this greatest number has been considered as 100 per cent and the variations from this percentage month by month indicate the fluctuations in employment. It should be borne in mind that the persons here enumerated are wage earners only; officers, clerks, or other salaried persons are not included. Considerations of space have led to the curtailment of the presentation to the nine leading industries, but the figures in detail for any of the 80 classified industries may be obtained upon application to this Department.]

WAGES AND EARNINGS: BY INDUSTRIES.

1900, 1901.

[In this presentation, the figures given under "Total Amount Paid in Wages During the Year" represent the returns made by the same establishment in each industry for the years 1900 and 1901. The average yearly earnings have been obtained by dividing the total amount paid in wages by the number representing the average number of persons employed during the same year (pages 79 and 80). It should be borne in mind that these sums were paid to wage earners only, and do not include the amounts paid to officers, clerks, or other salaried persons.]

INDUSTRIES.	TOTAL AMOUNT PAID IN WAGES DURING THE YEAR		AVERAGE YEARLY EARNINGS	
	1900	1901	1900	1901

CLASSIFIED WEEKLY WAGES: BY SELECTED INDUSTRIES.

1900, 1901.

[In this presentation is shown for the nine leading industries and for All Industries for 1900 and 1901, a classification by sex of the weekly wages, ranging from under \$5 per week to \$20 and over. The returns were made by manufacturers to cover the week during which the largest number of persons was employed. It should be borne in mind that these figures represent wage earners only; officers, clerks, or other salaried persons are not included. Considerations of space have led to the curtailment of this presentation to the nine leading industries, but the figures in detail for 1900 and 1901 for any industry desired may be obtained upon application to this Department.]

INDUSTRIES AND CLASSIFICATION OF WEEKLY WAGES.	1900				1901

Analysis.

The final line of the presentation on page 78 shows that in the 4,696 establishments making return in All Industries, an average number of 386,103 persons was employed during the year 1900, and 399,997 persons in 1901, an increase of 13,894 persons, or 3.60 per cent. The average number of males employed in 1900 was 258,682, and in 1901, 269,324, an increase of 10,642 persons, or 4.11 per cent. The average number of females employed in 1900 was 127,421 and in 1901, 130,673, an increase of 3,252 persons, or 2.55 per cent. With the exception of Cotton Goods and Machines and Machinery each of the nine leading industries exhibits an increase in the average number of persons employed in 1901 as against 1900.

From the presentation on pages 79 and 80 we find that the smallest number of persons employed, at periods of employment of the smallest number, for All Industries, was 322,200 in 1900, and 339,405 for the corresponding periods in 1901, an increase of 17,205 persons, or 5.34 per cent. With the exception of Cotton Goods and Machines and Machinery each

of the nine leading industries shows an increase in the smallest number of persons employed in 1901 as compared with 1900.

From the same presentation it also appears that 440,363 persons were employed in 1900 at the periods of employment of the greatest number, and at the corresponding periods in 1901, 456,137 persons were employed, an increase of 15,774 persons, or 3.58 per cent. But one of the nine leading industries, Machines and Machinery, exhibits a decrease in the greatest number of persons employed.

The presentation on pages 81 and 82 exhibits the excess of greatest number over smallest number of persons employed in 1900 and 1901. We reproduce the figures for the nine leading industries.

INDUSTRIES.	EXCESS OF GREATEST OVER SMALLEST NUMBER OF PERSONS EMPLOYED		INCREASE (+) OR DECREASE (-) IN 1901	
	1900	1901	Number	Percent- ages
Boots and shoes (aggregate),	23,148	22,564	-584	-2.52
Factory product,	20,609	20,402	-207	-1.00
Soles, heels, and cut stock,	1,839	1,606	-233	-12.67
Findings,	343	340	-3	-0.88
Stitching, heeling, etc.,	357	216	-141	-39.50
Carpetings,	984	527	-457	-46.44
Cotton goods (aggregate),	10,888	15,839	+4,451	+40.88
Woven,	9,158	12,480	+3,322	+36.27
Yarn and thread,	1,665	2,819	+1,154	+69.31
Waste,	65	40	-25	-38.46
Leather,	2,522	2,031	-491	-19.47
Machines and machinery,	7,752	8,416	+664	+8.57
Metals and metallic goods,	6,387	5,650	-737	-11.54
Paper,	2,304	2,166	-138	-5.99
Woollen goods (aggregate),	6,277	6,127	-150	-2.39
Woven goods and yarn,	5,835	5,737	-98	-1.68
Shoddy, waste, etc.,	442	390	-52	-11.76
Worsted goods,	8,480	4,868	-3,592	-42.46
Nine industries,	68,722	67,688	-1,034	-1.50
Other industries,	49,441	49,044	-397	-0.80
All industries,	118,163	116,732	-1,431	-1.21

Seven of the nine leading industries show more continuous employment in 1901 than in 1900. The other two industries, namely, Cotton Goods and Machines and Machinery, show percentages which indicate a larger degree of unemployment. In Cotton Goods, there were 4,451 more persons who, for a

longer or shorter period, were out of employment in 1901 than in 1900, and in Machines and Machinery, 664 more persons were affected by business depressions which prevented their having as steady employment in 1901 as in 1900. In All Industries, the excess of greatest over smallest number was 118,163 in 1900, and 116,732 in 1901; that is to say, 1,431 less persons were unemployed in the latter than in the former year. The duration of this period of unemployment in either year, it is, of course, impossible to ascertain.

For the purpose of exhibiting this range of employment and unemployment year by year since 1895, as shown by these annual reports, the following table of percentages is given :

COMPARATIVE YEARS.	Number of Establishments Considered	PERCENTAGES		
		Persons Employed at Periods of Employment of Smallest Number of Persons Employed at Periods of Employment of Greatest Number	Range (Unemployed at some time During the Year)	Persons Employed at Periods of Employment of Greatest Number
1895,	4,609	73.53	26.47	100.00
1896,	4,609	66.52	33.48	100.00
1896,	4,695	67.32	32.68	100.00
1897,	4,695	71.74	28.26	100.00
1897,	4,701	72.13	27.87	100.00
1898,	4,701	70.36	29.64	100.00
1898,	4,740	70.21	29.79	100.00
1899,	4,740	74.19	25.81	100.00
1899,	4,645	74.17	25.83	100.00
1900,	4,645	73.08	26.92	100.00
1900,	4,696	73.17	26.83	100.00
1901,	4,696	74.41	25.59	100.00

In order that the full effect of these percentages may be appreciated, it should be remembered that if no persons were out of employment at any time during the year in the establishments making return in the different industries, the percentage of persons employed throughout the year would stand at 100; but, inasmuch as at the periods of employment of the smallest number, less persons are employed than at the periods of employment of the greatest number, the difference between the number of persons employed at these two periods may be rep-

resented by a percentage which indicates the number of persons unemployed at some time during the year, the duration of unemployment, of course, not being determined. This percentage is shown in the table in the third column of figures.

It will be noted that in every year more than one-fourth of the greatest number of persons employed were unemployed at some time during the year, and in one instance the percentage exceeded one-third. In 1900, 4,696 establishments being compared, nearly 27 out of every 100 persons (26.83 per cent) were out of employment at some time during the year, as against 26 persons out of every 100 (25.59 per cent) in 1901.

It does not, of course, follow that these persons were actually unemployed, for it is quite probable that a person out of employment in one establishment or industry may have obtained employment in some other establishment or other line of work or at a trade.

The figures just considered are based upon the returns made by each establishment. Upon pages 83 to 85, figures on the basis of industries are shown. From this presentation we reproduce the section devoted to All Industries.

MONTHS.	NUMBER OF PERSONS EMPLOYED		PERCENTAGES OF EMPLOYMENT		PERCENTAGES OF UNEMPLOYMENT	
	1900	1901	1900	1901	1900	1901
January,	389,107	393,625	98.46	94.78	1.54	5.22
February,	396,275	395,334	99.52	95.19	0.48	4.81
March,	395,188	400,078	100.00	96.33	-	3.67
April,	389,772	390,746	98.63	94.08	1.37	5.92
May,	389,552	396,022	98.57	95.35	1.43	4.65
June,	382,342	391,740	96.75	94.32	3.25	5.68
July,	369,070	390,075	93.39	93.92	6.61	6.08
August,	374,251	395,540	94.70	95.24	5.30	4.76
September,	380,663	403,723	96.32	97.21	3.68	2.79
October,	386,760	410,996	97.87	96.96	2.13	1.04
November,	388,792	415,322	98.38	100.00	1.62	-
December,	390,970	412,875	98.93	99.41	1.07	0.59

The number of persons employed in March, 1900 (this being the month of employment of the greatest number in that year), is considered 100 per cent; and the number of persons employed in November, 1901 (this being the month of employ-

ment of the greatest number in that year), is also considered 100 per cent. The percentages of unemployment during the other months are obtained by finding the difference between the percentages of employment appearing each month and 100 per cent. For example, the smallest number of persons employed in 1900 is found in the month of July; the number employed in the month of March, as has been explained, constituted 100 per cent; the number employed in the month of July is represented by 93.39 per cent, the percentage of unemployment being the difference between 93.39 and 100 per cent, or 6.61 per cent. Again, the smallest number of persons employed in any one month in 1901 is found, also, in the month of July, the percentage indicating the smallest number employed being 93.92; the difference between this and 100, namely, 6.08, indicates the percentage of unemployment in that month. It will be noted that the percentages of unemployment are generally higher in 1901 than in 1900.

On pages 86 and 87 is given the total amount paid in wages during the years 1900 and 1901 by the 4,696 establishments. The amount paid in 1900 was \$170,505,516, and in 1901, \$179,851,715, an increase in the aggregate of \$9,346,199, or 5.48 per cent. All of the nine leading industries, except Cotton Goods and Machines and Machinery, exhibit increases in the aggregate amount of wages paid in 1901 as compared with 1900.

On pages 86 and 87 are presented the average yearly earnings in each of the industries and for All Industries. These averages are obtained by dividing the total amount paid in wages in each industry, as presented in this table, by the aggregate average number of persons employed, without discrimination as to sex or age, as given in the table on pages 77 and 78. Such an average is, of course, only useful in comparison with averages similarly obtained.

The following table shows the average yearly earnings for each of the nine leading industries, for All Industries, and for the other industries in the aggregate, together with the increases or decreases expressed in amounts and percentages.

INDUSTRIES.	AVERAGE YEARLY EARNINGS		INCREASE (+) OR DECREASE (-) IN 1901	
	1900	1901	Amounts	Percent- ages
Boots and shoes (aggregate),	\$465.44	\$482.86	+\$17.42	+3.74
Factory product,	476.56	493.51	+16.95	+3.56
Soles, heels, and cut stock,	367.08	383.58	+16.50	+4.49
Findings,	381.62	385.06	+3.41	+0.89
Stitching, heeling, etc.,	354.20	375.50	+21.30	+6.01
Carpetings,	388.45	394.15	+5.70	+1.47
Cotton goods (aggregate),	362.59	363.76	+1.17	+0.32
Woven goods,	364.79	368.81	+4.02	+1.10
Yarn and thread,	345.96	325.82	-20.14	-5.82
Waste,	390.32	396.24	+7.92	+2.03
Leather,	485.76	479.30	-6.46	-1.33
Machines and machinery,	549.20	561.52	+2.32	+0.42
Metals and metallic goods,	537.26	558.49	+21.23	+3.95
Paper,	422.71	443.10	+20.39	+4.82
Woollen goods (aggregate),	397.58	402.91	+5.33	+1.34
Woven goods and yarn,	395.35	400.96	+5.61	+1.42
Shoddy, waste, etc.,	465.38	459.57	-5.81	-1.25
Worsted goods,	379.70	389.88	+10.18	+2.68
Nine industries,	430.56	439.97	+9.41	+2.19
Other industries,	462.35	467.70	+5.35	+1.16
All industries,	441.61	449.63	+8.02	+1.82

The increase in the average yearly earnings in 1901 as against 1900 for All Industries was \$8.02 per person, or 1.82 per cent. For the nine industries in the aggregate, the increase was \$9.41, or 2.19 per cent, and for the other industries \$5.35, or 1.16 per cent. With the exception of Leather, all of the nine leading industries show increases in the average amount earned annually, although under the detail of Cotton Goods the line yarn and thread shows a falling off of nearly six per cent, and under Woollen Goods, the line shoddy, waste, etc. exhibits a decrease of 1.25 per cent.

Actual wage conditions may, perhaps, be more accurately seen from the presentation of classified weekly wages, pages 88 to 90, than from aggregate or average tables of wages. The following table shows the percentages of adult males and females and of young persons in each wage class for All Industries :

CLASSIFICATION OF WEEKLY WAGES.	PERCENTAGES					
	1900			1901		
	Males	Females	Young Persons	Males	Females	Young Persons
Under \$5,	17.39	32.76	49.85	16.09	31.80	52.11
\$5 but under \$6,	24.13	43.33	32.54	23.35	42.30	34.35
\$6 but under \$7,	37.04	45.55	17.41	35.72	45.56	18.72
\$7 but under \$8,	54.40	36.94	8.66	53.76	37.52	8.72
\$8 but under \$9,	62.53	33.53	3.94	60.98	34.46	4.56
\$9 but under \$10,	75.98	22.20	1.82	76.29	21.35	2.36
\$10 but under \$12,	88.96	15.04	1.00	88.87	15.21	0.92
\$12 but under \$15,	98.08	6.61	0.31	92.65	7.00	0.35
\$15 but under \$20,	97.21	2.71	0.08	96.81	3.09	0.10
\$20 and over,	98.61	1.36	0.03	98.77	1.18	0.05
TOTALS,	60.83	26.07	13.10	61.04	25.56	13.40

This table indicates that of every 100 employés returned in All Industries as receiving less than \$5 per week, about 17 were males, 33 were females, and 50 were young persons in 1900, and about 16 were males, 32 were females, and 52 were young persons in 1901. The proportion of males in each class increases from the first to the last class in both years, while the proportion of females decreases after the class \$6 but under \$7.

The fluctuations in the different wage classes are shown for All Industries in the following table :

CLASSIFICATION OF WEEKLY WAGES.	PERCENTAGES							
	1900				1901			
	Males	Females	Young Persons	Totals	Males	Females	Young Persons	Totals
Under \$5,	3.63	15.96	48.31	12.70	3.21	15.14	47.34	12.17
\$5 but under \$6,	3.75	15.70	23.46	9.45	3.50	15.15	23.46	9.16
\$6 but under \$7,	7.05	20.22	15.37	11.57	6.61	20.13	15.77	11.29
\$7 but under \$8,	9.68	15.34	7.15	10.82	9.48	15.81	7.01	10.77
\$8 but under \$9,	9.96	12.46	2.91	9.69	9.40	12.69	3.21	9.41
\$9 but under \$10,	14.26	9.72	1.59	11.42	14.35	9.59	2.02	11.48
\$10 but under \$12,	15.83	6.62	0.87	11.47	16.00	6.93	0.80	11.64
\$12 but under \$15,	17.71	2.94	0.28	11.58	18.47	3.33	0.31	12.17
\$15 but under \$20,	13.82	0.90	0.05	8.64	14.39	1.10	0.07	9.07
\$20 and over,	4.31	0.14	0.01	2.66	4.59	0.13	0.01	2.84
TOTALS,	100.00	100.00	100.00	100.00	100.00	100.00	100.00	100.00

In this table, the number of males, females, young persons, and totals for both sexes and all ages are each considered as

representing 100 per cent, and the number of employes in each class constitutes parts of this aggregate, which parts are represented by percentages totalizing to 100. The percentages as shown in the table do not vary materially in either year.

Applying the percentages found in the preceding analysis tables to the average number of persons employed in 1901 (399,997) and distributing this average number into the several classes of weekly wages, we secure an estimated amount paid during one week of the year to the average number of males, females, and young persons employed. The figures appear as follows :

CLASSIFICATION OF WEEKLY WAGES.	NUMBER OF—			ESTIMATED WEEKLY WAGES OF—		
	Males	Females	Young Persons	Males	Females	Young Persons
Under \$5,	7,832	15,480	25,367	23,496	46,440	76,101
\$5 but under \$6,	8,555	15,499	12,586	47,063	85,245	69,223
\$6 but under \$7,	16,131	20,575	8,454	104,862	133,788	54,961
\$7 but under \$8,	23,160	16,164	3,756	173,700	121,230	23,170
\$8 but under \$9,	22,963	12,971	1,716	195,101	110,264	14,586
\$9 but under \$10,	35,032	9,804	1,084	332,804	98,138	10,298
\$10 but under \$12,	39,049	7,062	423	429,539	77,902	4,708
\$12 but under \$15,	45,101	3,408	170	608,864	46,006	2,296
\$15 but under \$20,	36,123	1,121	86	614,663	19,618	630
\$20 and over,	11,220	134	6	252,450	3,015	135
TOTALS,	244,156	102,238	53,603	2,782,512	736,588	261,097

As before stated, these figures are estimates based upon actual percentages and show that, during one week, the amount of \$3,780,197 was paid in wages to an average of 399,997 persons. Of this amount, \$2,782,512, or 73.61 per cent, was paid to adult males; \$736,588, or 19.48 per cent, to adult females; and \$261,097, or 6.91 per cent, to young persons of both sexes. These figures, while estimates, are approximately correct, for we find that of actual amounts paid to men, women, and children as reported by the United States Census for 1900, 78.93 per cent of the total wages was paid to men 16 years of age and over, and 19.99 per cent to women 16 years of age and over. The variation in these Census percentages and those of the Annual Statistics arises from the fact that in these Annual Reports the age separation is at 21 instead of 16 years, and

many of those classified by the United States as men and women would, under the Massachusetts classification, be enumerated under "Young Persons." However, the figures are sufficiently close to show that the averages and percentages in this Report are indicative of the actual conditions.

Taking the total amount of wages paid in 1901, as shown on page 87, and distributing it in the same proportion among the males, females, and young persons and dividing the amounts thus obtained by the figure representing the average number of persons employed, we secure an average yearly earnings for males, females, and young persons for certain industries as follows :

Estimated Average Yearly Earnings.

INDUSTRIES.	Males	Females	Young Persons
Boots and shoes (factory product),	\$574.17	\$394.88	\$243.50
Carpetings,	502.65	356.07	232.09
Cotton goods (woven),	447.17	343.71	235.08
Cotton yarn and thread,	433.42	305.45	214.84
Leather,	491.59	309.58	281.12
Machines and machinery,	570.01	311.67	271.07
Metals and metallic goods,	609.33	314.87	248.53
Paper,	552.58	293.22	273.46
Woollen goods (woven goods and yarn),	463.93	354.14	238.53
Woollen goods (shoddy, waste, etc.),	490.66	291.44	233.00
Worsted goods,	483.77	356.13	252.45
ALL INDUSTRIES,	\$542.23	\$342.68	\$231.85

Comparing these averages with those shown in the table on pages 86 and 87, we find marked variations. The average yearly earnings for all persons of both sexes and all ages was \$449.63 in All Industries in 1901, and here we find when distributed in accordance with age and sex that the males of 21 years of age and over earn, on an average, \$542.23 annually, the females 21 years of age and over, \$342.68, and the young persons under 21 years of age of either sex, an average of \$231.85. Considering the industry Boots and Shoes (Factory Product), we find that the average as shown on page 86 was \$493.51. Distributing the persons employed into their respective classes, by sex and age, we find that 73.28 per cent of all the employes are males, 22.06 per cent are females, and 4.66 per cent are

young persons of both sexes. Distributing the total wages paid into these three classes in accordance with the proportions shown above and dividing by the estimated number of adult males, adult females, and young persons, we secure average yearly earnings as follows: Males, \$574.17; females, \$394.88; and young persons, \$243.50. These averages are more nearly correct than those shown on page 86 which, as has been stated, are averages obtained for all persons indiscriminately.

Considering All Industries and comparing the figures with those obtained under the same method in 1899 and 1900, taken from the report of last year (page 127), we secure the following comparison:

	1899.	1900.	1901.
Males,	\$523.34	\$530.82	\$542.23
Females,	324.72	334.70	342.68
Young persons,	219.34	228.33	231.85

Working Time and Proportion of Business Done.

Under this head are shown the average number of days in operation, average proportion of business done, and the actual number of days each of the 4,696 establishments was in operation during the years 1900 and 1901.

The average number of days in operation is based upon the average number of persons employed, the number of days reported by each establishment being multiplied by the figures representing the average number of persons employed therein, and the sum of these multiplications for all the establishments divided by the aggregate average number of persons, an average for each industry and for All Industries being thus obtained. The actual number of working days exclusive of Sundays and holidays was 306 in 1900 and also in 1901.

The proportion of business done is based upon the greatest amount of goods which can be turned out in an establishment, presupposing a sufficient demand for goods, without increasing its present facilities. This greatest amount is considered as 100 per cent. If an establishment produced goods equivalent to three-quarters of its greatest capacity, the proportion of business done would be 75 per cent, while if only one-half of a possible output was reached it would be considered as 50 per cent. For example, in All Industries the average proportion of business done for the year 1901 is represented by 68.09 per cent; that is to say, it slightly exceeded two-thirds of what could have been done, had business conditions warranted, without enlarging the capacity of the manufacturing plants.

The several proportions returned by the establishments in each industry have been aggregated and the sum divided by the full number of establishments to obtain the average for each industry and for All Industries.

**DAYS IN OPERATION AND
PROPORTION OF BUSINESS DONE:
BY INDUSTRIES.**

1900, 1901.

[The figures given in the first two columns of this presentation represent the Average Number of Days in Operation, while in the last two columns the Average Proportion of Business Done is shown. The average number of days in operation is based upon the average number of persons employed, the number of days per establishment being multiplied by the figures representing the average number of persons, and the sum divided by the aggregate average number of persons, an average for each industry and for All Industries being thus obtained. As regards Average Proportion of Business Done, greatest capacity, or maximum production, has been considered as 100 per cent, and the percentages given indicate the average proportion of business done during each year on the basis stated.]

INDUSTRIES.	AVERAGE NUMBER OF DAYS IN OPERATION		AVERAGE PROPOR- TION OF BUSINESS DONE	
	1900	1901	1900	1901
Agricultural implements,	292.66	292.73	57.89	57.00

Analysis.

In computing the proportion of business done, maximum production, that is to say, the greatest amount of goods that could be turned out with the facilities existing in 1900, is considered 100 per cent, and similarly in 1901. In the 4,696 establishments making return in both years, the average proportion of business done in 1900 is represented by 66.96 per cent and in 1901 by 68.09 per cent.

By reference to the presentation upon pages 101 and 102 it will be noted that, considering the nine leading industries, seven, namely, Boots and Shoes, Carpetings, Leather, Metals and Metallic Goods, Paper, Woollen Goods, and Worsted Goods show greater proportion of business done in 1901 than in 1900, and that two of the nine leading industries, Cotton Goods and Machines and Machinery, show smaller proportion of business done in 1901 than in 1900. In All Industries the increase in proportion of business done in 1901 as against 1900 was 1.69 per cent.

In the head-note to the presentation on pages 101 and 102, it is stated that the average number of days in operation is based not on establishments but upon the average number of persons employed, the number of days being multiplied by the figures representing the average number of persons, and the sum divided by the aggregate average number of persons, thus obtaining an average for each of the industries considered and for All Industries. The average number of days in operation for All Industries in 1900 was 290.88 and in 1901, 292.78, an increase in the latter year of 1.90 days, or 0.65 per cent.

In the following table, we bring forward the data for the nine leading industries and show the increase or decrease in 1901 as compared with 1900 :

INDUSTRIES.	AVERAGE NUMBER OF DAYS IN OPERATION		INCREASE (+) OR DECREASE (-) IN 1901	
	1900	1901	Days	Percentages
Boots and shoes (aggregate),	284.99	290.49	+5.50	+1.93
Factory product,	284.26	290.13	+5.87	+2.07
Soles, heels, and cut stock,	291.10	293.36	+2.26	+0.78
Findings,	294.96	297.70	+2.74	+0.93
Stitching, heeling, etc.,	288.51	292.11	+3.60	+1.25

INDUSTRIES.	AVERAGE NUMBER OF DAYS IN OPERATION		INCREASE (+) OR DECREASE (-) IN 1901	
	1900	1901	Days	Percentages
	Carpetings,	302.52	300.43	-2.09
Cotton goods (aggregate),	299.13	296.18	-2.95	-0.99
Woven goods,	298.71	296.08	-2.63	-0.88
Yarn and thread,	301.92	296.55	-5.37	-1.78
Waste,	304.94	305.39	+0.45	+0.15
Leather,	297.18	301.07	+3.89	+1.31
Machines and machinery,	291.94	297.53	+5.59	+1.91
Metals and metallic goods,	298.21	296.09	-2.12	-0.71
Paper,	274.15	287.46	+13.31	+4.86
Woollen goods (aggregate),	292.84	292.60	-0.24	-0.08
Woven goods and yarn,	293.38	292.76	-0.62	-0.21
Shoddy, waste, etc.,	276.53	288.04	+11.51	+4.16
Worsted goods,	275.33	290.83	+15.50	+5.63
Nine industries,	291.88	294.20	+2.32	+0.79
Other industries,	289.00	290.13	+1.13	+0.39
All industries,	290.88	292.78	+1.90	+0.65

With the exceptions of Carpetings, Cotton Goods, and Woollen Goods, each of these nine leading industries shows increase in the average number of days in operation in 1901 as compared with 1900, Worsted Goods leading, with a gain of 15.50 days, or 5.63 per cent. The decreases shown are comparatively small, being less than a full day in Woollen Goods, slightly over two days in the carpeting industry, and about three days in Cotton Goods.

From the presentation on pages 103 and 104, which shows for All Industries the number of establishments running a specified number of days together with the average number of persons employed therein, we are enabled to prepare the following table showing the running time by periods :

CLASSIFICATION OF DAYS IN OPERATION.	NUMBER OF ESTABLISHMENTS		PERCENTAGES	
	1900	1901	1900	1901
	Under 76 days,	22	24	0.47
76 but under 152 days,	98	102	2.09	2.17
152 but under 229 days,	301	277	6.41	5.90
229 but under 256 days,	288	246	6.13	5.24
256 but under 281 days,	549	500	11.69	10.65
281 but under 306 days,	1,666	1,778	35.48	37.86
306 days and over,	1,772	1,769	37.73	37.67
TOTALS,	4,696	4,696	100.00	100.00

The total number of working days in the year, exclusive of Sundays and holidays, was 306. Some of the establishments ran more than 306 days, and therefore were in operation not only upon working days but upon either holidays or Sundays. From this table it appears that 37.73 per cent of all the establishments were in operation during the entire year in 1900 and 37.67 per cent in 1901. In 1901, 0.51 per cent of the establishments ran less than three months, 2.17 per cent three months but less than six months, 5.90 per cent six months but less than nine months, 5.24 per cent nine months but less than ten months, 10.65 per cent ten months but less than eleven months, 37.86 per cent eleven months but less than twelve months, and 37.67 per cent twelve months.

In 1900, 54.41 per cent of all the establishments ran 300 days and over. The corresponding percentage for 1901 was 55.79. Allowing six days for a vacation and excluding Sundays and holidays, it may be considered that over one-half of the establishments were in operation during the entire year. In the following table, we show the possible working time in comparison with the actual running time.

CLASSIFICATION OF YEARLY WORKING TIME.	Number of Establishments Considered	NUMBER OF DAYS	
		1900	1901
Possible working time,	4,696	1,436,976	1,436,976
Actual running time,	4,696	1,326,385	1,330,826
Lost time,	4,696	110,591	106,150
Percentage of actual running time of possible working time,	4,696	92.30	92.61

The aggregate number of possible working days for the 4,696 establishments was 1,436,976. The actual running time, based upon the number of days in operation as returned by each establishment, amounted to 1,326,385 days in 1900 and 1,330,826 in 1901. This indicates that the actual number of days lost, due to various causes, such as vacations, repairs, strikes, etc., was 110,591 in 1900 and 106,150 in 1901. The lost time, expressed in percentages, is very slight, being 7.70 in 1900 and 7.39 in 1901. The establishments, as a whole, covered 92.30 per cent of the entire working time for the year in 1900 and 92.61 per cent in 1901.

General Summary of Industrial Conditions.

In the following table, we bring forward the data relating to All Industries drawn from the several presentations for 1900 and 1901:

CLASSIFICATION.	1900	1901	INCREASE (+) OR DECREASE (-) IN 1901	
			Amounts	Percent- ages
Number of establishments considered, .	4,696	4,696	-	-
Number of private firms,	3,323	3,282	-41	-1.84
Number of corporations,	1,225	1,272	+47	+3.84
Number of industrial combinations, .	19	20	+1	+5.26
Number of partners,	5,218	5,091	-127	-2.43
Males,	4,951	4,828	-123	-2.48
Females,	168	172	+4	+2.38
Special and estates,	99	91	-8	-8.08
Number of stockholders,	47,410	49,038	+1,628	+3.43
Males,	26,584	27,360	+776	+2.92
Females,	15,602	16,353	+751	+4.81
Banks, trustees, etc.,	5,224	5,325	+101	+1.93
Average partners to a private firm, .	1.57	1.56	-0.01	-0.64
Average stockholders to a corporation, .	38.70	38.55	-0.15	-0.39
Capital devoted to production, . . .	\$462,101,015	\$478,075,904	+\$15,974,889	+3.46
Value of stock used,	\$471,452,564	\$503,328,395	+\$31,875,831	+6.76
Value of goods made and work done, .	\$825,540,858	\$869,771,876	+\$44,231,018	+5.36
Persons employed:				
Average number,	386,108	399,997	+13,889	+3.60
Males,	258,682	269,324	+10,642	+4.11
Females,	127,421	130,673	+3,252	+2.55
Smallest number,	322,200	339,405	+17,205	+5.34
Greatest number,	440,363	456,137	+15,774	+3.58
Excess of greatest over smallest, .	118,163	116,732	-1,431	-1.21
Total amount paid in wages,	\$170,505,516	\$179,851,715	+\$9,346,199	+5.48
Average yearly earnings (without regard to sex or age),	\$441.61	\$449.63	+\$8.02	+1.82
Males,*	\$530.82	\$542.23	+\$11.41	+2.15
Females,*	\$334.70	\$342.68	+\$7.98	+2.38
Young persons,*	\$228.33	\$231.85	+\$3.52	+1.54
Average proportion of business done, .	66.96	68.09	+1.13	+1.69
Average number of days in operation, .	290.88	292.78	+1.90	+0.65

* Estimated.

The changes in each of the elements summarized in the foregoing table when reduced to the basis of percentages are at

once apparent. These changes, of course, indicate improvement in the condition of the industries, in the aggregate, in 1901 as compared with 1900. The decrease in the number of private firms, it should be borne in mind, is due to changes from an individual or partnership basis to that of the corporation on the part of establishments making return in each year. The same reason accounts for the increase in the number of corporations and industrial combinations.

These reports are rendered by identical establishments in each year, and in the 4,696 returns considered in this volume, capital devoted to production increased 3.46 per cent, value of stock used increased 6.76 per cent, and the value of goods made and work done increased 5.36 per cent.

The average number of persons employed exhibits an increase of 3.60 per cent and the total amount paid in wages shows an increase of 5.48 per cent. The range of unemployment was narrower in 1901 than in 1900. An increase is shown in the average yearly earnings.

From the percentages of increase and decrease in the value of goods made and work done as shown for 4,696 establishments on pages 65 and 66, we estimate the value of product in *all* the establishments engaged in manufacturing and mechanical industries of the State. The figures are presented in the following table :

Estimated Value of Goods Made and Work Done — 1901.

INDUSTRIES.	VALUE OF GOODS MADE AND WORK DONE
Agricultural implements,	\$1,317,946
Arms and ammunition,	3,824,233
Artisans' tools,	3,990,682
Awnings, sails, tents, etc.,	746,317
Bicycles, tricycles, etc.,	2,085,303
Boots and shoes,	161,916,863
Boxes, barrels, kegs, etc.,	6,140,785
Boxes (paper),	2,975,258
Brick, tiles, and sewer pipe,	1,601,616
Brooms, brushes, and mops,	2,046,275
Building,	77,963,370
Building materials,	2,630,689
Burial caskets, coffins, etc.,	722,190
Buttons and dress trimmings,	963,674

110 STATISTICS OF MANUFACTURES. [Pub. Doc.]

Estimated Value of Goods Made and Work Done — 1901 — Continued.

INDUSTRIES.	VALUE OF GOODS MADE AND WORK DONE
Carpetings,	\$8,211,483
Carriages and wagons,	8,168,453
Cement, kaolin, lime, and plaster,	518,030
Chemical preparations (compounded),	2,163,453
Clocks and watches,	3,697,588
Clothing,	47,764,304
Cooking, lighting, and heating apparatus,	4,394,580
Cordage and twine,	9,517,435
Cotton goods,	118,324,361
Crayons, pencils, crucibles, etc.,	169,430
Drugs and medicines,	6,481,533
Dyestuffs,	555,282
Earthen, plaster, and stone ware,	512,459
Electrical apparatus and appliances,	12,671,730
Electroplating,	289,214
Emery and sand paper and cloth, etc.,	1,079,221
Fancy articles, etc.,	990,802
Fertilizers,	2,304,662
Fine arts and taxidermy,	55,214
Fireworks and matches,	152,799
Flax, hemp, and jute goods,	5,145,716
Food preparations,	102,332,213
Furniture,	19,300,301
Gas and residual products,	7,891,317
Glass,	368,193
Glue, isinglass, and starch,	1,442,001
Hair work (animal and human),	341,283
Hose and belting: rubber, linen, etc.,	568,391
Hosiery and knit goods,	7,562,698
Ink, mucilage, and paste,	594,572
Ivory, bone, shell, and horn goods, etc.,	2,377,768
Jewelry,	10,418,487
Leather,	27,196,840
Leather goods,	3,645,440
Liquors (bottled) and carbonated beverages,	2,556,054
Liquors (malt),	11,583,541
Liquors (distilled),	2,969,024
Lumber,	5,245,421
Machines and machinery,	58,450,114
Metals and metallic goods,	57,565,968
Models, lasts, and patterns,	1,388,930
Musical instruments and materials,	7,338,178
Oils and illuminating fluids,	2,876,162

Estimated Value of Goods Made and Work Done — 1901 — Concluded.

INDUSTRIES.	VALUE OF GOODS MADE AND WORK DONE
Paints, colors, and crude chemicals,	\$1,756,067
Paper,	24,577,022
Paper goods,	8,789,367
Perfumes, toilet articles, etc.,	263,773
Photographs and photographic materials,	2,297,320
Pollishes and dressing,	2,547,919
Printing, publishing, and bookbinding,	27,453,013
Print works, dye works, and bleacheries,	27,084,794
Railroad construction and equipment,	4,060,338
Rubber and elastic goods,	32,613,258
Saddlery and harness,	1,520,135
Scientific instruments and appliances,	2,589,526
Shipbuilding,	3,590,161
Silk and silk goods,	5,243,678
Sporting and athletic goods,	731,339
Stone,	6,028,115
Straw and palm leaf goods,	5,198,685
Tallow, candles, soap, and grease,	4,930,281
Tobacco, snuff, and cigars,	5,546,321
Toys and games (children's),	733,756
Trunks and valises,	181,861
Whips, lashes, and stocks,	1,531,966
Wooden goods,	3,372,557
Woollen goods,	42,594,922
Worsted goods,	41,627,419
ALL INDUSTRIES,	\$1,092,958,378

It should be borne in mind that while the above figures are estimates, they are based upon returns made by the representative establishments of the Commonwealth. In other words, had a complete Census been taken on December 31, 1901, the aggregate value of the product in all the establishments would have approximated \$1,092,958,378, and the value of the output in the several industries would have approximated the figures shown for them in the above table.

The next table brings forward for the nine leading industries the value of goods made, stock used, and wages paid, together with the industry product and the profit and minor expense fund for the year 1901.

INDUSTRIES.	Value of Goods Made	Value of Stock Used	Industry Product	Paid in Wages	Profit and Minor Expense Fund
Boots and shoes,	\$142,275,334	\$89,986,147	\$52,289,187	\$30,096,415	\$22,192,772
Carpetings,	8,211,488	4,702,924	3,508,569	1,802,452	1,706,107
Cotton goods,	117,078,409	69,529,298	47,549,111	32,617,806	14,931,305
Leather,	25,896,712	18,992,763	6,908,949	3,168,880	3,740,069
Machines and machinery,	49,136,267	17,820,367	31,315,900	15,171,118	16,144,782
Metals and metallic goods,	46,758,140	24,785,236	21,967,904	12,451,457	9,516,447
Paper,	24,344,202	13,605,791	10,738,411	4,157,628	6,580,788
Woollen goods,	42,594,922	24,194,838	18,400,084	8,894,618	9,505,466
Worsted goods,	39,672,642	24,763,567	14,909,075	6,314,431	8,594,644

It is proper to explain the meaning of "industry product" and "profit and minor expense fund," designations used in the above table. By industry product is meant the actual result of the productive forces of the industry, that is, the added value created above the value of stock and materials consumed. This value is obtained by deducting from the total value of goods made the cost value of stock used, the difference being the added value or actual product due to the industry. In the division of the proceeds of each industry, one part of the industry product is paid to the labor force in the form of wages, this being labor's share of the product. The balance constitutes a fund from which are paid freights, insurance, interest on loans (credit capital), interest on stock (fixed or invested capital), rents, taxes, commissions, salaries, etc., in fact, all expenses other than those for stock and wages. The remainder, if any, is the profit of the employer. The entire balance of the industry product remaining after the deduction of the amount paid in wages, becomes a profit and minor expense fund, and is thus designated in the table. Of course, it will be understood that the term "minor expense" is relative. The expenses, some of which we have enumerated, paid out of this balance, are in themselves considerable in amount, and are only to be classed as "minor" in comparison with the generally larger amounts expended for stock and materials and wages.

The next table presents, for the year 1901, the actual product for \$1,000 of capital devoted to production in each of the nine leading industries, the average product per employé, the percentages of industry product paid in wages, and the percentages devoted to other expenses :

INDUSTRIES.	Capital Devoted to Production	Average Persons Employed	INDUSTRY PRODUCT		PERCENTAGES OF INDUSTRY PRODUCT	
			Per \$1,000 of Capital	Average per Employé	Devoted to Profit and Minor Expenses	Paid In Wages
Boots and shoes, . . .	\$27,327,644	62,829	\$1,913.42	\$638.92	42.44	57.56
Carpetings,	5,957,590	4,573	588.92	767.23	48.63	51.37
Cotton goods,	126,845,729	89,669	374.86	530.27	31.40	68.60
Leather,	8,705,176	6,601	793.09	1,045.89	54.17	45.83
Machines and machinery,	40,707,639	27,508	769.29	1,138.43	51.55	48.45
Metals and metallic goods,	23,793,479	22,295	923.27	985.33	43.32	56.68
Paper,	20,012,943	9,383	536.57	1,144.45	61.28	38.72
Woollen goods,	25,791,680	22,076	713.41	833.49	51.66	48.34
Worsted goods,	15,831,665	16,196	941.73	920.54	57.65	42.35

The largest product per \$1,000 of capital devoted to production is found in Boots and Shoes, namely, \$1,913.42. No other industry approaches this figure. The nearest to it, however, is Worsted Goods, the industry product being \$941.73. Following this industry ranks Metals and Metallic Goods, in which the industry product is \$923.27. Next come Leather, Machines and Machinery, and Woollen Goods, in which the industry products are \$793.09, \$769.29, and \$713.41, respectively. Carpetings and Paper follow, with an industry product of \$588.92 and \$536.57, respectively. Cotton Goods finds last place with an industry product per \$1,000 of capital devoted to production of \$374.86.

These figures afford an indication of the efficiency of the capital devoted to production in these industries during 1901, and those which present the average industry product per employé may be considered as indicating the efficiency of labor. With respect to this point, Paper leads the other industries, the average product per employé being \$1,144.45. Closely following, however, are Machines and Machinery and Leather in which averages of \$1,138.43 and \$1,045.89, respectively, appear. Metals and Metallic Goods and Worsted Goods show averages of \$985.33 and \$920.54, respectively, and are followed by Boots and Shoes (\$838.92), Woollen Goods (\$833.49), Carpetings (\$767.23), and Cotton Goods (\$530.27).

When the percentage of industry product paid in wages is considered, Cotton Goods leads, the percentage being 68.60. No other industry approaches this within 10 per cent, the

nearest being Boots and Shoes with a percentage of 57.56, followed by Metals and Metallic Goods with a percentage of 56.68, and Carpetings, in which the percentage is 51.37. Next ranks Machines and Machinery, the percentage being 48.45, and, in turn, Woollen Goods, Leather, Worsted Goods, and Paper, in which the percentages are 48.34, 45.83, 42.35, and 38.72, respectively. These percentages of industry product paid in wages are the complements of the percentages of industry product devoted to profit and minor expenses, these two items aggregating 100 per cent, or the whole of the industry product.

In the following presentation, the rank of the different industries in 1901, as regards the amount of industry product per \$1,000 of capital devoted to production, is compared with the rank of the same industries for 1900, as derived from the report on Annual Statistics of Manufactures for that year :

1900.	1901.
Boots and Shoes.	Boots and Shoes.
Metals and Metallic Goods.	Worsted Goods.
Worsted Goods.	Metals and Metallic Goods.
Machines and Machinery.	Leather.
Leather.	Machines and Machinery.
Woollen Goods.	Woollen Goods.
Carpetings.	Carpetings.
Cotton Goods.	Paper.
Paper.	Cotton Goods.

All of the industries changed from the position held in 1900 except Boots and Shoes, Woollen Goods, and Carpetings.

With respect to the average industry product per employé the rank of the industries in each of the years appears as follows :

1900.	1901.
Machines and Machinery.	Paper.
Paper.	Machines and Machinery.
Metals and Metallic Goods.	Leather.
Leather.	Metals and Metallic Goods.
Worsted Goods.	Worsted Goods.
Boots and Shoes.	Boots and Shoes.
Woollen Goods.	Woollen Goods.
Carpetings.	Carpetings.
Cotton Goods.	Cotton Goods.

The first four industries exchanged places with each other in 1901 as compared with 1900, while the other five held the same rank in both of the years.

The next comparison relates to the industry product paid in wages, the industries ranking as follows :

1900.	1901.
Carpetings.	Cotton Goods.
Boots and Shoes.	Boots and Shoes.
Cotton Goods.	Metals and Metallic Goods.
Metals and Metallic Goods.	Carpetings.
Leather.	Machines and Machinery.
Machines and Machinery.	Woollen Goods.
Woollen Goods.	Leather.
Worsted Goods.	Worsted Goods.
Paper.	Paper.

The only industries retaining the same rank in 1901 as obtained in 1900 are Boots and Shoes, Worsted Goods, and Paper.

In consideration of the question of possible profits, we show, in the following pages, a series of tables for the nine leading industries comparing 1901 with 1900. The first relates to Boots and Shoes.

Boots and Shoes. [Comparison for 692 Establishments.]

CLASSIFICATION.	1900	1901
Amount of capital devoted to production,	\$26,560,748	\$27,327,544
Value of goods made and work done (gross product), . . .	\$126,471,177	\$142,275,384
Value of stock used and other materials consumed in production,	\$78,914,923	\$89,986,147
Industry product (gross product less value of stock and materials),	\$46,556,254	\$52,289,187
Wages (labor's direct share of product),	\$26,502,961	\$30,096,415
Profit and minor expense fund (industry product less wages),	\$20,053,293	\$22,192,772
Percentage of industry product paid in wages,	56.93	57.56
Percentage of industry product devoted to profit and minor expenses,	43.07	42.44
Percentage of profit and minor expense fund of capital devoted to production,	78.48	81.21

The percentage of industry product paid in wages in 1900 was 56.93, and in 1901, 57.56, an increase in the last named year. Of course, the percentage of industry product devoted

to profit and minor expenses shows a decrease in 1901 as compared with 1900, it being the complement of the percentage of industry product paid in wages. The percentage which this profit and minor expense fund formed of capital devoted to production was 81.21 in 1901 as against 78.48 in 1900; that is to say, a larger portion of the amount remaining in this industry, after eliminating the cost of stock and materials, was devoted to wages in 1901 than in 1900, leaving a slightly smaller amount for the payment of expenses (other than wages and materials) and for profit, and this amount formed a larger percentage of the total capital devoted to production in the industry in 1901 than in 1900. On the basis of these percentages, therefore, conditions were slightly more favorable for the workman in 1901 than for the employer.

A similar comparison for Carpetings follows:

Carpetings. [Comparison for 9 Establishments.]

CLASSIFICATION.	1900	1901
Amount of capital devoted to production,	\$6,045,740	\$5,957,590
Value of goods made and work done (gross product),	\$8,398,602	\$8,211,483
Value of stock used and other materials consumed in production,	\$5,351,326	\$4,702,924
Industry product (gross product less value of stock and materials),	\$3,047,276	\$3,508,559
Wages (labor's direct share of product),	\$1,681,974	\$1,802,452
Profit and minor expense fund (industry product less wages),	\$1,365,302	\$1,706,107
Percentage of industry product paid in wages,	55.20	51.37
Percentage of industry product devoted to profit and minor expenses,	44.80	48.63
Percentage of profit and minor expense fund of capital devoted to production,	22.58	28.64

Unlike Boots and Shoes, in this industry the percentage of industry product paid in wages shows a decline from 55.20 in 1900 to 51.37 in 1901, while a corresponding increase appears in the percentage of industry product devoted to profit and minor expenses. The percentage of profit and minor expense fund of capital was 22.58 in 1900 as against 28.64 in 1901.

The next table presents a comparison for Cotton Goods.

Cotton Goods. [Comparison for 157 Establishments.]

CLASSIFICATION.	1900	1901
Amount of capital devoted to production,	\$128,851,346	\$126,845,729
Value of goods made and work done (gross product),	\$124,086,810	\$117,078,409
Value of stock used and other materials consumed in production,	\$65,573,721	\$69,529,298
Industry product (gross product less value of stock and materials),	\$58,518,089	\$47,549,111
Wages (labor's direct share of product),	\$32,997,457	\$32,617,806
Profit and minor expense fund (Industry product less wages),	\$25,515,632	\$14,931,305
Percentage of industry product paid in wages,	56.39	68.60
Percentage of industry product devoted to profit and minor expenses,	43.61	31.40
Percentage of profit and minor expense fund of capital devoted to production,	19.88	11.77

In this industry, the percentages of industry product paid in wages rose from 56.39 in 1900 to 68.60 in 1901. Of course, the percentage devoted to profit and minor expenses correspondingly declined from 43.61 in 1900 to 31.40 in 1901. The profit and minor expense fund formed 19.88 per cent of capital devoted to production in 1900 and 11.77 per cent in 1901.

The next table relates to Leather.

Leather. [Comparison for 100 Establishments.]

CLASSIFICATION.	1900	1901
Amount of capital devoted to production,	\$7,798,458	\$8,705,176
Value of goods made and work done (gross product),	\$22,355,846	\$25,896,712
Value of stock used and other materials consumed in production,	\$16,982,441	\$18,992,763
Industry product (gross product less value of stock and materials),	\$5,373,405	\$6,903,949
Wages (labor's direct share of product),	\$2,857,736	\$3,163,880
Profit and minor expense fund (Industry product less wages),	\$2,515,669	\$3,740,069
Percentage of industry product paid in wages,	53.18	45.83
Percentage of industry product devoted to profit and minor expenses,	46.82	54.17
Percentage of profit and minor expense fund of capital devoted to production,	32.26	42.96

The percentages of industry product paid in wages in this industry in 1900 and 1901 were 53.18 and 45.83, respectively, a decrease in the last named year. Deducting wages, the fund

devoted to profit and minor expenses rose from 46.82 per cent in 1900 to 54.17 per cent in 1901, and this fund formed 42.96 per cent of capital devoted to production in 1901 as against 32.26 per cent in 1900.

The next table presents a comparison for Machines and Machinery.

Machines and Machinery. [Comparison for 356 Establishments.]

CLASSIFICATION.	1900	1901
Amount of capital devoted to production,	\$38,889,950	\$40,707,689
Value of goods made and work done (gross product),	\$49,260,905	\$49,136,267
Value of stock used and other materials consumed in production,	\$18,163,148	\$17,820,367
Industry product (gross product less value of stock and materials),	\$31,097,757	\$31,315,900
Wages (labor's direct share of product),	\$15,569,916	\$15,171,118
Profit and minor expense fund (industry product less wages),	\$15,527,841	\$16,144,782
Percentage of industry product paid in wages,	50.04	48.45
Percentage of industry product devoted to profit and minor expenses,	49.96	51.55
Percentage of profit and minor expense fund of capital devoted to production,	40.47	39.66

As in the preceding industry, a decrease in the percentage of industry product paid in wages appears, the percentage being 48.45 in 1901 as against 50.04 in 1900. The percentage of industry product devoted to profit and minor expenses shows an increase from 49.96 in 1900 to 51.55 in 1901, and a decrease is found in the percentage of profit and minor expense fund of the capital devoted to production, 40.47 in 1900 as against 39.66 in 1901.

A comparison for Metals and Metallic Goods follows :

Metals and Metallic Goods. [Comparison for 368 Establishments.]

CLASSIFICATION.	1900	1901
Amount of capital devoted to production,	\$22,558,788	\$23,798,479
Value of goods made and work done (gross product),	\$41,011,205	\$46,753,140
Value of stock used and other materials consumed in production,	\$21,976,723	\$24,786,236
Industry product (gross product less value of stock and materials),	\$19,034,482	\$21,967,904
Wages (labor's direct share of product),	\$11,069,780	\$12,451,457
Profit and minor expense fund (industry product less wages),	\$7,964,702	\$9,516,447

Metals and Metallic Goods. [Comparison for 368 Establishments]
— Concluded.

CLASSIFICATION.	1900	1901
Percentage of industry product paid in wages,	58.31	56.68
Percentage of industry product devoted to profit and minor expenses,	41.69	43.32
Percentage of profit and minor expense fund of capital devoted to production,	34.71	40.00

In this industry, the percentage of industry product paid in wages declined from 58.31 in 1900 to 56.68 in 1901. The percentage of industry product devoted to profit and minor expenses rose correspondingly from 41.69 in 1900 to 43.32 in 1901. The percentage of profit and minor expense fund of capital devoted to production rose from 34.71 in 1900 to 40 in 1901.

The facts for Paper are shown in the next table.

Paper. [Comparison for 75 Establishments.]

CLASSIFICATION.	1900	1901
Amount of capital devoted to production,	\$19,826,756	\$20,012,943
Value of goods made and work done (gross product),	\$21,835,119	\$24,344,202
Value of stock used and other materials consumed in production,	\$12,573,366	\$13,605,791
Industry product (gross product less value of stock and materials),	\$9,261,753	\$10,738,411
Wages (labor's direct share of product),	\$3,792,941	\$4,157,628
Profit and minor expense fund (Industry product less wages),	\$5,468,812	\$6,580,783
Percentage of industry product paid in wages,	40.95	38.72
Percentage of industry product devoted to profit and minor expenses,	59.05	61.28
Percentage of profit and minor expense fund of capital devoted to production,	27.58	32.88

In this industry, the percentage of industry product paid in wages fell from 40.95 in 1900 to 38.72 in 1901, while the percentage of industry product devoted to profit and minor expenses rose from 59.05 in 1900 to 61.28 in 1901, accompanied by an increase which the percentage of profit and minor expense fund formed of capital devoted to production, namely, 27.58 in 1900 as against 32.88 in 1901.

The next table relates to Woollen Goods.

Woollen Goods. [Comparison for 148 Establishments.]

CLASSIFICATION.	1900	1901
Amount of capital devoted to production,	\$26,500,393	\$25,791,680
Value of goods made and work done (gross product),	\$40,865,404	\$42,594,922
Value of stock used and other materials consumed in production,	\$23,887,476	\$24,194,838
Industry product (gross product less value of stock and materials),	\$16,977,928	\$18,400,084
Wages (labor's direct share of product),	\$8,563,043	\$8,894,618
Profit and minor expense fund (Industry product less wages),	\$8,414,885	\$9,505,466
Percentage of industry product paid in wages,	50.44	48.34
Percentage of industry product devoted to profit and minor expenses,	49.56	51.66
Percentage of profit and minor expense fund of capital devoted to production,	31.75	36.85

In this industry, also, there is noted a falling off in the percentage of industry product paid in wages, which fell from 50.44 in 1900 to 48.34 in 1901, accompanied by an increase in the percentage of industry product devoted to profit and minor expenses, which rose from 49.56 in 1900 to 51.66 in 1901. The percentage of profit and minor expense fund of capital devoted to production also shows an increase in 1901 as against 1900, the figures being 36.85 and 31.75, respectively.

The final comparison covers the facts for *Worsted Goods*.

Worsted Goods. [Comparison for 38 Establishments.]

CLASSIFICATION.	1900	1901
Amount of capital devoted to production,	\$15,588,639	\$15,831,665
Value of goods made and work done (gross product),	\$32,805,027	\$39,672,642
Value of stock used and other materials consumed in production,	\$19,947,194	\$24,763,567
Industry product (gross product less value of stock and materials),	\$12,857,833	\$14,909,075
Wages (labor's direct share of product),	\$5,427,372	\$6,314,431
Profit and minor expense fund (Industry product less wages),	\$7,430,461	\$8,594,644
Percentage of industry product paid in wages,	42.21	42.35
Percentage of industry product devoted to profit and minor expenses,	57.79	57.65
Percentage of profit and minor expense fund of capital devoted to production,	47.67	54.29

A slight increase in the percentage of industry product paid in wages is found in this industry, namely, 42.21 in 1900 as against 42.35 in 1901. The percentage of industry product

devoted to profit and minor expenses shows an equally small decrease from 57.79 in 1900 to 57.65 in 1901, while the percentage of profit and minor expense fund of capital devoted to production rose from 47.67 in 1900 to 54.29 in 1901.

Condensed Statements.

On the basis of the reports made by the 4,696 representative establishments, the following condensed general statements may be made regarding the manufacturing and mechanical industries in the Commonwealth for the years 1900 and 1901:

CAPITAL DEVOTED TO PRODUCTION.

The increase in capital devoted to production in 1901 as compared with 1900 in All Industries amounted to 3.46 per cent. This increase does not necessarily imply an investment of more money in industrial enterprises, nor, on the other hand, does a decrease imply the withdrawal of capital, since there are various elements by which it is affected. For example, a small amount of stock on hand or in process of manufacture at the time the return is made would have its effect in showing diminished capitalization, without, of course, affecting the condition of the industry; and, on the other hand, an investment in stock purchased in a favorable market, the same being held at the time of making the return, would render the amount of capital relatively larger than would be found at a time when the stock on hand was comparatively light.

Concerning the nine leading industries, the following facts appear: Boots and Shoes shows an increase in capital devoted to production of 6.95 per cent; Leather, 11.63 per cent; Machines and Machinery, 6.04 per cent; Metals and Metallic Goods, 4.09 per cent; Paper, 0.94 per cent; and Worsted Goods, 1.56 per cent. A decrease in amount of capital devoted to production is shown in Carpetings of 1.46 per cent; Cotton Goods, 1.17 per cent; and Woollen Goods, 2.67 per cent. The aggregate for the nine leading industries exhibits an increase of 1.40 per cent.

STOCK AND MATERIALS USED.

Considered in the aggregate, the value of stock and materials used in All Industries in 1901 shows an increase of 6.76 per

cent as compared with 1900. *Boots and Shoes* shows an increase of 14.03 per cent; *Cotton Goods*, 6.03 per cent; *Leather*, 11.84 per cent; *Metals and Metallic Goods*, 12.78 per cent; *Paper*, 8.21 per cent; *Woollen Goods*, 1.29 per cent; and *Worsted Goods*, 24.14 per cent. *Carpetings and Machines and Machinery* show percentages of decrease of 12.12 and 1.89, respectively. The increase in the value of stock used in the nine leading industries in the aggregate was 9.50 per cent.

GOODS MADE AND WORK DONE.

The aggregate value of goods made and work done in All Industries in 1901 as compared with 1900 shows an increase of 5.36 per cent. In six of the nine leading industries percentages of increase are shown as follows: *Boots and Shoes*, 13.39; *Leather*, 15.84; *Metals and Metallic Goods*, 14; *Paper*, 11.49; *Woollen Goods*, 4.23; and *Worsted Goods*, 20.93. *Carpetings* shows a decrease of 2.23 per cent, *Cotton Goods*, 5.65 per cent, and *Machines and Machinery*, 0.25 per cent. The aggregate increase for the nine leading industries was 6.41 per cent.

On the basis of the returns made by these 4,696 establishments, supposing a complete canvass of all establishments engaged in manufacturing and mechanical industries to have been made in 1901, the value of goods made and work done for the nine leading industries would have been, approximately, as follows:

<i>Boots and Shoes</i> ,	\$161,916,863
<i>Carpetings</i> ,	8,211,483
<i>Cotton Goods</i> ,	118,324,361
<i>Leather</i> ,	27,196,840
<i>Machines and Machinery</i> ,	58,450,114
<i>Metals and Metallic Goods</i> ,	57,565,968
<i>Paper</i> ,	24,577,022
<i>Woollen Goods</i> ,	42,594,922
<i>Worsted Goods</i> ,	41,627,419

On the same basis, the estimated value of goods made and work done for the State during the year 1901 is \$1,092,958,378.

PERSONS EMPLOYED.

The increase in the average number of persons employed in All Industries in 1901 as compared with 1900 was 3.60 per cent. An increase is also shown in the smallest number of persons employed of 5.34 per cent and in the greatest number of persons employed of 3.58 per cent, with a range of unemployment narrower in 1901 than in 1900 by 1,431 persons, or 1.21 per cent. In seven of the nine leading industries increase in the average number of persons employed appears as follows: Boots and Shoes, 9.46 per cent; Carpetings, 5.61 per cent; Leather, 12.20 per cent; Metals and Metallic Goods, 7.91 per cent; Paper, 4.57 per cent; Woollen Goods, 2.50 per cent; and Worsted Goods, 13.31 per cent. In the other two of the nine leading industries decreases are shown; Cotton Goods, 1.47 per cent, and Machines and Machinery, 2.91 per cent. The average number of males employed in All Industries increased 4.11 per cent and females 2.55 per cent.

WAGES PAID.

The total amount paid in wages in the 4,696 establishments increased 5.48 per cent in 1901 as compared with 1900. In seven of the nine leading industries the following percentages of increase appear: Boots and Shoes, 13.56; Carpetings, 7.16; Leather, 10.71; Metals and Metallic Goods, 12.18; Paper, 9.61; Woollen Goods, 3.87; and Worsted Goods, 16.34. In the other two industries the following percentages of decrease appear: Cotton Goods, 1.15, and Machines and Machinery, 2.50.

AVERAGE YEARLY EARNINGS.

The average yearly earnings per individual, without regard to sex or age, was \$441.61 in 1900, and \$449.63 in 1901, an increase of \$8.02, or 1.82 per cent in the latter year. The range from highest to lowest average, in 1901, was from \$816.32 in Liquors (Malt) to \$320.45 in Flax, Hemp, and Jute Goods. The higher earnings rule in the industries demanding greater skill and employing males chiefly, and the lower in factory industries employing a large proportion of

females and young persons. The estimated average amount earned during 1901 by adult males is \$542.23; adult females, \$342.68; and young persons, \$231.85.

WORKING TIME AND PROPORTION OF BUSINESS DONE.

Each of the employes worked on an average 290.88 days in 1900 and 292.78 days in 1901, an increase of 1.90 days, or 0.65 per cent. The average proportion of business done reached 66.96 per cent in 1900 and 68.09 per cent in 1901 of the full productive capacity of the 4,696 establishments, an increase in the latter year of 1.69 per cent.

PART III.

COMPARISONS: 1895, 1900.

[125]

PART III.

COMPARISONS: 1895, 1900.

The statistical presentations given on the following pages, so far as they relate to the year 1900, have been derived from the advance bulletins issued by the United States Census Office, and cover the returns for Massachusetts for the Twelfth Federal Census.

In order that the figures for the Census of 1900 might be compared on the same basis with those for 1890, the Federal Census Office omitted from their comparative presentations the returns of 2,773 establishments in each of which the value of goods made and work done was *less* than \$500 annually, and confined such presentations to 29,180 establishments, each of which produced *more* than \$500 annually. In the comparisons in this Part, we are necessarily obliged to omit the capital invested, value of stock used, product, persons employed, etc., in these 2,773 establishments, except for the first table, in which they are included, and which shows conditions in 1895 and 1900 on identical lines. As the aggregate results for these 2,773 establishments are relatively small, the comparisons for the different industries in detail are not materially affected by the omission.

CLASSIFICATION.	1895	1900
Number of establishments,	26,265	31,953
Number of proprietors, firm members, etc.,	30,370	34,790
Amount of capital invested,	\$516,062,557	\$626,160,280
Value of stock and materials used,	\$461,254,353	\$552,919,846
Value of goods made and work done,	\$649,807,302	\$1,035,953,355
Average number of persons employed (wage earners),	432,272	498,208
Total amount paid in wages,	\$192,970,069	\$228,289,763
Number of salaried persons employed,	18,823	27,860
Total amount paid in salaries,	\$23,812,542	\$31,257,630

An increase in each of the items is to be noted in the preceding figures. Since 1895, the number of separate establishments has increased 5,688, or 21.66 per cent; capital invested shows an increase of \$310,077,723, or 60.08 per cent; value of stock used, an increase of \$91,665,493, or 19.87 per cent; value of goods made and work done, an increase of \$186,146,053, or 21.90 per cent; the average number of persons employed of both sexes and all ages increased 65,936, or 15.25 per cent; and the total amount paid in wages to these same persons increased \$35,319,704, or 18.30 per cent.

We next distribute the facts concerning the 31,953 establishments into the following table. The first column presents data for 2,773 establishments in each of which the annual product was less than \$500; the second, for 15,358 establishments in which repairing was carried on, or where hand tools as distinct from machinery were used; and the third, for 13,822 establishments carrying on business more distinctively in the line of manufacturing as usually understood, such as factories, mills, and shops dependent on power machinery.

CLASSIFICATION.	Establishments Producing Less than \$500 Annually	Hand Trades	All Others
Number of establishments,	2,773	15,358	13,822
Number of proprietors, firm members, etc.,	2,865	16,753	15,172
Amount of capital invested,	\$2,895,993	\$31,693,758	\$791,570,529
Value of stock or materials used,	\$201,891	\$43,169,209	\$509,548,746
Purchased in a raw state,	\$12,603	\$592,472	\$155,412,755
Partly manufactured,	\$189,288	\$41,734,898	\$336,187,090
Fuel, freight, etc.,	-	\$841,839	\$17,948,901
Value of goods made and work done,	\$754,866	\$106,342,947	\$928,856,042
Average number of persons employed,	760	52,155	445,233
Total amount paid in wages,	\$49,321	\$29,100,619	\$199,139,823

These figures are of interest as supporting the statement made by this Department in 1885, that the collection of schedules from the establishments classed under "mechanical industries," or hand trades, was of relatively small value in determining the product of the State. Nearly one-half of the aggregate number of establishments returned in 1900

comprised those classed under "Hand Trades," and these employed scarcely four per cent (3.84) of the total capital invested, and produced but a little more than ten per cent (10.27) of the aggregate product. Only ten and one-half per cent (10.47) of the total number of persons were employed in these establishments, and they received but about 13 per cent (12.75) of the aggregate amount paid in wages during the year. When we consider the establishments each producing less than \$500 a year, we find that 2,773 establishments (less than 10 per cent) had but $\frac{35}{100}$ ths of the total capital invested, produced but $\frac{7}{100}$ ths of the aggregate product, employed but $\frac{15}{100}$ ths of the total average number of persons, and paid but $\frac{2}{100}$ ths of the aggregate amount disbursed in wages.

An interesting point brought out in the preceding table is the character of the stock or materials used. Nearly all of the stock, as shown by each of the three columns, is purchased in a partly manufactured state, the use of raw stock, upon which a minimum amount of labor has been previously expended, being relatively small in comparison with the aggregate amount of stock returned. To show this more clearly the following figures are introduced :

CLASSIFICATION OF STOCK USED.	Amounts	Percentages
Purchased in a raw state,	\$156,017,890	28.22
Purchased in a partly manufactured state,	378,111,276	68.38
Fuel, freight, supplies, etc.,	18,790,740	3.40

In other words, out of every \$100 expended for stock and materials, \$28.22 is paid for stock in a raw state upon which considerable labor must be expended to get it into condition for manufacturing, \$68.38 is paid for stock in a partly manufactured state upon which a considerable amount of labor has already been expended to put it into condition for manipulation, and \$3.40 is paid for supplies of all kinds, fuel, etc.

The following table shows a classification of the expenses of the 29,180 establishments doing business in the Commonwealth in 1900 as reported by the Federal Census Office :

CLASSIFICATION.	Amounts	Percentages
Value of stock used, including freight, fuel, and supplies,	\$552,717,955	62.42
Rent of mills, factories, and shops,	7,970,695	0.90
Taxes, not including internal revenue,	6,070,464	0.69
Interest, rent of offices, etc.,	47,010,908	5.31
Paid for contract work out of factories,	12,156,948	1.37
Paid to wage earners employed in works,	228,240,442	25.78
Paid for salaries of officers, clerks, etc.,	31,257,630	3.53
TOTAL EXPENSES,	\$885,425,042	100.00

The expense account of the individuals, firms, and corporations carrying on manufacturing and mechanical industries in the 29,180 establishments amounted, in the aggregate, to \$885,425,042, and the selling value of the goods made together with the amount received for work done was \$1,035,198,989, the balance for profit and loss being \$149,773,947, or, by distribution, an average amount of \$5,132.76 per establishment. Sixty-two per cent of the total expenses was paid for materials and nearly 26 per cent for wages; in other words, out of every \$100 paid for expenses during the year 1900, \$62.42 was paid for materials, \$25.78 for wages, \$3.53 for salaries, \$1.37 for work done outside of the factory by persons indirectly employed, \$5.31 for interest charges, rent of offices, office expenses, etc., 90 cents for rent of factories, mills, or shops, and 69 cents for taxes (not including internal revenue taxes).

In the next table, we show the percentages of expenses in relation to product for the 29,180 establishments in 1900.

CLASSIFICATION.	Amounts	Percentages
Value of stock used, including freight, fuel, and supplies,	\$552,717,955	53.39
Rent of mills, factories, and shops,	7,970,695	0.77
Taxes, not including internal revenue,	6,070,464	0.59
Interest, rent of offices, etc.,	47,010,908	4.54
Paid for contract work out of factories,	12,156,948	1.17
Paid to wage earners employed in works,	228,240,442	22.05
Paid for salaries of officers, clerks, etc.,	31,257,630	3.02
Balance for profit and loss,	149,773,947	14.47
VALUE OF GOODS MADE AND WORK DONE,	\$1,035,198,989	100.00

Out of every \$100 received for goods made or work done in 1900, the manufacturers paid over one-half, or \$53.39 for stock and materials, \$5.90 for rent, taxes, and interest, \$1.17 for contract work, \$25.07 for labor and salaries in producing the product, while the balance, \$14.47, remained for profit and loss.

MANUFACTURES: BY INDUSTRIES.

The following table exhibits the number of establishments in 1895 and 1900, respectively, classified by industries:

INDUSTRIES.	NUMBER OF ESTABLISHMENTS		INDUSTRIES.	NUMBER OF ESTABLISHMENTS	
	1895	1900		1895	1900
Agricultural implements,	16	11	Electrical apparatus and ap- pliances,	101	194
Arms and ammunition,	25	13	Electroplating,	43	54
Artisans' tools,	155	89	Emery and sand paper and cloth, etc.,	17	16
Awnings, sails, tents, etc.,	68	78	Fancy articles, etc.,	52	68
Boots and shoes,	2,074	2,774	Fertilizers,	8	9
Boxes (paper and wooden),	219	195	Fine arts and taxidermy,	12	15
Brick, tiles, and sewer pipe,	104	81	Fireworks and matches,	5	4
Brooms, brushes, and mops,	61	65	Flax, hemp, jute, and linen goods,	10	15
Building,	5,242	6,052	Food preparations,	1,862	1,920
Burial cases, caskets, coffins, etc.,	16	15	Furniture,	548	743
Buttons and dress trimmings,	27	13	Gas and residual products,	62	69
Carpetings,	14	14	Glass,	29	31
Carriages and wagons,	1,043	1,009	Glue, isinglass, and starch,	26	19
Cement, kaolin, lime, and plaster,	18	23	Ha ir work (animal and human),	36	31
Charcoal and kindlers,	9	4	Hose: rubber, linen, etc.,	6	7
Chemical preparations (com- pounded),	33	19	Hosiery and knit goods,	77	63
Clocks, watches, and jewelry,	814	848	Ink, mucilage, and paste,	15	31
Clothing,	3,391	4,227	Ivory, bone, shell, and horn goods, etc.,	31	35
Concrete walks, paving, etc.,	32	66	Leather,	200	177
Cooking, lighting, and heat- ing apparatus,	79	50	Liquors and beverages (not spirituous),	118	287
Cordage and twine,	46	27	Liquors: malt, distilled, and fermented,	210	54
Corks, bungs, and taps,	4	5	Lumber,	391	696
Cotton goods,	188	185	Machines and machinery,	660	901
Cotton, woollen, and other textiles,	4	-	Metals and metallic goods,	2,309	3,053
Crayons, pencils, crucibles, etc.,	7	3	Mixed textiles,	16	7
Drugs and medicines,	1,281	165	Models, lasts, and patterns,	89	98
Dyestuffs,	14	18	Musical instruments and ma- terials,	103	96
Earthen, plaster, and stone ware,	16	29			

INDUSTRIES.	NUMBER OF ESTABLISHMENTS		INDUSTRIES.	NUMBER OF ESTABLISHMENTS	
	1895	1900		1895	1900
Oils and illuminating fluids,	17	24	Shipbuilding,	155	125
Paints, colors, and crude chemicals,	30	30	Silk and silk goods,	17	20
Paper and paper goods,	160	156	Sporting and athletic goods,	13	13
Perfumes, toilet articles, etc.,	26	18	Stone,	414	473
Photographs and photographic materials,	353	418	Straw and palm leaf goods,	28	50
Polishes and dressing,	79	78	Tallow, candles, soap, and grease,	139	102
Printing, publishing, and bookbinding,	872	1,180	Tobacco, snuff, and cigars,	322	332
Print works, dye works, and bleacheries,	106	126	Toys and games (children's),	20	23
Railroad construction and equipment,	29	27	Trunks and valises,	21	15
Rubber and elastic goods,	76	76	Whips, lashes, and stocks,	46	31
Saddlery and harness,	449	433	Wooden goods,	560	369
Scientific instruments and appliances,	100	83	Woolen goods,	166	167
			Worsted goods,	31	45
			Establishments each producing less than \$500 annually,*	-	2,773
			ALL INDUSTRIES,	26,265	31,963

* See second paragraph on page 127.

In the United States report, 86 establishments were classified under the head of "All other industries," this being done by the Federal authorities to avoid disclosing private business. In the above table, however, we find it possible to distribute them according to the classification obtaining in these Annual Reports.

In the next table, we reproduce from the Census Bulletin the amount of capital invested in 1900.

Owing to differences in the methods of classification, it is not feasible to make comparison of the capital invested in 1895 and 1900. We have frequently had occasion to point out that the attempt to compare the amount of capital returned at different Census periods leads to imperfect results. The term "capital invested" is susceptible of various meanings. The manufacturer generally uses it as synonymous with "assets," and in this view is supported by the commercial agencies, while in economic discussion the word capital has other and varied significance. From different points of view these different meanings may each be justified. In the returns made to this Department, we have endeavored to secure a figure which will represent the "amount devoted

to production" at the date of making the return, without regard to the assets or the financial standing of the establishment. The figures presented in the Annual Statistics of Manufactures being made upon the same basis in each year are, of course, comparable. In the United States Census Bulletins, however, finished product on hand, bills receivable, and unsettled ledger accounts are included under the head of capital. Undoubtedly these should be included if it is desired to know the *assets* of the establishments, but as none of them represent items that may be devoted to current production until realized upon, they are not included in the annual returns made in Massachusetts. When realized upon by credit, or otherwise, the proceeds take their proper place as "cash on hand or in bank," or, if so invested, appear as "land," "buildings," "machinery," "stock on hand," etc.

The statistics from the Census of 1900 follow:

Amount of Capital Invested—1900.

INDUSTRIES.	Land	Buildings	Machinery, Tools, and Implements	Cash and Sundries	TOTALS

INDUSTRIES.	1895			1900		
	Land	Buildings and Fixtures	Machinery, Tools, and Implements	Land	Buildings and Fixtures	Machinery, Tools, and Implements
Paper and paper goods,	\$2,629,751	\$8,022,796	\$9,378,982	\$3,839,762	\$6,662,674	\$8,791,489
Woolen goods, . . .	1,653,649	5,639,145	7,102,312	2,468,008	4,937,326	6,088,816
Worsted goods, . . .	892,251	2,422,550	5,434,221	2,968,592	4,539,224	8,585,662
Nine industries, . . .	19,419,595	62,191,313	109,919,307	26,531,724	65,801,714	118,360,916
Other industries, . . .	21,414,441	45,076,239	68,816,147	30,752,628	50,608,613	83,572,337
All industries, . . .	40,834,036	107,267,552	178,735,454	57,284,347	116,410,327	201,933,253

In the nine leading industries in the aggregate, the amount invested in land shows an increase of 36.62 per cent in 1900 as compared with 1895; the amount invested in buildings and fixtures increased 5.81 per cent, and the value of machinery, implements, and tools increased 7.68 per cent. The increases shown for All Industries were: Land, 40.29 per cent; buildings and fixtures, 8.52 per cent; and machinery, implements, and tools, 12.98 per cent.

The table which follows shows the total value of stock and materials used,* classified by industries. It may be added, however, that the figures for "stock used" in 1900 include amounts paid for rent of power and heat, if any, and the amount paid for freight. These items were omitted in the returns for 1895.

Stock and Materials Used.

INDUSTRIES.	VALUE OF STOCK AND MATERIALS USED	
	1895	1900
Agricultural implements,	\$494,266	\$216,313
Arms and ammunition,	502,345	509,555
Artisans' tools,	924,596	1,155,081
Awnings, sails, tents, etc.,	274,119	344,194

* See second paragraph on page 127.

The returns as to the value of goods made and work done are fairly comparable since they are collected in the State and Federal Censuses on practically the same basis, although the methods of classification employed in tabulation differ. We have reclassified the product values as returned by the United States Census under the industry headings of the classification adopted by this Department, and in the following table show the value of goods made and work done for the nine leading industries for 1895 and 1900, the figures for the latter year including returns from the 29,180 establishments.

INDUSTRIES.	VALUE OF GOODS MADE AND WORK DONE		INCREASE (+) OR DECREASE (-) IN 1900	
	1895	1900	Amounts	Percentages
Boots and shoes,	\$122,135,061	\$143,289,269	+\$21,154,178	+ 17.32
Carpetings,	7,447,115	7,391,576	-55,539	-0.75
Cotton goods,	96,615,560	114,112,868	+20,496,808	+21.89
Leather,	25,684,407	28,666,895	+2,972,488	+11.57
Machines and machinery,	33,492,848	60,362,154	+26,869,306	+80.22
Metals and metallic goods,	40,297,899	50,334,171	+10,036,272	+24.91
Paper and paper goods,	27,965,024	29,794,266	+1,829,232	+6.58
Woollen goods,	29,370,963	32,221,920	+2,850,957	+9.71
Worsted goods,	20,975,996	40,557,868	+19,581,867	+93.35
Nine industries,	400,984,886	506,729,957	+106,745,064	+26.37
Other industries,	448,822,409	528,469,032	+79,646,623	+17.75
All industries,	849,807,302	1,035,198,989	+185,391,687	+21.82

The only leading industry exhibiting a decrease is Carpetings, and in this case the loss is small, being but $7\frac{5}{100}$ ths of one per cent. Each of the other nine leading industries shows increase in 1900 over 1895, ranging from 6.58 per cent in Paper and Paper Goods to 93.35 per cent in Worsted Goods. In the aggregate, the nine leading industries show an increase of 26.37 per cent, or 4.55 per cent greater than the increase shown for All Industries.

It will be noted that the value of goods made and work done in 1900 is given as \$1,035,198,989. On page 137 of the Annual Statistics of Manufactures for 1900, the estimated value of goods made and work done, based upon the returns made by representative establishments in that year, was \$1,085,717,656, a variation from the above figure of \$50,518,667, or about five per cent. This variation may be explained in part by the fact that the United States Census Office gathered figures for the year ending June 30, 1900, while the Annual Statistics covered the year ending December 31, 1900.

The presentation of industries in the Census Bulletin was given in more detail than that shown under the system of industrial classification adopted by this office. We have, however, selected certain lines which are comparable with those shown in 1895 and present them in the following table, together with increases and decreases expressed in amounts and percentages:

Manufactures: By Name.

CLASSIFICATION.	VALUE OF GOODS MADE AND WORK DONE		INCREASE (+) OR DECREASE (-) IN 1900	
	1895	1900	Amounts	Percentages
Bicycles and tricycles,	\$4,814,896	\$2,715,310	-\$1,599,586	-37.07
Blacking and stains (shoe and leather), . .	949,133	1,573,025	+623,892	+65.73
Blacksmithing and wheelwrighting, . . .	3,063,040	5,297,844	+2,234,804	+72.96
Bolts, nuts, washers, and rivets,	810,770	1,834,885	+1,024,115	+126.31
Boot and shoe cut stock,	14,006,926	18,238,922	+4,231,996	+30.21

* Internal revenue tax included. See page 163, *post*.

The majority of the lines in the preceding table show substantial increases, indicating that in the leading articles of manufacture the Commonwealth is making fair progression. Several lines exhibit decreases. For example, Bicycles and Tricycles shows a decrease of 37.07 per cent. This may be explained on the ground of a decreased demand for "wheels,"

borne out by the loss of over 60 per cent in the membership of the League of American Wheelmen and the absorption of local factories in the American Bicycle Co., with the consequent closing of some of the plants.

The decrease in Men's, Boys', and Youths' Clothing (factory product) is accounted for from the fact that clothing must, under Massachusetts laws, be made under cleanly conditions, and the abolishment of the sweat-shop has driven the manufacture of clothing into New York and other States. The manufacture of news and wrapping paper has changed in recent years and Maine and New Hampshire now produce from wood pulp what Massachusetts in past years produced from paper and rope stock. This, doubtless, accounts in a measure for the decline shown in the value of these articles. Since 1895, two piano manufacturing plants have removed to the West as has also the manufacture of plumbers' supplies.

In this connection, we reproduce a table from the Census Bulletin which shows the number of establishments not in operation in 1900, together with the amount of capital invested in the idle plants; and upon the basis of capital in those establishments which were in operation, we estimate the possible value of goods made and work done for the year.

Idle Establishments — 1900.

KINDS OF GOODS MADE AND WORK DONE.	Number of Idle Establishments	Amount of Capital Invested	Estimated Value of Goods Made and Work Done
Ammunition,	1	\$249,500	\$188,622
Bookbinding and blank book making,	8	14,850	90,359
Boots and shoes (factory product),	11	162,460	475,065
Brick and tiles,	6	70,100	43,602
Bridges,	1	75,000	126,750
Carpentering,	13	19,795	79,299
Carriages and wagons,	3	19,336	21,681
Electrical apparatus and supplies,	3	327,500	415,925
Flouring and grist mill products,	4	21,825	65,126
Foundry and machine shop products,	6	47,100	42,300
Horseshoes (factory product),	2	988,747	335,000
Hosiery and knit goods,	2	80,000	84,160
Iron and steel,	1	510,000	500,310
Iron and steel forgings,	2	94,510	136,945
Liquors (distilled),	1	231,500	358,131
Liquors (malt),	1	21,500	13,300

Idle Establishments — 1900 — Concluded.

KINDS OF GOODS MADE AND WORK DONE.	Number of Idle Establishments	Amount of Capital Invested	Estimated Value of Goods Made and Work Done
Lumber and timber products,	5	\$24,086	\$25,183
Lumber and planing mill products,	4	49,730	75,923
Marble and stone work,	8	20,130	19,607
Masonry (brick and stone),	4	20,800	92,706
Mineral and soda waters,	1	60,000	63,780
Nails and spikes (cut and wrought) including wire nails,	1	36,715	44,900
Paper and wood pulp,	3	734,908	609,339
Pottery, terra cotta, and fire clay products,	2	96,800	43,274
Silk and silk goods,	2	19,000	20,026
Tinsmithing, coppersmithing, etc.,	3	16,113	27,714
Wood turning and carving,	1	30,000	32,760
Woollen goods,	16	1,086,157	1,010,136
Worsted goods,	2	388,643	343,949
All other industries,	36	66,728	53,449
TOTALS,	148	\$5,568,033	\$5,368,979

In the following table, we reproduce the value of goods made and work done for 1895 and 1900 by industrial groups:

Manufactures: By Classified Industrial Groups.

INDUSTRIAL GROUPS.	VALUE OF GOODS MADE AND WORK DONE		INCREASE (+) OR DECREASE (-) IN 1900	
	1895	1900	Amounts	Percentages
Animal.	\$8,969,234	\$9,758,981	+\$789,747	+8.81
Fertilizers,	1,750,887	2,074,500	+323,703	+18.49
Glue, isinglass, and starch,	1,147,913	1,303,650	+155,737	+13.57
Hair work (animal and human),	559,928	137,240	-422,688	-75.49
Ivory, bone, shell, and horn goods, etc.,	1,242,929	1,873,778	+630,849	+50.76
Tallow, candles, soap, and grease,	4,267,577	4,369,723	+102,146	+2.39
Chemical.	20,106,217	23,702,108	+3,595,886	+17.88
Chemical preparations (compounded),	1,443,914	2,021,730	+577,816	+40.02
Drugs and medicines,	7,740,682	6,466,660	-1,274,022	-16.46
Dyeing (custom work),	659,792	522,616	-137,176	-20.79
Dyestuffs,	934,277	1,459,776	+525,499	+56.25
Gas and residual products,	4,879,085	7,204,708	+2,325,623	+47.67
Oils and illuminating fluids,	1,044,609	1,751,088	+706,479	+67.63
Paints, colors, and crude chemicals,	1,414,286	2,005,982	+591,696	+41.84
Polishes and dressing,	1,989,572	2,269,543	+279,971	+14.07
Food.	99,146,963	118,000,341	+18,853,378	+19.11
Food preparations,	84,331,362	100,306,031	+15,974,679	+18.94
Liquors and beverages (not spirituous),	1,029,356	1,267,879	+238,523	+23.17
Liquors: malt, distilled, and fermented,	13,786,255	16,516,431	+2,730,176	+19.80

Manufactures: By Classified Industrial Groups — Continued.

INDUSTRIAL GROUPS.	VALUE OF GOODS MADE AND WORK DONE		INCREASE (+) OR DECREASE (-) IN 1900	
	1898	1900	Amounts	Percentages
Leather.	\$149,908,298	\$173,909,315	+23,911,017	+15.94

In the following table, we show the average number of persons employed in 1895, by industries, in comparison with the average number of men, women, and children in 1900:

Persons Employed: by Industries.

INDUSTRIES.	Average Number of Persons Employed 1895	AVERAGE NUMBER OF PERSONS EMPLOYED — 1900			
		Men over 16 Years	Women over 16 Years	Children under 16 Years	Total
Agricultural implements,	600	311	—	1	312
Arms and ammunition,	1,699	1,561	3	40	1,603
Artisans' tools,	2,105	1,942	103	13	2,058
Awnings, sails, tents, etc.,	256	290	94	—	354
Boots and shoes,	59,829	43,976	20,949	1,109	65,934
Boxes (paper and wooden),	4,576	3,068	2,907	118	6,093
Brick, tiles, and sewer pipe,	1,816	1,426	—	3	1,429
Brooms, brushes, and mops,	830	554	519	32	1,105
Building,	29,244	35,758	30	44	35,832
Burial cases, caskets, coffins, etc.,	242	237	47	—	284
Buttons and dress trimmings,	1,014	302	443	27	772
Carpetings,	4,682	2,027	1,955	504	4,486
Carriages and wagons,	6,823	6,010	81	17	6,108
Cement, kaolin, lime, and plaster,	166	336	—	—	336
Charcoal and kindlers,	7	6	—	—	6
Chemical preparations (compounded),	422	590	39	3	622
Clocks, watches, and jewelry,	6,267	4,202	2,304	29	6,535
Clothing,	17,530	7,469	18,029	202	25,700
Concrete walks, paving, etc.,	183	949	1	1	951
Cooking, lighting, and heating apparatus,	2,147	1,869	35	8	1,912
Cordage and twine,	2,633	2,170	1,412	151	3,733
Corks, bungs, and taps,	87	42	19	—	61
Cotton goods,	83,113	45,488	41,501	5,972	92,961
Cotton, woollen, and other textiles,	1,755	—	—	—	—
Crayons, pencils, crucibles, etc.,	47	—	—	—	—
Drugs and medicines,	1,143	661	739	10	1,410
Dyestuffs,	172	66	34	—	100
Earthen, plaster, and stone ware,	231	526	54	4	584
Electrical apparatus and appliances,	3,449	4,883	917	103	5,903
Electroplating,	209	198	17	4	219
Emery and sand paper and cloth, etc.,	323	362	9	—	371
Fancy articles, etc.,	461	209	269	3	481
Fertilizers,	303	226	1	—	227
Fine arts and taxidermy,	18	19	—	—	19
Fireworks and matches,	84	—	—	—	—
Flax, hemp, jute, and linen goods,	2,184	555	796	123	1,474
Food preparations,	13,555	10,965	3,711	190	14,866
Furniture,	6,929	7,648	1,167	47	8,862
Gas and residual products,	1,176	1,406	3	—	1,409
Glass,	412	514	26	25	565
Glue, isinglass, and starch,	385	316	42	—	358
Hair work (animal and human),	193	10	63	1	74

* Included under "Other industries" in 1900.

Persons Employed: by Industries — Concluded.

INDUSTRIES.	Average Number of Persons Employed 1895	AVERAGE NUMBER OF PERSONS EMPLOYED — 1900			Total
		Men over 16 Years	Women over 16 Years	Children under 16 Years	
Hose: rubber, linen, etc.,	559	268	99	9	391
Hosiery and knit goods,	5,314	1,666	4,553	460	6,679

Aggregates: Towns,	219,345,005	271,087,520	+23.57	+8.54
Establishments each producing less than \$500 annually,*	-	754,366	-	-

* See second paragraph on page 127.

The increase in the value of goods made and work done in the cities in 1900 as compared with 1895 is 21.21 per cent, nearly equal to the increase shown for the State (21.90), and in the towns the increase is 23.57 per cent. It is interesting to note that while the cities gained in population at the rate of 14 persons in every 100, the value of product increased at

the rate of \$21 in every \$100, and that while the population of the towns shows a lower rate of increase per 100 persons, there is a slightly larger rate of product value to each \$100.

The value of goods made and work done in the cities in 1895 was 74.19 per cent of the aggregate product of the State, and in 1900, 73.76 per cent.

The value of goods made and work done in the towns in 1895 was 25.81 per cent of the aggregate product of the State, and in 1900, 26.16 per cent.

That the cities, while duly prosperous, did not make such progress as the towns in the aggregate, will be seen by reference to the preceding table. In only one city (Everett) does the percentage of increase exceed 100 per cent, while in four towns (Attleborough, Bridgewater, Great Barrington, and Hopedale) the percentage of increase is in excess of 100 and in the town of Bridgewater the increase is nearly 300 per cent.

Four of the cities show a decrease in the value of goods made and work done, namely, Marlborough, North Adams, Northampton, and Woburn. Marlborough also shows a decrease in population in 1900 as compared with 1895.

INDUSTRIAL COMBINATIONS.

The following table reproduces the figures from the Census Bulletin relating to Industrial Combinations :

Industrial Combinations.

CLASSIFICATION.	1900	CLASSIFICATION.	1900
Number of plants,	123	Children (under 16 years), . . .	1,526
Capital invested,	\$118,622,094	Wages paid,	\$411,474
Land,	\$9,302,235	Miscellaneous expenses,	\$5,596,359
Buildings,	\$14,072,295	Rent of works,	\$97,157
Machinery, tools, and imple- ments,	\$29,938,688	Taxes (except internal reve- nue),	\$638,098
Cash and sundries,	\$65,308,826	Rent of offices, interest, in- surance, etc.,	\$4,818,698
Salaried officers, clerks, etc., . .	1,846	Contract work,	\$12,416
Salaries paid,	\$2,621,304	Cost of materials used,	\$64,510,139
Average number wage earners, . .	38,801	Principal materials, including mill supplies and freight, . .	\$62,760,044
Total wages paid,	\$17,075,415	Fuel and rent of power and heat,	\$1,750,095
Males (16 years and over), . . .	26,897	Value of goods made and work done,	\$102,921,247
Wages paid,	\$13,479,745		
Females (16 years and over), . .	10,378		
Wages paid,	\$3,184,196		

In the following table we show the relative proportions of capital invested, persons employed, wages paid, goods made, etc., in the industrial combinations and in all the other establishments in the State for 1900:

CLASSIFICATION.	PERCENTAGES	
	Industrial Combinations	All Other Establishments
Amount of capital invested,	14.41	85.59
Value of stock and materials used,	11.66	88.34
Value of goods made and work done,	9.94	90.06
Average number of persons employed,	7.80	92.20
Total amount paid in wages,	7.48	92.52

From this table it is seen that, in 1900, 14.41 per cent of the capital invested in the manufacturing and mechanical industries in the State was invested by industrial combinations. They used 11.66 per cent of the aggregate value of stock and materials used, and produced 9.94 per cent of the total value of goods made and work done. Of the aggregate average number of persons employed, 7.80 per cent were employed by industrial combinations, and to them 7.48 per cent of the total amount disbursed in wages was paid.

SELECTED INDUSTRY PRESENTATIONS.

For detailed presentation, certain industries have been selected by the United States Census Office, and, in the following pages, we reproduce the figures together with similar data from reports made to this Department.

Paper and Pulp Mills.

In prior United States Censuses, paper and wood pulp were treated as separate industries, but in 1900 the schedule of inquiry was so prepared as to apply to paper mills, pulp mills, and paper and pulp when manufactured in the same plant.

In 1890, there were two pulp mills the returns of which are not included in the figures given for that year. In 1895, the classification adopted by this Department included not only

160 STATISTICS OF MANUFACTURES. [Pub. Doc.]

the manufacture of paper, but also that of paper goods, such as envelopes, stationery, papeteries, tablets, etc. The manufacture of wood pulp was not included under this industry heading. In 1900, as before stated, the figures covered the returns made not only by paper mills but also pulp mills.

CLASSIFICATION.	1890	1895	1900
Number of establishments,	85	160	93
Amount of capital invested,	\$22,467,036	\$27,336,211	\$26,692,922
Value of stock used,	\$12,210,458	\$17,108,505	\$11,918,902

Land,	\$3,572,658	Females (16 years and over),	3,428
Buildings,	\$5,805,874	Wages paid,	\$932,973
Machinery, tools, etc.,	\$7,156,007	Children (under 16 years),	7
Cash and sundries,	\$10,158,383	Wages paid,	\$1,440
Salaried employes,	510	Miscellaneous expenses,	\$1,693,505
Salaries paid,	\$861,152	Rent of works,	\$9,654
Officers of corporations,	80	Taxes (not including internal revenue),	\$262,385
Salaries paid,	\$273,675	Rent of offices, insurance, interest, etc.,	\$1,416,117
Superintendents, clerks, etc.,	430	Contract work,	\$4,899
Salaries paid,	\$587,477		

Paper and Pulp Mills — Continued.

CLASSIFICATION.	1900	CLASSIFICATION.	1900
Value of stock and materials used,	\$11,918,802	Value of goods made and work done,	\$22,141,461
Rags of all kinds (tons),	86,715	News paper (tons),	22,194
Cost value,	\$3,306,599	Selling value,	\$840,705
Old or waste paper (tons),	42,868	Book paper (tons),	39,551
Cost value,	\$815,272	Selling value,	\$3,120,867
Manila stock, rope, etc. (tons),	10,955	Cover paper (tons),	4,085
Cost value,	\$236,238	Selling value,	\$367,001
Straw (tons),	28	Plate, litho', map, wood-cut, and other paper (tons),	11,879
Cost value,	\$197	Selling value,	\$1,007,466
Domestic spruce for ground wood (cords),	3,052	Card board, bristol board, card middles, tickets, etc. (tons),	13,564
Cost value,	\$15,912	Selling value,	\$1,006,454
Domestic spruce for sulphite and soda fiber (cords),	18,194	Writing paper (tons),	54,791
Cost value,	\$94,090	Selling value,	\$3,751,556
Canadian spruce for ground wood (cords),	8,465	All other fine paper (tons),	13,264
Cost value,	\$73,360	Selling value,	\$2,547,072
Canadian spruce for sulphite and soda fiber (cords),	5,309	Wrapping paper — manila, etc. (tons),	6,697
Cost value,	\$39,419	Selling value,	\$546,388
Domestic poplar for soda fiber (cords),	3,050	Heavy wrapping paper (tons),	10,254
Cost value,	\$17,941	Selling value,	\$668,118
Other pulp wood for ground wood (cords),	900	Straw paper (tons),	1,187
Cost value,	\$4,335	Selling value,	\$9,500
Other pulp wood for sulphite and soda fiber (cords),	100	Bogus or wood manila paper, all grades (tons),	2,256
Cost value,	\$600	Selling value,	\$107,762
Ground wood pulp purchased (tons),	21,308	All other wrapping paper (tons),	1,844
Cost value,	\$400,299	Selling value,	\$109,523
Soda wood fiber purchased (tons),	25,493	Binders and trunk board (tons),	1,518
Cost value,	\$1,069,036	Selling value,	\$41,700
Sulphite wood fiber purchased (tons),	36,912	Leather-board (tons),	2,874
Cost value,	\$1,709,804	Selling value,	\$190,794
Other chemical fiber purchased (tons),	1,861	Press and album board (tons),	590
Cost value,	\$99,566	Selling value,	\$46,692
Chemicals,	\$730,424	Wood pulp board (tons),	2,846
Clay,	\$340,267	Selling value,	\$144,435
Colors,	\$152,301	Straw board (tons),	800
Sizing,	\$348,650	Selling value,	\$18,808
All other stock,	\$90,556	All other boards (tons),	8,620
Fuel,	\$1,035,131	Selling value,	\$511,682
Rent of power and heat,	\$219,080	Tissue paper (tons),	2,479
Mill supplies,	\$314,058	Selling value,	\$416,440
All other materials,	\$570,636	Blotting paper (tons),	788
Freight,	\$235,081	Selling value,	\$111,627
		Building, roofing, asbestos, and sheathing paper (tons),	14,373
		Selling value,	\$615,088
		Carpet-lining paper (tons),	4,425
		Selling value,	\$141,499

Paper and Pulp Mills—Concluded.

CLASSIFICATION.	1900	CLASSIFICATION.	1900
Value of goods made and work done—Con.		Machinery—Con.	
Hanging paper (tons), . . .	2,264	Cylinder paper machines, . . .	50
Selling value,	\$143,080	Total width (inches), . . .	3,084
Miscellaneous paper (tons), . .	1,427	Wet machines,	34

Machinery:		Grinders (wood-pulp),	42
Fourdriner paper machines, . .	152	Yearly capacity of mills:	
Total width (inches),	11,832	In paper (tons),	238,576
		In pulp (tons),	31,220
		Total horse power,	82,393

The next presentation covers the returns made by the 68 establishments engaged in the manufacture of gas, taken also from the Bulletin issued by the United States Census Office.

Gas and Residual Products.

CLASSIFICATION.	1900	CLASSIFICATION.	1900
Number of establishments,	68	Capital invested—Con.	
Value of bonds,	\$1,983,900	Cash on hand, surplus, reserve fund (invested or otherwise), bills and unsettled ledger accounts receivable, and sundries not included in any of the foregoing items,	\$2,319,542
Interest paid during the year,	\$90,414	Salaried officers, clerks, etc.,	434
Value capital stock issued,	\$16,535,891	Total salaries paid,	\$420,085
Preferred,	\$21,800	Male salaried persons,	374
Common,	\$16,514,091	Salaries paid,	\$389,909
Dividends paid during year,	\$1,449,546	Female salaried persons,	60
Capital invested,	\$30,032,578	Salaries paid,	\$30,176
Land,	\$3,591,388	Average number of wage earners,	1,409
Buildings,	\$6,621,853	Total wages paid,	\$813,459
Machinery and gas-making apparatus, holders, mains, meters, teams, tools, horses, wagons, and other accessories,	\$16,941,434	Males (16 years and over), . . .	1,406
Raw materials and finished products on hand, including by-products,	\$558,361	Wages paid,	\$811,587

Gas and Residual Products — Concluded.

CLASSIFICATION.	1895	CLASSIFICATION.	1900
Females (16 years and over),	3	Miscellaneous expenses — Con.	
Wages paid,	\$1,872	Rent of offices,	\$36,329
Greatest number of persons employed during the year,	1,881	Taxes, including royalty and special tax,	\$315,907
Smallest number,	1,351	Lamps and appliances purchased for sale,	\$41,377
Value of stock and materials used,	\$1,651,873	Insurance, repairs, interest, freight, advertising, and all others not mentioned,	\$753,552
For gas making,	\$1,482,700	Value of products,	\$5,968,864
Coal (tons),	224,726	Gas sold (cubic feet),	4,673,442,791
Cost value,	\$790,783	Selling value,	\$5,356,301
Coke (bushels),	741,022	Average value per 1,000 cubic feet,	\$1.146
Cost value,	\$44,376	All other products including coke, tar, etc.,	\$381,108
Oil (gallons),	17,148,844	Receipts from rents and sales of appliances,	\$181,455
Cost value,	\$630,647	Total horse power,	4,217
Water (gallons),	36,249,986	Steam engines,	150
Cost value,	\$16,894	Horse power,	4,212
Cost of fuel for boilers and retorts,	\$82,584	Electric motors,	1
Cost of mill supplies,	\$7,415	Horse power,	5
Cost of all other materials including purification supplies,	\$37,944		
Freight,	\$41,230		
Miscellaneous expenses,	\$1,147,205		
Rent of works,	\$40		

In the following table is given, in as far as possible, a comparison between the years 1895 and 1900 for the manufacture of malt, distilled, and fermented liquors. In the United States Bulletin the value of product is given as \$12,132,394; this we have increased by the addition of \$1,224,602, the internal revenue tax on 1,360,669 gallons of distilled liquors, which was omitted by the Census Office, but which should be added in order to secure the actual selling value of the liquor distilled.

Liquors: Malt, Distilled, and Fermented.

CLASSIFICATION.	1895	1900

Electric motors,	17	15
Horse power,	111¼	150

Included in the returns for 1895 were a number of establishments manufacturing cider and engaged in bottling which are not included in the returns for 1900.* Their omission accounts for the apparent loss in the number of establishments as well as for the loss shown in the number of water wheels.

The following table presents the data for establishments manufacturing malt liquors in 1900 :

Malt Liquors.

CLASSIFICATION.	1900	CLASSIFICATION.	1900
Number of establishments,	40	Value of stock and materials used,	\$2,343,050
Private firms,	10	Malt (bushels),	2,299,215
Corporations,	30	Cost value,	\$1,395,624
Amount of capital invested,	\$18,136,623	Corn, partly manufactured (pounds),	14,388,968
Land,	\$2,074,101	Cost value,	\$165,114
Buildings,	\$6,226,373	Hops (pounds),	2,457,654
Machinery, tools, etc.,	\$4,421,247	Cost value,	\$967,019
Cash and sundries,	\$5,414,902		

* Value of bottling done in 1900, \$4,384,037.

Malt Liquors — Concluded.

CLASSIFICATION.	1900	CLASSIFICATION.	1900
Value of stock and materials used — Con.		Total salaries paid,	\$689,035
All other materials,	\$590,732	Officers of corporations,	\$193,597
Fuel,	\$220,071	Superintendents, clerks, etc.,	\$445,428
Mill supplies,	\$22,123	Males,	\$442,356
Freight,	\$62,367	Females,	\$3,072
Value of goods made and work done,	\$11,255,613	Persons employed:	
Ale, beer, and porter,	\$11,175,068	Average number,	1,651
All other products,	\$80,545	Males,	1,641
Barrels of 31 gallons each of ale, beer, and porter made,	1,731,608	Females,	10
Miscellaneous expenses,	\$4,731,540	Smallest number,	1,544
Rent,	\$324	Greatest number,	1,767
Taxes (not internal revenue),	\$115,875	Total wages paid,	\$1,340,412
Interest, insurance, etc.,	\$4,614,343	Males,	\$1,336,427
Contract work,	\$968	Females,	\$3,985
Number of salaried persons,	322	Machinery:	
Officers of corporations,	45	Steam engines,	152
Superintendents, clerks, etc.,	277	Horse power,	6,719
Males,	271	Electric motors,	15
Females,	6	Horse power,	150

The next table relates to the manufacture of distilled liquors, and in order to conform to the practice of this Department, the tax of 90 cents per gallon is added to the value of spirits produced in order to obtain the actual selling value of the goods made.

Distilled Liquors.

CLASSIFICATION.	1900	CLASSIFICATION.	1900
Number of establishments,	8	Value of stock and materials used — Con.	
Private firms,	7	Barley (bushels),	150

In 1895, there were 10 establishments returned under the industry classification of Flax, Hemp, and Jute Goods. These establishments returned the amount of capital devoted to production as \$2,446,246, the cost value of stock and materials used, \$2,028,837, and the value of goods produced as \$3,053,777. There were 2,184 persons of both sexes employed to whom \$662,947 in wages was paid. The information given below is taken from Census Bulletin No. 168 and covers the returns for this industry for the year ending June 30, 1900.

Flax, Hemp, and Jute Goods.

CLASSIFICATION.	1900	CLASSIFICATION.	1900
Number of establishments,	28	Number of salaried persons,	138

Wages paid,	\$415,417	\$62,800	\$12,760	\$10,360	\$6,250	\$5,500

In 1900, there were 45 establishments which were engaged exclusively in the manufacture and repair of small boats, including power launches, ships' boats, lifeboats and life rafts, rowboats, and sailboats under 5 tons measurement. They had \$208,559 of capital, and the value of the output was \$271,114.

There were 16 establishments engaged exclusively in repairing with a capital of \$920,707, and they received \$1,042,690 for work done. This does not include the plants maintained by transportation companies for the repair of their own vessels. Of the latter, there were two, with a capital of \$80,500. The value of the work done by them amounted to \$120,200.

Of the small boats built, Massachusetts produced the following: Steam launches, 7; value, \$23,850; power launches (other than steam), 41; value, \$49,383; sailboats under 5 tons, 2,099; value, \$98,242; rowboats, canoes, etc., 1,661; value, \$61,339.

In Bulletin No. 189, devoted to the manufacture of cheese, butter, and condensed milk, we find the following figures for Massachusetts:

Cheese, Butter, and Condensed Milk (Factory Product).

CLASSIFICATION.	1900	CLASSIFICATION.	1900
Number of establishments,	50	Value of stock and materials used—	
Private firms,	15	used—	
Corporations,	4	For condensed milk—	
Associations, etc.,	31	Milk (pounds),	324,000

From the same bulletin, we find that in 1840 there were grown in Massachusetts 64,955 pounds of tobacco. This was more than doubled in 1850, the number of pounds grown being 138,246. In 1860, it rose to 3,233,198 pounds and in 1870 to 7,312,885 pounds, falling in 1880 to 5,369,436 pounds, and in 1890 to 2,794,848 pounds. In 1900, however, the quantity rose to 6,406,570 pounds.

According to the report of the Commissioner of Internal Revenue there were 2,842,087 pounds of tobacco used in 1900,

and the production in that year of cigars and cigarettes was 135,630,310, distributed as follows: Cigars, weighing more than three pounds per thousand, 127,679,825; cigars, weighing not more than three pounds per thousand, 738,200; cigarettes, weighing more than three pounds per thousand, 52,860; and cigarettes, weighing not more than three pounds per thousand, 7,159,425.

There were 2 establishments engaged in the manufacture of smoking tobacco and snuff, and during 1900 they used 121,613 pounds of leaf tobacco, 18,038 pounds of scraps, 2,262 pounds of stems, and 11,284 pounds of other materials. The product was 19,268 pounds of smoking tobacco and 112,804 pounds of snuff.

From Bulletin No. 198, devoted to starch, we select the following data for Massachusetts.

Starch.

		Horse power,	125

From Bulletin No. 203, devoted to the lumber industry in all its branches, we extract the data which follow:

Massachusetts was originally covered with forests of conifers, mixed with hard woods, but the State was long ago thoroughly lumbered, and to-day contains very little, if any, virgin forest, the cutting being confined principally to second growth. The product of Massachusetts has materially increased in the past 50 years, and in 1900 exhibits a value four times greater than in 1850, as will be seen by the following table:

YEARS.	Value of Product	YEARS.	Value of Product
1850,	\$1,552,265	1880,	\$3,120,184
1860,	2,218,144	1890,	5,211,607
1870,	3,556,870	1900,	6,526,230

The woodland has an area, by measurement from the maps of the State prepared by the United States Geological Survey, of 4,200 square miles, or 52 per cent of the area of the State. Very little of this, however, contains timber of mill size and quality. The following table shows the timber owned and cut in 1900, by species and average stand :

SPECIES.	Owned (M feet, B. M.)	Average Stand	1900 cut (M feet, B. M.)
White pine,	340,400	10,300	261,133
Other conifers,	7,200	-	42,846
Hard woods,	27,900	-	42,539
TOTALS,	375,500	-	346,518

In the following table, we reproduce the statistics of the lumber industries of Massachusetts for the year 1900 :

Lumber and Timber Products.

CLASSIFICATION.	1900
Number of establishments,	563
Private firms,	542
Corporations,	11
Number of sawmills,	534
Number of tie and timber camps,	19
Amount of capital invested,	\$6,253,171
Aggregate for mills,	\$6,103,721
In logging plants conducted by milling establishments,	\$1,551,292
Timbered land tributary to mill,	\$866,876
Other timbered land,	\$364,412
All other land,	\$113,623
Tools, implements, live stock, etc.,	\$158,690
Logging railways and equipment,	\$1,700
River improvement (exclusive of stock in chartered boom companies),	\$2,532
Booms, chains, and supplies,	\$599
Vessels used in transportation of lumber or logs, including steam tugs,	\$112
Saw logs, bolts, hewed timber, ties, posts, etc., on hand (not delivered at mill),	\$32,073
All other capital invested in logging,	\$10,675
In sawmill plants,	\$1,533,754
Land,	\$264,896
Buildings, dry kilns, etc.,	\$505,605
Machinery, tools, and implements,	\$763,251
In planing mill plants, conducted by milling establishments,	\$424,756
Land,	\$62,445
Buildings, dry kilns, etc.,	\$191,303
Machinery, tools, and implements,	\$170,918

Lumber and Timber Products — Continued.

CLASSIFICATION.	1900

In the following table is given the entire logging business of the State, including the logging camps operated in connection with sawmills, together with those operated independently:

Number of establishments,	247
Amount of capital invested,	\$1,700,742
Value of stock and materials used,	\$551,785
Value of goods made and work done,	\$1,681,801
Average number of persons employed,	789
Total amount paid in wages,	\$322,903

Below we present the figures for establishments carrying on exclusively sawmill operations, separated from planing mills and timber camps for the purpose of showing this particular branch of the lumber industry.

Number of establishments,	534
Amount of capital invested,	\$4,014,837
Value of stock and materials used,	\$2,859,038
Value of goods made and work done,	\$5,057,483
Average number of persons employed,	2,439
Total amount paid in wages,	\$1,073,090

The figures below give an idea of the magnitude of the purely planing mill branch of the lumber industry. To the statistics of "independent" planing mills are added actual and estimated figures representing those branch planing mills which are operated in connection with sawmills. The independent planing mills are not included in any other statistics presented in the Bulletin referred to.

Number of establishments,	300
Amount of capital invested,	\$4,657,629
Value of stock and materials used,	\$4,283,679
Value of goods made and work done,	\$7,535,689
Average number of persons employed,	2,669
Total amount paid in wages,	\$1,447,734

Bulletin No. 236 is devoted to the manufacture of woollen goods, worsted goods, shoddy, wool and fur hats, hosiery and knit goods, carpets and rugs, wool scouring, etc. From the returns therein we find that, as compared with the other States in the Union, Massachusetts ranks first in the manufacture

of woollen goods ; first in worsted goods, third in carpets and rugs, second in felt goods, and third in wool hats. Of the three leading cities of the country in wool manufacturing, Philadelphia, Pa., was first ; Lawrence, Mass., second ; and Providence, R. I., third. In the following table is shown the progress in the manufacture of all kinds of woollen goods, except hosiery and knit goods, in Massachusetts, since 1840 :

YEARS.	Estab- lishments	Capital	Materials Used	Product	Persons Employed	Wages Paid
1840,	144	\$4,179,850	-	\$7,082,898	5,076	-
1850,	119	9,089,342	\$8,671,671	12,770,565	11,130	-
1860,	147	13,005,853	15,367,378	24,015,443	15,638	\$3,658,589
1870,	226	26,722,900	33,795,964	52,270,608	28,025	9,809,718
1880,	214	36,764,000	40,233,171	64,968,209	34,717	11,027,822
1890,	219	66,568,586	42,273,379	67,599,321	37,739	13,732,316
1900,	195	90,128,754	49,120,181	81,041,537	42,069	16,057,849

The figures contained in the next table relate to the manufacture of woollen goods.

The next table gives statistics for the principal subdivision of the wool manufacture, namely, the combed-wool department, in which are manufactured worsted cloths and suitings, worsted dress goods, and large quantities of worsted yarn for use in carpet manufacture. The worsted mills are distinguished from the woollen mills by the initial processes to which the fiber is subjected.

Selling value,	\$274,069	Horse power,	20
		Water wheels,	30
		Horse power,	1,650

The wool-hat manufacture is properly a part of the felt industry, the hats being made by a process of felting, and thus distinguished from the ordinary products of the loom. With the United States Census office, it has been customary to include wool hats in the wool manufacture, but under the system of classification obtaining in Massachusetts the product has always been included under "Clothing" upon the ground that the hat is an ultimate product, while dress goods, felt cloths, etc., have not reached their final use when produced by the mill. The following table gives the data for the manufacture of wool hats:

Wool Hats.

CLASSIFICATION.	1900	CLASSIFICATION.	1900
Number of establishments,	4	Value of goods made and work done — Con.	
Private firms,	1	Fur hats (dozen),	20,494
Corporations,	3	Selling value,	\$153,705

Wool hats (dozen),	247,163	Steam engines,	4
Selling value,	\$939,298	Horse power,	475

Until the census of 1900, no attempt had been made to obtain a separate statement of the statistics for the fur-hat manufacture. They had been included with those of "hats and caps, not including wool hats." This Department has never made any distinction between fur and wool hats, classifying them, as stated on page 209, under Clothing. The material from which fur hats are made is the fur of the rabbit, coney, and nutria, and is mostly imported, sometimes on the skin, but more often cut, although there are some large fur-cutting establishments in the United States, and some of the most important fur-hat factories cut their own fur. The statistics for 1900 follow :

Fur Hats.

CLASSIFICATION.	1900	CLASSIFICATION.	1900
Number of establishments, . . .	11	Miscellaneous expenses, . . .	\$97,787
Private firms,	9	Rent of works,	\$9,910

According to Bulletin No. 215, Massachusetts leads in the manufacture of cotton goods and cotton small wares, the aggregate value of goods made in 1900 being \$111,125,175, or about one-third of the total product of the United States. The progress made in cotton manufacturing in this State since 1840 is shown in the following table:

YEARS.	Estab-lishments	Capital	Stock Used	Product	Persons Employed	Wages Paid
1840,	278	\$17,414,099	-	\$16,553,423	20,928	-
1850,	213	28,455,630	\$11,289,309	19,712,461	28,730	-
1860,	217	33,704,674	17,214,592	38,004,255	38,451	\$7,798,476

YEARS.	Estab- lishments	Capital	Stock Used	Product	Persons Employed	Wages Paid

* Producing spindles; not including twisting and doubling spindles.

The number of working spindles is the generally accepted measure of the capacity of cotton mills and, while imperfect, is considered more accurate than the bases of capital, persons employed, wages, stock used, or value of product. The total number of active producing cotton spindles in the textile mills of Massachusetts during the census year 1900 was 7,932,883, distributed as follows :

In cotton mills,	7,784,687
In hosiery and knit goods mills,	91,356
In worsted mills,	50,080
In woollen and carpet mills,	3,760
In cotton small wares and cordage and twine mills,	3,000

The number of active cotton spindles in 1900 in the United States was 19,472,232, distributed as follows :

New England States,	13,171,377
Middle States,	1,721,347
Southern States,	4,354,034
Western States,	225,474

Numerically there has been an increase of about 19 per cent over 1890 in the number of spindles in cotton mills in the New

England States, about one per cent in the Middle States, nearly 177 per cent in the Southern States, and 29 per cent in the Western States. "Taking account of the spinning capacity of spindles, the growth of the industry in the New England States is probably not greatly above that which is indicated by the actual number of spindles, since the mills in that part of the country were in advance of the South in installing improved spindles. On the other hand, not only has the number of spindles in the Southern States become nearly three-fold that reported in 1890, but the spindles themselves are for the most part of the latest and most efficient types."

The next table shows the number of mule and frame spindles in cotton mills for 1880, 1890, and 1900 for Massachusetts.

YEARS.	Mule	Frame	Total
1880,	-	-	4,236,084
1890,	2,430,719	3,393,799	5,824,518
1900,	2,556,318	5,228,371	7,784,687

From the above figures, it is evident that there has been an increase in the number of frame spindles, indicating an apparent substitution of frames for mules, but, as set forth in the Census Bulletin, this is not so much due to the removal of mules from the old mills as to a change in the class of product. "It is well known that although for most purposes in cotton manufacturing, the yarn made upon ring spindles is altogether satisfactory, there is a demand for slack-twisted yarn chiefly for knit underwear, which has heretofore been produced by the mule only. Moreover, a mechanical difficulty which has not been overcome has been experienced in employing ring spindles for spinning upon cops, where the yarn made in one mill must be transported to another part of the country for consumption in hosiery mills. It is, therefore, not probable that there will be a reduction in the number of mules in use, and there may even be an increase; but the economy in the production of yarn by ring spindles, and the fact that the machinery can be operated by labor not so highly skilled as is required for mule spinning, will doubtless cause the tendency

to install frame spindles in new spinning and weaving mills to continue." Out of every 100 spindles in use in Massachusetts, 42 were mule and 58 frame in 1890, and 33 were mule and 67 frame in 1900.

A separate classification in 1900 was made for establishments producing cotton small wares, including tape, webbing, etc., and the figures are shown in the following table :

Cotton Small Wares.

CLASSIFICATION.	1900	CLASSIFICATION.	1900

In the next table we present data for Massachusetts for all of the textile industries combined.

Combined Textiles.

CLASSIFICATION.	1900
Number of establishments,	511
Amount of capital invested,	\$283,786,325
Value of stock and materials used,	\$120,894,172
Value of goods made and work done,	\$225,001,724
Average number of persons employed,	153,732
Total wages paid,	\$55,382,005

As compared with the other states of the Union, Massachusetts ranks first in the manufacture of boots and shoes, a position which it has held in each of the census years 1880, 1890, and 1900. The aggregate value of factory product for 1900 was \$117,115,243, the total value for the United States being \$261,028,580. The table which follows presents statistics in detail for this State :

Boots and Shoes (Factory Product).
